Final Version

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

**MPMS# 12923**      **Bristol Road Extension SR:2025**

**LIMITS:** US 202 to Park Avenue

Est Let Date: 12/12/2024

**IMPROVEMENT** Roadway New Capacity

**NHPP:**

MRPID:119

**MUNICIPALITIES:** Chalfont Borough; New Britain Borough; New Britain Township

**FC:** 16

AQ Code:2035M

**PLAN CENTER:** Town Center

IPD: 14

**PROJECT MANAGER:** HNTB/N. Velaga

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 8G, 12B

Provide a two lane extension of Bristol Road from Business Route 202 to Park Avenue. When completed, this improvement will provide a two-lane bypass around Chalfont Borough which will eliminate trips on Business Route 202 and turning movements at the Business Route 202/PA 152 intersection. Project may involve relocation of SEPTA siding track, a bridge across the wetlands, widening the intersection at Bristol Road and Business Route 202 to provide right and left turning lanes, providing maintenance of traffic during construction, redesigning traffic signals and rail road crossing gates at Business Route 202 and Bristol Road extension and coordination with SEPTA.

Project CMP (Congestion Management Process) commitments include sidewalks, signal and intersection improvements, turning movement enhancements, and coordination with SEPTA. See DVRPC's 2016-2017 memorandum on supplemental strategies for details related to this project.

**PROJECT MANAGER:** EE/J. Arena

**CMP:** Not SOV Capacity Adding

This project involves bridge rehabilitation or replacement of state bridge over the Neshaminy Creek on Worthington Mill Road between Swamp Road and Twining Bridge Road in Northampton and Wrightstown Townships. It is a poor condition bridge breakout project from MPMS #88706. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 14G

Reconstruct roadway, curbs, sidewalks, and walls. Construct new sidewalk and curbs in areas currently without them. Perform a minor relocation of one horizontal curve. Install new drainage facilities as required. Relocate affected water and sanitary sewer lines as required. A portion of the roadway from Noble St to Maple Ave is proposed to be turned back to the borough upon completion of the project. Upon completion of the project sidewalk will be in place from Grandview Hospital to the borough center.

Final Version

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

**MPMS# 13240**      *Old Bethlehem Road Bridge Over Kimples Creek SR:4101*

**LIMITS:** Over Kimples Creek

Est Let Date: 3/16/2023

**IMPROVEMENT** Bridge Repair/Replacement

**NHPP:** N

**MUNICIPALITIES:** Haycock Township

**FC:** 7

AQ Code:S19

**PLAN CENTER:**

IPD: 12

**PROJECT MANAGER:** Plans/S. Hasan

**CMP:** Not SOV Capacity Adding

The project consists of replacing 16' wide weight restricted 13 ton posted bridge over Kimples Creek with a 28' wide bridge with two 11' lanes and 3' shoulders on new alignment. Due to the impacts on emergency services, a temporary roadway and bridge would be required and due to the impacts of the temporary facilities on the wetlands constructing the bridge on a new alignment is the most feasible alternative. As part of the project a wetlands mitigation site will be constructed to mitigate the impacts to the existing wetlands. The existing bridge is posted for 13 tons, shows signs of rapid deterioration, is only 1 lane wide, and has only 111 feet of stopping sight distance. Additionally the horizontal alignment of Old Bethlehem Road north and south of the bridge consists of a series of sharp horizontal curves with substandard sight distance and radii. There is evidence of utility poles being struck.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

# DVRPC FY2023-2026 TIP for PA

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

**MPMS# 13440**      **Allentown Road and PA 663 Bridges (2) Over Licking Creek SR:0663**

**LIMITS:** Over Licking Creek

Est Let Date: 3/14/2024

**IMPROVEMENT** Bridge Repair/Replacement

**NHPP:** Y

**MUNICIPALITIES:** Milford Township

**FC:** 14; 16; 17

AQ Code:S19

**PLAN CENTER:**

IPD: 13

**PROJECT MANAGER:** TSS/H. Freed

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 14G

The project includes the replacement of 2 bridges: one carrying PA 663 over Unami Creek, and one carrying Allentown Road Bridge over Licking Creek. The replacement of the PA 663 Bridge over Unami Creek will be designed for sufficient width to accommodate staged traffic control during construction of the roadway widening. The structure will also be designed to be able to accommodate structural and hydraulic considerations for future widening to a five-lane section. This project also includes the widening of Allentown Road at the S.R. 0663 intersection to accommodate a two-lane section with a left turn lane on the southbound approach as well as the turning movement requirements for the WB-50 design vehicle with the minimum approach work possible. The northbound approach will be designed for a minimum two-lane section with the possibility of a left turn lane investigated; the replacement of the existing traffic signal equipment at the PA 663 intersection with Allentown Road and revisions to the traffic signal phasing and timing to improve operational inefficiencies, and the reconstruction of the existing pavement within the project limits.

All work on PA 663 and Allentown Road will be reduced in length from the original design to that which is necessary to meet required left turn lane and taper lengths and hydraulic considerations for the Unami Creek Bridge and Licking Creek Bridge. It is anticipated that approximately 2,420 feet of PA 663 and approximately 600 feet of Allentown Road will be reconstructed.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

**MPMS# 13549**      **US 1 (Bridges) Design (Section 03S) SR:0001**

**LIMITS:** PA 413 - PA Turnpike

No Let Date

**IMPROVEMENT** Roadway New Capacity

**NHPP:** Y

MRPID:37

**MUNICIPALITIES:** Bensalem Township; Middletown Township

**FC:** 12; 14

AQ Code:2025M

**PLAN CENTER:**

IPD: 12

**PROJECT MANAGER:** TSS/S. Hasan

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4A, 5I

This is the design parent for a roadway reconstruction and widening and bridge improvement project that involves 5.3 miles of roadway, four (4) interchanges, ten (10) bridge structures and six (6) retaining walls. The project includes the addition of a third through travel lane in each direction between the Street Road interchange and the Pennel interchange (Business Route 1) and the addition, modification, or upgrading of auxiliary lanes in each direction for the S.R. 8017 (Street Road), S.R. 8019 (PA Turnpike), S.R. 8055 (Neshaminy/Rockhill Drive), and S.R. 8067 (Pennel/Business Route 1) interchanges. The project includes improvements at the Street Road, the PA Turnpike and the Neshaminy (Rockhill Drive) interchanges to coordinate with proposed development as well as the investigation into pedestrian walkways and transit stops along Rockhill Drive. Also included in the project are guide rail upgrades, drainage improvements, signage improvements, additional traffic signalization along with evaluation of existing signal timings, and noise wall evaluation throughout the project limits.

The proposed structure improvements include the replacement of eight (8) bridges, rehabilitation of one (1) bridge, the removal of one (1) bridge, the construction of six (6) retaining walls and the potential construction of two (2) noise walls. The bridges to be replaced are those which carry S.R. 0001 over S.R. 0132 (Street Road) (1B), I-0276 (the PA Turnpike) (9B), the PA Turnpike (Ramps I and J) (2B), S.R. 2044 (Rockhill Drive) (4B), Neshaminy Creek (5B), and Business Route 1 (6B) and the CSX and SEPTA rail lines. The bridge which carries S.R. 2025 (Bristol Road) over Route 1 (10B) and the bridge that carries West Interchange Road over S.R. 0001 (11B) are also to be replaced. The bridge that is to be removed (3B) currently carries S.R. 0001 (Route 1) over a closed private access road. The rehabilitated bridge carries S.R. 0001 over Highland Ave. (S.R. 2008).

See MPMS 93444, 93445, and 93446 for the construction sections.

The reconstruction and widening project minimizes impacts to the community by avoiding archaeological resources at Neshaminy Creek while improving safety and mobility. Additionally, this alternative avoids historic resources such as the Philadelphia Water Company, the Roosevelt Cemetery and the Railroad.

Project CMP (Congestion Management Process) commitments are currently under development.

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

**MPMS# 13635**      **Oxford Valley Road/Lincoln Highway Intersection Improvements SR:2029**

**LIMITS:** At US 1 and Bristol/Levittown Parkway

Est Let Date: 6/20/2024

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:**

**MUNICIPALITIES:** Falls Township; Middletown Township

**FC:** 16; 17

AQ Code:R1

**PLAN CENTER:** Suburban Center

IPD: 19

**PROJECT MANAGER:** EE/J. Brown

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 4A, 5I

The proposed scope of work includes the reconstruction of N. Oxford Valley Road (SR 2029) as it approaches the Lincoln Highway (SR 2037) intersection from the north and south, in Falls and Middletown Townships, Bucks County, PA. Bristol-Oxford Valley Road (SR 2029) will be re-aligned to intersect N. Oxford Valley Road (SR 2053) to form a new signalized intersection across from the Oxford Point Shopping Center. The project limits extend along SR 2029 1,200 to the south of Lincoln Highway (SR 2037), and 750 to the north of Lincoln Highway (SR 2037). The project limits along SR 2053 begin at the new re-aligned intersection with SR 2029 and extend 383 to the south. The project limits along SR 2037 extend 1,017 to the west of SR 2029, and 930 to the east of SR 2029.

Improvements at the intersection of Oxford Valley Road (SR 2029) and Lincoln Highway (SR 2037) include widening of both roadways for dual left-turn lanes at all 4 (four) approaches to the intersection, and for a northbound right-turn lane. The project includes modification of curb radii and concrete islands, new curb, sidewalk, and ADA compliant curb ramps. The existing traffic signals and mast arms will be replaced, and new drainage structures such as inlets, manholes, and pipes will be installed throughout the project limits. Traffic signal improvements will include signal optimization, emergency pre-emption, and video detection. No structures are included with this project.

**MUNICIPALITIES:** Tinicum Township

**FC:** 8

AQ Code:S19

**PLAN CENTER:**

IPD: 11

**PROJECT MANAGER:** HNTB/N. Velaga

**CMP:** Not SOV Capacity Adding

This project involves rehabilitating or replacing the Headquarters Road Bridge over Tinicum Creek in Tinicum Township, Bucks County. This bridge is poor condition, functionally obsolete, and currently closed to traffic due to its deteriorated condition. The bridge is a contributing resource to the Ridge Valley Rural Historic District which is listed in the National Register of Historic Places. A final alternative for bridge rehabilitation or replacement is determined upon completion of the review process required by the National Environmental Policy Act (NEPA) and its supporting regulations.

The existing structure is an 80' long, three-span concrete-encased steel stringer bridge with stone masonry abutments and piers over Tinicum Creek. No utility conflicts are anticipated.

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

**MPMS# 13727** *Bristol Road Intersection Improvements SR:2025*

**LIMITS:** PA 513/Hulmeville Road to Old Lincoln Highway

Est Let Date: 12/16/2021

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:** N

**MUNICIPALITIES:** Bensalem Township

**FC:** 16

AQ Code:R1

**PLAN CENTER:**

IPD: 18

**PROJECT MANAGER:** HNTB/G. Gumas

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 4A, 5I, 12A

The proposed roadway widening project is an approximately a 2.3 mile section of SR 2025 (Bristol Road) and the typical section will include two 11-foot travel lanes, an 11-foot center left-turn lane and 2-foot shoulders. The proposed shoulder improvements will be full-depth installations. Resurfacing of the existing roadway is proposed throughout the project limits. Secondary roads access Bristol Road by way of both signalized and non-signalized intersections. Signalized intersections with Bristol Road include: Old Lincoln Highway, Grandview Avenue/Neshaminy Mall entrance, Galloway Road/Elfin Avenue, Third Avenue/Richlieu Road, Bensalem Boulevard and Pasqualone Boulevard. Reconstruction is proposed for each signal, including ADA ramps and pedestrian signals. Included in the intersection improvements are additional left and right turning lanes throughout the corridor consisting of left turn lanes at the intersections of Bristol Road at Old Lincoln Highway and Richlieu Road; right turn lanes at the intersections of Bristol Road at Old Lincoln Highway, Neshaminy Boulevard, Galloway Road and Richlieu Road. Land use along Bristol Road is primarily commercial and mixed residential. Additional improvements include the re-alignment of Bristol Road at the intersection of Third Avenue/Richlieu Road to improve the horizontal alignment of the segment for improved sight distance.

There are existing sidewalks within the project limits and will be replaced in-kind upon any impacts due to the widening. New sidewalks and ADA ramps are proposed along the corridor from Neshaminy Mall to Richlieu Road. As a result of the improvements to SR 2025, approximately 65 parcels will be affected by either required ROW takes and/or temporary easements throughout the limits of the project. Also, included under this project are several tracks of land identified to be deeded to PennDOT from Bensalem Township.

The project limits overlap a private development that is proposed along the Westside of Bristol Road directly across from Bensalem Boulevard. This work has been completed under an HOP contract by a private development entity.

In Philadelphia and Bucks Counties, funds will be used for the continuation of SEPTA's shuttle bus operations between the Cornwells Heights SEPTA Station and adjacent PENNDOT Park and Ride lot. This service serves as a CMP (Congestion Management Process) commitment for I-95 reconstruction projects.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's annual memoranda on supplemental strategies for details related to this project.

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

MPMS# 64778 State Road SR:2002

LIMITS: Elm Street to Neshaminy Creek

Est Let Date: 12/12/2024

IMPROVEMENT Roadway Rehabilitation

NHPP:

MRPID:248

MUNICIPALITIES: Bristol Township

FC:

AQ Code:S10

PLAN CENTER:

IPD: 14

PROJECT MANAGER: EE/J. Brown

CMP: Not SOV Capacity Adding

The project is located in Croydon, within Bristol Township, Bucks County. The scope of the project entails full depth pavement reconstruction for approximately 2.2 miles of SR 2002 (State Road) from the bridge crossing the Neshaminy Creek (eastern abutment) to the intersection with SR 0413 (New Rodgers Road).

The main purpose of the State Road Rehabilitation Project is to repair/replace the existing deteriorated pavement and to improve stormwater drainage. Curbing (to control and provide safe access and manage drainage), shoulder widening, addition of left turn lanes at State Road and Cedar Avenue (SR 2011) and traffic signal upgrades are also proposed.

Specifically, the existing 11-foot travel lanes will be widened to a 14-foot eastbound lane and a 12-foot westbound lane/8-foot parking lane (curb both directions) for the western 1.6 miles. Further east, the roadway will be widened to a 12-foot lane with 8-foot shoulder each direction. Adjustments to cross slopes and vertical profile will improve drainage.

**MUNICIPALITIES:** Newtown Township

**FC:** 16

AQ Code:S19

**PLAN CENTER:**

IPD: 14

**PROJECT MANAGER:** EE/J. Arena

**CMP:** Not SOV Capacity Adding

This project involves the rehabilitation of a single span concrete non-composite adjacent box beam bridge carrying S.R. 2036 (Swamp Road) over an unnamed tributary to Neshaminy Creek in Newtown Township, Bucks County, PA. The bridge is located between the entrance to the Nob Hill Residential Development and the western entrance to the Bucks County Community College. The Historic Temora Farm Property is located on the north side of the bridge and roadway and the Tyler Run State Park is on the south side. Stone retaining walls extend east and west of the existing bridge along the northern side of the roadway. A driveway is located northeast of the bridge providing access to the Temora Farm. A small structure integral with the walls along the roadway carries this driveway over a branch of the creek.

The superstructure of the existing bridge was replaced with a non-composite superstructure under an emergency contract in 2007. The existing bridge has a single 28 foot span and a clear roadway width of 23.5 feet.

This proposed project will rehabilitate the existing non-composite bridge superstructure with the installation of composite bridge deck maintaining the existing 23.5 clear roadway width. The existing stone masonry walls northwest and northeast of the bridge will be replaced. The Temora Farm driveway drainage structure will be replaced in conjunction with the wall replacement.

The goal of this project is to complete the work described above with as minimal disturbance to the surrounding area as possible. In order to achieve this goal, the horizontal and vertical alignment of the bridge will be maintained. Roadway reconstruction will be limited to immediate roadway within the limits of the approach to rehabilitated bridge deck and to new walls and driveway drainage structure. Guide rail, signing, and pavement markings will be updated as well. During construction, traffic will be maintained utilizing a detour.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

**CMP:** Not SOV Capacity Adding

This project is in Bucks County, Milford Township, on Rosedale Road (SR 4059) over a Branch of Unami Creek. The project involves two bridges on Rosedale Road (SR 4059) that are approximately 350 -feet apart. The first bridge is a single span reinforced concrete slab structure with a span length of 13- feet (BARKY 7433). The second bridge is a single span reinforced concrete stringer/girder structure with a span length of 29-feet (BARKY 7434).

The project involves the removal and replacement of the first bridge (BRKEY 7433), rehabilitation or replacement of the second bridge (BARKY 7434), reconstruction of the approach roadways and the roadway between the two structures, drainage improvements as needed, and installation of new guide rail as required.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 5I

This project provides a component of the East Coach Greenway and will provide for safe, direct trail passage on the towpath. A 12' x 140' tunnel is to be placed under the CSX spur line to accommodate an 8' wide multi-use trail with 8' vertical clearance by a Structural Steel Tunnel Liner Plate System, linking to the existing towpath trail on either side of the Railroad.

This project is part of The Circuit. The Circuit is a 750-mile interconnected network of multi-use trails spanning Greater Philadelphia with Philadelphia and Camden as its hub, and is included in DVRPC's Long-Range Transportation Plan. Circuit trails will generally meet minimum design standards (10-foot wide, paved, and separated from traffic) to reflect their intended use as the arteries of a dedicated regional non-motorized transportation system. Circuit trails located near and connecting to downtown Philadelphia are already used heavily for transportation purposes, and the implementation of the network will further encourage the surging growth of bicycle commuting in the region. At 2.3%, Philadelphia has the highest bike-to-work percentage of the 10 largest cities in the country according the 2013 American Community Survey.

**FC:**

AQ Code:X12

**PLAN CENTER:**

IPD: 14

**PROJECT MANAGER:** HNTB/N. Velaga

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 4A

The proposed structure will be a single span pre-stressed concrete adjacent box beam bridge for the Aqueduct and a pre-stressed concrete adjacent box beam bridge for the Tow Path.

The existing Delaware Canal Aqueduct and Tow Path Bridge are located over Brock Creek in Delaware Canal State Park, Yardley Borough. The Delaware Canal runs in a northwest to southwest direction through Yardley, almost parallel to Main Street. The Aqueduct is just northwest of the crossing of S.R. 332/Afton Avenue and carries the Delaware Canal over Brock Creek. At the project location, the Delaware River flows parallel to the Delaware Canal approximately 1000 feet northeast of the site.

The existing Aqueduct is a single span reinforced concrete u-slab, having a 24-inch depth, with reinforced concrete abutments and wingwalls. The existing tow path bridge is a single span reinforced concrete arch located on the same substructure as the aqueduct, although it appears to have been constructed at different times. Both of the structures have a clear span of 27.3' and are located on a skew of approximately 61° to Brock Creek. The structures of interest are located in a very flood prone location. It is believed that the low under clearance and short span of the existing aqueduct coupled with debris further reducing the hydraulic opening is the primary reason for flooding.

**CMP:** Minor SOV Capacity

This project will construct multiple pedestrian and roadway improvements along Durham Rd, (S.R. 0413), Stoopville Rd, (S.R. 2028), Eagle Rd. (a township road), Washington Crossing Rd. (S.R. 0532), and Highland Rd. (a township road) from the Stoopville Rd./Durham Rd. (S.R. 0413) intersection to the village of Dolington along Washington Crossing Rd. (S.R. 0532). Proposed improvements include:

- (1) Traffic control and gateway signs and painting of stop bars along Washington Crossing Rd. from the Washington Crossing Rd./Dolington Rd. intersection to village of Dolington;
- (2) 6' wide pedestrian walking path along the north side of Stoopville Road from east of Rosefield Drive to Eagleton Farms Road/Hemlock Drive; along the south side of Stoopville Road from Eagleton Farms Road/ Hemlock Drive to Eagle Road; continuing along the west side of Eagle Road to Marigold Drive; along the north side of Stoopville Road from Creamery Road to the intersection of Stoopville Road/ Washington Crossing Road; and continuing along the north side of Washington Crossing Road to Highland Road will be completed; the pedestrian walkway will require the extension of an existing pipe culvert beneath Stoopville Rd. between Highland Rd. and Creamery Rd. to allow the walking path to cross over the tributary;
- (3) Decorative crosswalks and ADA-compliant curb ramps at 3 intersections: (1) Eagleton Farms Rd./Stoopville Rd.; (2) Stoopville Rd./Washington Crossing Rd.; and (3) Highland Rd./Washington Crossing Rd.;
- (4) New traffic signal and widening at the Durham Rd./Stoopville Rd. intersection to provide a left turn lane at the Durham Rd./Stoopville Rd. intersection for vehicles traveling on southbound Durham Rd. to eastbound Stoopville Rd.;
- (5) Modification to the existing signal at the Highland Rd./Washington Crossing Rd. intersection to accommodate a right-turn lane on Highland Rd. and improvements that will provide for both left and right turn lanes for vehicles travelling southbound on Highland Rd. to Washington Crossing Rd.;
- (6) Relocation of utility poles.

The first phase (S.R. 2028, Section ECF) was constructed in June 2010 (see MPMS #84096). This project has \$254,000 earmark funds remaining from a 2008 Appropriations Bill (PA ID #710).

This project involves bridge rehabilitation or replacement of state bridge over a Tributary of the Delaware River on River Road between Laurel Road and Paxson Road in Solebury Township. It is a poor condition bridge breakout project from MPMS #88706. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

## Pennsylvania - Highway Program (Status: TIP)

### Bucks

**MPMS# 93445**      **Route 1 Improvement-North (Section RC2)**

**LIMITS:** Route 1 - Neshaminy and Penndel Interchanges, Bucks County

Actl Let Date: 1/14/2021

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:** Y

MRPID:37

**MUNICIPALITIES:** Bensalem Township; Middletown Township

**FC:** 12; 14; 17

AQ Code:2035M

**PLAN CENTER:**

IPD: 18

**PROJECT MANAGER:** TSS/S. Hasan

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4A, 5I

The S.R. 0001 Group 03S Section RC2 project, located in Bensalem and Middletown Townships, Bucks County, PA, extends from a point just south of the Neshaminy Interchange to just south of S.R. 2045 (Old Lincoln Highway), a distance of 1.5 miles. The project encompasses reconstruction and widening of S.R. 0001, including: upgrading 2 interchanges S.R. 8055 (Neshaminy) and S.R. 8067 (Penndel); and reconstruction of 3 bridges. The improvements for this section of S.R. 0001 are as follows:

- Widening of S.R. 0001 median width to meet current design criteria.
- Raising the S.R. 0001 profile from just south of the Neshaminy interchange to north of the Neshaminy interchange to improve vertical clearances for the S.R. 0001 structure over S.R. 2044 (Rockhill Drive).
- Adding a third travel lane along S.R. 0001 in each direction from just south of the Neshaminy interchange north to the Penndel interchange.
- Adding an auxiliary lane along S.R. 0001 in both the northbound and southbound directions between the PA Turnpike interchange and Neshaminy interchange.
- Reconfiguring the Neshaminy interchange to relocate the ramp from Rockhill Drive to S.R. 0001 northbound from the northeastern quadrant of the interchange to the southeastern quadrant as a loop ramp, eliminating the left turn movement immediately west of the existing Neshaminy Mall traffic signal. Improving the geometry of the interchange ramps, where feasible. Modification to both existing signalized intersections on Rockhill Drive to improve traffic flow into and out of the Neshaminy Mall and the Horizon Corporate Center.
- North of the Neshaminy interchange, adding/lengthening auxiliary (acceleration and deceleration) lanes along S.R. 0001 in both the northbound and southbound directions for ramps to and from Rockhill Drive.
- Structure improvements include the replacement of 3 existing bridges, the construction of 5 retaining walls and the possible construction of 1 noise wall. The existing bridges to be replaced are those that carry S.R. 0001 over Rockhill Drive, Neshaminy Creek, and Business Route 1 and the CSX and SEPTA rail lines.
- S.R. 0001 southbound will be realigned across Neshaminy Creek to allow traffic to be maintained on the existing bridge during construction of the proposed structure on new alignment. Traffic will be switched to the new S.R. 0001 southbound structure during demolition of the existing bridge and construction of the proposed S.R. 0001 northbound structure. Similarly, S.R. 0001 northbound will be realigned across the CSX/SEPTA Railroad and Business Route 1 to allow traffic to be maintained on the existing bridge during construction of a new S.R. 0001 northbound structure. Traffic will be switched to the new S.R. 0001 northbound structure during demolition of the existing bridge and construction of the proposed S.R. 0001 southbound structure.
- Pedestrian walkways and transit stops along Rockhill Drive will be investigated.
- This project will include upgrades to guiderail, drainage improvements and signage improvements.
- The reconstruction and widening project minimizes impacts to the community by avoiding archaeological resources at Neshaminy Creek while improving safety and mobility. Additionally, this project avoids historic resources such as the Philadelphia Water Company and the Railroad.

Project CMP (Congestion Management Process) commitments include signal improvements, sidewalks and other improvements for pedestrians, investigation of new bus stops and enhanced bus services in consultation with SEPTA, safety improvements including increased speed enforcement, and outreach to employers to promote transportation demand management strategies. See DVRPC's 2013-2014 memorandum on supplemental strategies for details related to this project.

Design Parent is MPMS #13549. Route 1 Improvements Southern section RC1 is MPMS #93444. Route 1 Frontage section RC3 is MPMS #93446.

AQ Code:S10

**PLAN CENTER:**

IPD: 19

**PROJECT MANAGER:** TSS/S. Hasan

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4A, 5I

The S.R. 0001 Group 03S Section RC3 project extends from the northern end of the S.R. 0001 bridge over the CSX railroad to approximately 700 feet north of the S.R. 0413 (PA 413/Pine Street) bridge over S.R. 0001, a distance of 2.5 miles. This project includes the 2.0 mile +/- segment of frontage (service) road corridor.

The S.R. 0001 Group 03S Section RC3 project includes Resurfacing, Restoration and Rehabilitation (3R) improvements to S.R. 0001 and the frontage roads, reconstruction of 1 bridge (West Interchange Road over S.R. 0001), and the rehabilitation of 1 bridge (S.R. 0001 over S.R. 2008). The primary proposed improvements for this section of S.R. 0001 are as follows:

- Widening of S.R. 0001 median width from 4' to 10' to meet current design criteria.
- Replacement of 12,100 ft. of existing double-face guide rail median barrier and 985 ft. of existing concrete median barrier with concrete glare screen.
- Removal of existing raised concrete islands separating the mainline S.R. 0001 travel lanes from the frontage road to be replaced with 12'-0" paved outside shoulders along the mainline travel lanes and concrete median barrier between the proposed mainline outside shoulder and the frontage road.
- Closing the existing intermediate crossovers between the mainline S.R. 0001 travel lanes and the frontage roads.
- Updating the overhead guide signage for the project corridor due to the revised frontage road access and for coordination with the S.R. 0001 Sec. RC1, RC2 and LHB projects.
- Relocating the existing ITS infrastructure, including conduit throughout the corridor and ITS CCTV camera assembly, communications cabinets and VD sensor assemblies that are supported by the affected overhead guide signs.
- Lengthening of the acceleration lanes from the frontage roads onto S.R. 0001 in the northbound and southbound directions to meet current design criteria.
- Relocating the existing roadway inlets along the existing double face median guide rail and existing raised concrete traffic islands to along the proposed concrete glare screen and proposed concrete median barrier.
- Structure improvements include the replacement of one existing functionally obsolete bridge (West Interchange Road over S.R. 0001) along the existing horizontal alignment and the rehabilitation of one bridge (S.R. 0001 over S.R. 2008) including superstructure replacement.

Design Parent is MPMS #13549

Bucks County Bridge #54 is a single span, concrete encased, steel I-beam bridge that is approximately 33 feet long. Originally built in 1912, it is currently weight-restricted to 7 tons. The bridge is poor condition as a result of the poor condition of the substructure, due to undermining of the near and far abutments. The bridge railing does not meet current standards and the approach guiderail also requires updating to current standards. Work to be performed includes the complete replacement of the bridge and associated approach improvements.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

**MUNICIPALITIES:** Bristol Township

**FC:**

AQ Code:2035M

**PLAN CENTER:**

IPD: 16

**PROJECT MANAGER:** EE/J. Arena

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 4B, 12A

As a preliminary step to address congestion and safety issues caused by the antiquated design of the interchange of I-95/US 13/PA 132 (Street Road), the existing intersection will be modified with an operational improvement to provide direct, one-way access to I-95 southbound from the US 13/PA 132 (Street Road) intersection by re-routing traffic from the Street Road off-ramp from eastbound Street Road to I-95 southbound via a direct connection to the I-95 southbound on-ramp. All movements of the interchange are currently provided to access I-95 northbound and southbound, but this reconfigured movement will reduce congestion, improve operational efficiency and system reliability, and eliminate unsafe traffic movements at this heavily trafficked intersection on Street Road at the I-95 southbound entrance.

The proposed scope of this project include:

- Road diet of Lincoln Highway (SR 2037) from Lincoln Avenue to Durham Road (SR 0413)
- Addition of exclusive left-turn lane(s) at the following intersections:
  - o Lincoln Highway/Lincoln Avenue (westbound LTL)
  - o Lincoln Highway/Bellevue Avenue (eastbound/westbound LTLs and northbound/southbound LTLs)
  - o Lincoln Highway/Durham Road (westbound LTL)
- Prohibit eastbound Lincoln Highway (SR 2037) left-turn movements at Durham Road (SR 0413)
- Increase southbound Durham Road (SR 0413) left-turn lane storage at Lincoln Highway (SR 2037)
- Intersection control modification at Bellevue Avenue (SR 0413) and Durham Road (SR 0413)
- Modification of left-turn signal phasing at Lincoln Highway/Bellevue Avenue and Lincoln Highway/Durham Road signalized intersections
- Upgrade pavement markings and delineation within project limits
- Install high-visibility crosswalk markings at intersections within project limits
- Modernize signals along corridor, including interconnect with fiber optic and connection for accessibility from PennDOT Regional Traffic Management Center

MUNICIPALITIES: Parkesburg Borough

FC:

AQ Code:S19

PLAN CENTER: Rural Center

IPD: 16

PROJECT MANAGER: TSS/GANNETT/S. New

CMP: Not SOV Capacity Adding

CMP Subcorridor(s): 7E

The existing bridge on West Bridge Street in the Borough of Parkesburg, which is in poor condition and functionally obsolete, will be replaced. The structural deterioration advanced to the point that the bridge was no longer able to safely carry vehicular loads. The bridge was closed to traffic in 1994. In addition to the vehicular restriction, both sidewalks are restricted from use due to the severe deterioration of the wooden deck. The existing roadway width of 5.8 meters (19.0 ft) contains two travel lanes and no shoulders. This bridge will be replaced with a two lane bridge with minimal shoulders and sidewalks on both sides. The bicycle and pedestrian checklists have been incorporated into the project.

**FC:**

AQ Code:S19

**PLAN CENTER:** Town Center

IPD: 1

**PROJECT MANAGER:** TSS/GANNETT/S. New

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 7E

The proposed project involves the replacement of a 4-span steel girder bridge, with minimal shoulders, with a minor improvement to the vertical crest which spans over active AMTRAK, CSX and Norfolk Southern rail lines in East Caln Twp. & the Borough of Downingtown, Chester County, PA. The new bridge will be on the same alignment and includes approximately 600 ft. of approach roadway reconstruction to provide vertical clearances over railroad tracks.

The existing bridge has a load limit of 16 tons, except combination loading is 30 tons. The 25 ft. clear roadway width is too narrow for two vehicles, and the steel girders extending above the deck surface create a hazard. The structure was recently closed because sections of concrete were falling off the bridge. The superstructure and substructure both have a poor condition rating. The structure has a sufficiency rating of 52. In addition, the salt contamination of the concrete over the years from salting of the highways in the winter does not support rehabilitation of this structure.

This bridge is part of PA Bicycle Route "L." The bicycle and pedestrian checklists will be incorporated into the project.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 7E, 7F

This project serves as the preliminary design phase of a project to reconstruct approximately 14 miles of mainline pavement; potential addition of through lanes and operational improvements as required by traffic analysis for the eastern section; reconstruction and widening of the mainline shoulders; replacement and widening of mainline bridge superstructures; construction of new ramps (to complete partial interchanges at Airport Road); reconstruction, realignment, and lengthening of all on and off ramps (to provide storage length for traffic signals and ramp metering); reconstruction of arterial overpasses; installation of ITS elements (dynamic message signs, closed circuit television, incident detection, and ramp meters); and minor improvements to parallel arterial routes (to be determined) to improve safety, reduce congestion, and upgrade deteriorating infrastructure. This project is for preliminary design only; final design, utility, right of way, and construction phases are identified in MPMS #87781 (Eastern section) and MPMS #84884 (Western section; 2013 estimated cost is \$250 million). Additional study work will be undertaken under this MPMS # to determine the appropriate approach to address new capacity and operational needs of the eastern section, as well as the western section as needed. The full length of the corridor is located in West Sadsbury Township, Sadsbury Township, Valley Township, Coatesville City, West Caln Township, Caln Township, East Caln Township, and Downingtown Borough.

Earmarks--SAFETEA DEMO #3172, PA ID# 504 - \$0 remaining; PA ID #146- \$0 remaining.

The overall corridor construction cost estimate is \$784 million.

This project will look to replace the existing bridge on North Valley Road (SR1005) over Amtrak/SEPTA (BMS # 15-1005-0080-1331 adjacent to the Paoli Train Station) with a new bridge across from the intersection of Lancaster Avenue and Darby Road. It is being planned as one element of the Paoli Intermodal Transportation Center, which would upgrade Chester County's most utilized train station which currently serves Amtrak, SEPTA's Paoli/Thorndale Regional Rail Line, as well as various bus routes.

See MPMS #60574 for transit components of the Paoli Transportation Center. The North Valley Road Bridge is functionally obsolete and has substandard vertical geometry.

The scope of work for this project was developed from the Road Safety Audit which was conducted in November 2006 and undertaken by DVRPC in conjunction with the Pennsylvania Department of Transportation. The purpose of this project is to reduce the number of crashes and related injuries and severity of the crashes which occur along the approximate five mile section of PA Route 896, between Elbow Lane in London Britain Township and Shepherd Lane in New London Township. This project will include: Increasing the lane width and shoulder width along PA Route 896; removing severe vertical crests at select locations; installing left turn lanes at select intersections; constructing a roundabout at the PA Route 896/PA Route 841 intersection; modifying the geometry at select intersections; improving drainage along PA Route 896; repaving PA Route 896 with pavement reconstruction at selection locations; relocating select utility poles; installing appropriate signage along PA Route 896; installing raised pavement markers (RPM), delineators, and rumble strips along PA Route 896. Estimated total project cost is \$13,800,000. PE (\$2,500,000 estimate), FD (\$2,800,000 estimate), ROW (\$1,500,000 estimate), UTL (\$500,000 estimate), and CON (\$6,500,000 estimate).

IPD: 17

**PROJECT MANAGER:** TSS/S. Fellin

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 7E

This project provides for the final design, right-of-way, utility and construction phases of the Coatesville-Downingtown Bypass Reconstruction - eastern section - by reconstructing and widening the mainline shoulders; replacing and widening the mainline bridge superstructures; constructing new ramps (to complete partial interchanges ); reconstructing, realigning, and lengthening all on and off ramps (to provide storage length for traffic signals and/or ramp metering); and reconstructing arterial overpasses.

The overall corridor construction cost estimate is \$784 million. MPMS# 14532 provides for the preliminary design portion of this project and the western section, as well as additional study work to determine the approach for this eastern section. MPMS #s 107551, 107553, and 107554 contains the construction of the western section, originally housed under MPMS# 84884.

Project CMP (Congestion Management Process) commitments include expansion of Intelligent Transportation Systems (ITS) equipment throughout the corridor, signal improvements on parallel arterials, numerous improvements to rail transit stations and services in consultation with SEPTA and Amtrak, improved access to rail stations, sidewalks and other improvements for pedestrians and bicyclists on parallel arterials, investigation of park-and-ride locations, and outreach to employers to promote transportation demand management strategies. See DVRPC's 2016-2017 memorandum on supplemental strategies for details related to this project.

\$125.353M out of an estimated \$582M (2021 CON estimate of \$459.65M YOY'd to FY29) is programmed for construction beginning in FY29. The construction balance that is not shown in FY29-FY34 is in the Long-Range Plan.

CMP Subcorridor(s): 7D, 8C

This project involves the rehabilitation of the Route 202 bridges spanning Amtrak located just south of the S.R. 0202/US 30 Exton Bypass Interchange in West Whiteland Township. The proposed work consists of full deck replacement including new expansion joints, parapets, scuppers, downspouts, and approach guide rail transitions. Additional work includes new approach slabs; painting steel girders, as needed; repair of pier caps (Piers 3 and 5) and abutment stems (far abutment), as needed, and steel girder retrofits and/or strengthening details, localized re-grading, replacement of the slope wall in front of the near abutment, and replacement of the existing concrete crib wall along Dunwoody Drive. Also included in this project is the relocation of a section of fiber optic cable and the replacement of four (4) existing DMS (panels only) to be functionally consistent with other LED signs along the corridor.

This project is a breakout of US 202, Section 320 and 330 (MPMS #64494).

Construction of a roundabout is anticipated at this location. The project will provide a safe and efficient means of accommodating the regional movement of people, goods and services and to provide for local access connections to support the existing community and businesses in the village of Chatham. Currently, the intersection of PA 41 & PA 841 has a confusing layout, traffic is forecasted to operate in LOS E on the PA 841 approaches to the intersection in the design year (2035), and there are limited pedestrian accommodations.

Pursuant to the completion of a needs assessment in 2014, an alternatives analysis, identified ten alternative concepts. Five of these alternatives were selected for additional evaluation. A preferred alternative for this intersection will be determined, which may take several years due to the complexity of the engineering solutions and environmental features and impacts. An improvement study of Chatham village recommended a gateway treatment on PA 41 that would support many of the short-listed alternatives. This gateway project is a companion project, MPMS #105755.

**FC:**

AQ Code:2025M

**PLAN CENTER:**

IPD: 13

**PROJECT MANAGER:** TSS/S. Fellin

**CMP:** Minor SOV Capacity

Construction of a roundabout is anticipated at this location. Improvements will provide an opportunity for all users to make safe movements at the four-way PA 41/PA 926 intersection that is currently skewed at approximately 23 degrees, as well as accommodate future traffic demands. Presently, traffic control consists of stop signs on the minor street (PA 926) approaches, with no posted turn restrictions. The approaches of PA 41 consists of one left turn lane and one shared through/right turn lane, while the approaches of PA 926 consists of a single shared left turn/through/right turn lane. After the completion of a needs assessment in 2014, an alternatives analysis identified four alternatives; three of these alternatives (including two alternatives that contain a roundabout) were selected for further evaluation.

PE activities are being completed under MPMS# 14484.

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 7E

The proposed Octorara Trail (SR 0010)/Lincoln Highway (Business US 30) Interchange project (US 30, Section 010) is being undertaken in conjunction with corridor wide improvements planned for the 14.5-mile US 30 Coatesville – Downingtown Bypass. The project extends along US 30 from approximately 1,250 feet west of SR 10 in West Sadsbury Township to approximately 1,500 feet east of the highway's bridge over Old Mill Road in Sadsbury Township. Planned work will consist of the full reconstruction of US 30 to upgrade the existing roadway which is approaching the end of its serviceable life. Reconfiguration of the interchange with Business US 30 will be considered to address the existing nonconventional split of the two roadways. The project will also address deficient median conditions, shoulder widths and the functionally obsolete bridges (Business US 30 over EB US 30 and US 30 over Old Mill Road) within the project limits. The addition of turning lanes at the SR 10 intersection will be made to improve movement through the intersection.

This is a breakout of MPMS #84884

CMP Subcorridor(s): 7E

The planned Airport Road Interchange project (US 30, Section AIR) is being undertaken in conjunction with corridor wide improvements planned for the 14.5-mile US 30 Coatesville – Downingtown Bypass. The project extends along US 30 from approximately 1,500 feet east of the highway’s bridge over Old Mill Road in Sadsbury Township to approximately 0.2 miles east of Wagontown Road in Valley Township. Planned work will consist of the full reconstruction of US 30 to upgrade the existing roadway which is approaching the end of its serviceable life. The Airport Road interchange will be reconfigured to address the short acceleration/deceleration ramp lengths and add the missing westbound entrance and eastbound exit ramps. As part of the interchange reconfiguration turning lanes will be added to Airport Road and West Highland Boulevard will be relocated to align with Highland Boulevard/Airport Road intersection. The project will also address deficient median conditions, shoulder widths and the functionally obsolete bridges (Airport Road over US 30 and US 30 over Wagontown Road) within the project limits. No additional travel lanes are proposed for any of the project roadways

This is a breakout of MPMS #84884

IPD: 22

PROJECT MANAGER: EE/J. Brown

CMP: Minor SOV Capacity

CMP Subcorridor(s): 5A

This project is located in the village of Toughkenamon in New Garden Township, Chester County. This project will improve safety by realigning the northern leg of Newark Road at Baltimore Pike and upgrading and modernizing the traffic signal, including pedestrian signals and emergency preemption. Dedicated left-turn lanes on all four approaches, as well as a right-turn lane from northbound Newark Road to eastbound Baltimore Pike will be installed. Turning radii will be widened to accommodate trucks and larger vehicles. Access management enhancements and driveway adjustments for homes and businesses will improve access management. New sidewalk connections and ADA compliant curb ramps will be installed.

**PROJECT MANAGER:** TSS/H. Freed

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 9B

This project is for the addition of a left turn lane at the intersection of Nutt Road and Starr Street in Phoenixville Borough, Chester County, PA. The roadway suffers from poor operational efficiency due to the geometric design. Left turn movements were removed from eastbound Nutt Road due to safety concerns, because there was not sufficient offset between the eastbound left turn lane and the westbound through/right turn lane. Currently, left turning movements are prohibited from eastbound Nutt Road onto Starr Street. This condition requires vehicles wishing to make this movement to utilize the non-signalized Valley road intersection; approximately 175 feet to the east. Multiple rear end crashes and increased traffic congestion along Nutt Road can be contributed to this. Through the land development process, Phoenixville Borough was able to secure the additional right of way needed to provide an auxiliary lane in the westbound direction on Nutt Road. This will facilitate the reinstatement of the eastbound left turn lane, separate the three westbound lanes (left, through, right), and perform associated traffic signal upgrades and modifications at the intersection. Traffic operations, system reliability, and safety will be improved as a result of this project. This project was identified as a priority in the Phoenixville Region Multimodal Transportation Plan, recognized in the Phoenixville Regional Comprehensive Plan, and recommended in the PA 23: Road Safety Audit (DRAFT). As such, Phoenixville Borough is committed to implementing this key transportation improvement to reduce traffic congestion along a major corridor in Chester County.

PROJECT MANAGER:

CMP: Not SOV Capacity Adding

The proposed scope of this project includes:

- Installation of pavement marking, chevrons, curve warning signs, mill and overlay pavement with sections of high friction surface treatment (HFST) on West Chester Pike from Prospect Ave to Morris Road;
- Installation of pavement marking, signage, mill and overlay pavement with sections of high friction surface treatment (HFST) on West Chester Pike at the intersection with Concord Road;
- Increase left storage length of the existing unsignalized intersection at the Route 202 NB on ramp and West Chester Pike EB;
- Improve pavement marking and signage at the northbound on ramp with the West Chester Pike westbound on ramp to Route 202;
- Closure of the median break and the installation of a right-out access on West Chester Pike at the intersection with Patrick Avenue ;
- Restriping to remove one travel lane on Paoli Pike in the WB direction from Prospect Ave to Westtown Road;
- Restriping East Gay Street in the WB direction to N. Worthington Street to provide a two-lane section (road diet);
- Partial extension of the median on WB East Gay Street (west of Westtown Road);
- West Chester Pike/East Gay Street WB 2 lane scissor ramp and EB Market Street 2 lane scissor ramp to Paoli Pike, reduction to single lane;
- Remove temporary flexible post median delineators and create permanent extension of median at EB West Chester Pike and Spring Lane;
- Shoulder improvements with striping and signing to intersection of Golf Club Apartment/Shopping Center signal on WB West Chester Pike from Spring Lane;

Signal improvements:

- The conversion of the Route 202 SB off ramp stop-controlled intersection to a signalized intersection;
- Installation of pavement markings, mill and overlay pavement with sections of high friction surface treatment (HFST) on West Chester Pike at the intersection with Five Points Road;
- Investigate pavement marking improvements of EB West Chester Pike right turn lane drop from the Route 202 northbound off ramp to Five Points Road.

PLAN CENTER:

IPD:

PROJECT MANAGER: TSS/M. Fausto

CMP: Minor SOV Capacity

CMP Subcorridor(s): 8A

The scope of the project has three major elements: (1) The addition of one lane inside of the US 202 NB ramp. US 202 NB traffic in the right lane is able to turn onto either ramp lane at the exit. Traffic merging from High Street is stop-controlled; (2) The addition of one lane on the inside of the US 202 SB ramp. The existing center median is converted to an auxiliary merge lane to Old Wilmington Pike so that traffic on SB High Street has more time to merge. The roadway is slightly realigned, but no additional right-of-way is needed; (3) The addition of a left turn lane (40 feet with a 145-foot taper) from EB Matlack Street to NB US 202.

**PROJECT MANAGER:** Gannett/A. Harper

**CMP:**

This project will rehab or replace a bridge. Chester County Bridge #92 is a three-span, single lane, reinforced concrete through girder bridge supported by concrete abutments. Constructed in 1926, the bridge is weight restricted at 8 Tons. It is rated in poor condition due to advanced scour at the piers and is coded as Scour Critical Category B, requiring monitoring on a 12-hour interval during heavy rain of 2 or more in a 24-hour period. The concrete deck and girders are spalled with exposed and corroded steel reinforcement.

Harveys Bridge spans between two T intersections and constricts approaching two-lane, two-way traffic to one lane, resulting in a severely reduced Deck Geometry rating of 2- Basically intolerable condition requiring high priority of replacement, an indication of the bridges inability to meet current safety criteria.

The bridge provides the only crossing of a 3.5 mile stretch of the W. Branch of Brandywine Creek between PA State Route 162, Embreeville Road, and Strasburg Road. Because of its limited load carrying capacity, routine services to local residents are restricted and fire response times are increased, presenting increased risk of property damage and injury for local residents. Harveys Bridge has experienced numerous overloads following closure of the PA Route 162 bridge due to damage sustained during Tropical Storm Ida.

MPMS# 15183 Station Road Bridge Over Chester Creek (CB #234)

LIMITS: Over Chester Creek

Est Let Date: 6/20/2024

IMPROVEMENT Bridge Repair/Replacement

NHPP:

MUNICIPALITIES: Thornbury Township

FC:

AQ Code:S19

PLAN CENTER:

IPD: 12

PROJECT MANAGER: TSS/GANNETT/S. New

CMP: Not SOV Capacity Adding

This project involves rehabilitating or replacing Station Road over Chester Creek in Thornbury Township, a single span bridge.

The Station Road bridge is a one lane, reinforced concrete T-beam bridge constructed in 1914 over Chester Creek in Thornbury Township. The width of the bridge is currently 18'-0" due to the numerous bituminous overlays which have concealed the original concrete curbing that previously provided a 16'-8" bridge width. It is currently posted for three tons. The purpose of the project is to correct the structural and safety deficiencies of the bridge to provide a safe and efficient crossing over Chester Creek. The bridge serves residents with local deliveries, school bus transportation, emergency services and access to the local post office located south of the crossing.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 5B

This project will entail the reconstruction and reconfiguration of this cloverleaf interchange, originally built in 1939.

This project involves reconstructing the US 1/PA 352 interchange at the terminus of the Media Bypass, upgrading roads and intersections, and traffic signals. Project includes improvements along US 1 beginning at the intersection with PA 452 to east of the Media Bypass, and along PA 352 beginning north of the Williamson Free School entrance drive to the intersection of PA 352 / PA 452. Local street improvements are included to improve circulation and provide access. Pedestrian facilities will be included in improvements.

This road segment is included in the Delaware County Bicycle Plan. SEPTA 110, 111, 114, and 117 bus routes use Routes 1 and 352.

\$81.081M out of an estimated \$214M (2021 CON estimate of \$150M YOE'd to FY33) is programmed for construction beginning in FY33. The construction balance that is not shown in FY33-FY34 is in the Long-Range Plan.

The superstructure of the Sellers Avenue Bridge over Amtrak will be replaced while reusing the existing stone abutments. The new superstructure and reused stone masonry abutments will be designed in accordance with current AASHTO and PennDOT design criteria and will be compliant with Amtrak's requirements for the railroad protective barrier and fencing in proximity to the railroad. Amtrak requires a solid face barrier on the bridge with a minimum 8'-0" height from the top of the sidewalk, capped with curved fencing a minimum of 1'-6" high, for a total height of 9'-6" above the sidewalk.

The roadway profile is expected to be raised with minor changes to sidewalks and vegetation. In an effort to minimize impacts to the Borough and the historic district, the change in the roadway profile has been lessened through coordination with Amtrak. Amtrak allowed the minimum vertical clearance (MVC) (currently proposed to be 20'-3") to be significantly less than what is typically required (24'-3"). Replacement of the bridge will require the construction of one new catenary support structure on the west side of the bridge and the rerouting of catenary wires and the relocation of railroad signals. Existing utilities will need to be supported and service will need to be maintained during construction. The new bridge design will accommodate the existing utilities at this location. The project will also upgrade the existing signal layout at the intersection of Sellers and Swarthmore Avenues to bring it to current standards and install emergency pre-emptive equipment. Emergency pre-emptive equipment will also be installed on the existing signal equipment at the intersection of East Ridley and Swarthmore Avenues.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 5C

Existing signalization and geometry is outdated. Substandard signal head configuration and size create a safety hazard. Roadway geometry is not adequate for proper turn movements, especially for buses. Traffic movement is impacted by inability of buses to negotiate turns. Intersection is heavily used by both SEPTA Route 107 and school buses. Proposed solution would be modernization of signals and improving the turn radius at the northeast and southeast corners of the intersection. Pedestrian Hand/Man signals with countdown indicators will be provided at each crossing. Project would alleviate safety problems and enhance turning movements. Design and ROW are being advanced by the township.

This road segment is included in the Delaware County Bicycle Plan.

PROJECT MANAGER: TSS/S. Hasan

CMP: Major SOV Capacity

CMP Subcorridor(s): 8A

This project section involves the widening and improving of SR 322 to a four-lane typical section with a grass median from east of Mattson Road/Featherbed Lane near Clayton Park and the Concord Township/Bethel Township line through Bethel Township to just east of Chelsea Parkway in Upper Chichester Township.

The following improvements will be implemented:

- The existing two-lane section of SR 322 will be widened to 4 lanes. A fifth center lane will accommodate left turns into and out of adjacent commercial properties.
- Limited widening to the north or about the center will be done at some locations to minimize sound barriers. Retaining walls will also be constructed in this section.
- A new traffic signal will be constructed at the intersection of Garnet Mine Road and the SR 322 eastbound ramps.
- Left turns from and into Colonial Drive will be eliminated.
- The existing traffic signal at the Bethel Road Connector and left turn lanes on SR 322 will be reconstructed.
- The total estimated cost for this project section is \$184,752,570.
- The anticipated let date is August 21, 2025.
- The anticipated completion date is September 21, 2028.

See MPMS #14747 for design funding. MPMS #'s 69815, 69816, 69817, and 114034 contain construction phases for the US 322 project TEA-21 DEMO 0486 - PA ID #116 - \$13,220,615

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2009 annual memoranda on supplemental strategies for details related to this project.

This project would provide a more direct truck route between two industrial parks (Bridgewater Business Park and I-95 Industrial Park), I-95, and US 322. Currently, truck drivers must navigate a circuitous route (Concord and Bethel Roads) with difficult turns and drive through a low-income residential neighborhood and by a school. The residential community along Bethel Road in Chester City and Chester Township is subject to a heavy volume of truck traffic, which should be directed onto another route. The other potential truck route goes well to the north and involves an intersection which is physically constrained and difficult/impossible for truck turns. This project complements and was a breakout project of MPMS 15477 (I-95/US 322/Highland Avenue interchange).

CMP Subcorridor(s): 5B, 8A

This project is in Concord and Chadds Ford Townships and involves intersection improvements to ease congestion. Improvements include pavement widening, pavement reconstruction and signal upgrades to accommodate an additional northbound US 1 travel lane through the intersection and a double left turn lane for northbound US 202. Other roadway improvements will include landscaped medians throughout the project area; eastbound and westbound left turn lanes and a signalized US 202 pedestrian crossing at the US 202/State Farm Drive/Brandywine Drive intersections; signalized pedestrian crossings at the US 1/Applied Bank Boulevard/State Farm Drive intersection; and elimination of the southbound Route 1 left turn lane at Dickinson Drive. Project CMP commitments include sidewalks, crosswalks, and enhanced bus stop areas in consultation with SEPTA. See DVRPC's 2013-2014 memorandum on supplemental strategies for details related to this project.

 MUNICIPALITIES: Ridley Township FC: AQ Code:S19  
 PLAN CENTER: IPD: 15  
 PROJECT MANAGER: TSS/GANNETT/S. New CMP: Not SOV Capacity Adding CMP Subcorridor(s): 6A

This project is a bridge rehabilitation/replacement of the County owned Michigan Avenue bridge over Little Crum Creek, which is poor condition. The bridge is posted with a 12 ton weight restriction and requires continual maintenance to remain open. Various elements of the bridge are in poor condition. The project needs are listed below: 1) Load Carrying Capacity - Eliminate the "poor condition" designation. - Accommodate school buses, local delivery vehicles and emergency vehicles. 2) Structure Integrity - - Bring the facility up to current design standards. The existing 12-ton carrying capacity restricts the type of traffic that can use the bridge. With an ADT of 6,583 vehicles per day, the bridge no longer provides the necessary community link that it once did. The bridge is a concrete slab that is in poor condition with heavy spalling revealing corroded reinforcement steel, especially near the deck drains. In addition, the substructure of the bridge is in poor condition with exposed, heavily scaled abutments. The channel rating is poor as a result of the alignment resulting in heavy scaling and pockets of undermining at the exposed north abutment. The existing safety features associated with the bridge do not meet PennDOT standards.

Funding for this project will be drawn down from the County Bridge Line Item (MPMS# 95447) at the appropriate time.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 5E

This project is a bridge rehabilitation/replacement of the County owned Hilldale Road bridge over Darby Creek in Lansdowne Borough and Upper Darby Township, Delaware County.

Delaware County Bridge #149, originally built in 1928, is a 92 foot two-span reinforced concrete T-beam bridge. The County is taking proactive action by replacing Hilldale Road Bridge due to the rapid deterioration of T-beam bridges in recent years. A lightly vegetated island is located downstream of the pier, and the east downstream banks are lined with gabion baskets that extend approximately 300 feet downstream. The island is forcing the flow towards the adjacent embankment. A traffic count performed in 2009 indicates an average daily traffic (ADT) of 2,379 vehicles per day.

Funding for this project will be drawn down from the County Bridge Line Item (MPMS# 95447) at the appropriate time.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project is a bridge rehabilitation/replacement of the County owned South Avenue Bridge over Muckinipattis Creek (Mulford Bridge) in Glenolden and Norwood Boroughs, Delaware County.

Built in 1927, the existing South Avenue Bridge is a single span reinforced concrete slab bridge. The parapets over the structure are forty-inch high pigeonhole parapets with forty-inch high solid concrete parapets over the wing walls. The concrete structure has an overall span length of 20 feet with a weight restriction of 13 tons, except combinations of 24 tons. The bridge carries two lanes of traffic over Muckinipattis Creek and has a curb-to-curb width of 32 feet with 7' sidewalks on both the upstream and downstream sides. South Avenue approaching the structure has a 32 foot wide cartway with 6-inch curb and 4-foot sidewalk between Ridgeway Ave and Chester Pike (SR 13). There is existing sidewalk along South Avenue on the downstream side of the structure providing pedestrian access to Chester Pike, the sidewalk on the upstream side of the structure ends at the limits of the parapet wall.

Funding for this project will be drawn down from the County Bridge Line Item (MPMS# 95447) at the appropriate time.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project will fund drainage improvements on PA 291 from the bridge over Crum Creek to the bridge over Darby Creek, including the installation of new inlets and pipes, and construction of ditches to alleviate the existing flooding of the roadway. The existing pavement will be milled and overlaid. Base repairs will be completed as necessary to repair damage to the roadway from previous flooding.

PennDOT will acquire land in the project area for the future location of a multiuse trail for the East Coast Greenway and September 11th Memorial Trail.

This road segment is included in the Delaware County Bicycle Plan.

CMP Subcorridor(s): 6A

The Main Street-CSX rail line grade crossing (US DOT #140641S) in Darby Borough needs to be updated and may include improvements such as new gates, lights, traffic signals (if warranted), drainage, and improvements to the crossing surface and roadway for all users at and around the grade crossing. This grade crossing currently poses significant safety concerns as it accommodates train traffic from a major interstate freight line throughout the day, vehicular traffic from two roads (Main St. and Sixth St.), and pedestrian traffic from nearby schools and retail establishments. Adding to the crossing's complexity is SEPTA's trolley route 11 that operates within the Main St. cartway and bisects the freight rail line (with trolley stops located on both sides of the grade crossing). The grade crossing was the subject of a two phase study conducted by DVRPC and overseen by a broad-based steering committee (see DVRPC publication #11012 and #12014).

This project was selected from the 2015 Pennsylvania Statewide Rail-Highway Grade Crossing Program for \$337,653 RRX funds.

PROJECT MANAGER: TSS/M. Saintval

CMP: Major SOV Capacity

CMP Subcorridor(s): 8A

This project involves widening and improving SR 322 to a four lane typical section with a median from Chelsea Parkway to the Market Street Interchange in Upper Chichester Township. The existing two lane section of SR 322 will be widened to four lanes with exclusive left turn lanes to accommodate left turns at the Cherry Tree Road / SR 3016 intersection. Auxiliary right turn lanes will be provided at multiple intersections. The Cherry Tree Road / SR 3016 intersection will be reconfigured and reconstructed including a new traffic signal, turn lanes, and realignment of Bethel Avenue. The existing four lane section from Cherry Tree Road to the Market Street interchange will be improved. The Market Street interchange will be reconstructed to a partial cloverleaf interchange including two new traffic signals and improvements made to Market Street.

•The total estimated cost for this project section is \$80,000,000 in 2019 dollars).

•To make use of the available right of way, the Market Street interchange will be reconfigured as a partial cloverleaf configuration, including two new traffic signals.

•The anticipated let date is February 2023

•The anticipated completion date is October 31, 2026.

CMP Subcorridor(s): 5C

The purpose of this project is to help reduce congestion, improve traffic flow and reduce emissions along the Route 1 corridor by adding ITS elements to the corridor. This project proposes the following work: equipping traffic signals with communication equipment to allow for Unified Command and Control, deployment of CCTV, DMS and Travel Time Detection and the installation of fiber optic cable to expand PennDOT's existing fiber communications network. The project proposes to install 19 CCTVs, 5 DMS, 10 Travel Time Detectors, 6.5 miles of fiber optic cable along with upgrading 33 signalized intersections to allow for unified command and control. The Section of PA Route 252 within the project area will equip 6 signalized traffic signals with hardware to allow for unified command and control and construct a dedicated left-turn lane from Route 252 onto the Media Bypass.

Funding for this project will be drawn down from the Competitive CMAQ Line Item (MPMS# 48201) at the appropriate time.

The Route 252 road segment is included in the Delaware County Bicycle Plan.

The focus of this continuing project will be to integrate transportation data developed by federal, state, and local governments and DVRPC into a regional database that allows for the open exchange of data. This project benefits all member governments and agencies by providing support to DVRPC to develop and coordinate transportation data development and data sharing and includes the continued growth of DVRPC's transportation GIS system, including the update and maintenance of it's web mapping and data sharing capabilities. Efforts are being coordinated with NJDOT, PennDOT, member governments, and operating agencies to maximize the investments made in technology and data.

**PROJECT MANAGER:** Jim Mosca

**CMP:**

This project will improve the region's air quality by encouraging public action to reduce air pollution and protect public health through the Air Quality Action program, an episodic, voluntary program for ground-level ozone and fine particulate matter (PM 2.5).

This project will fund supplemental services performed by contractors in the implementation of the Air Quality Action program. Types of services may include design and production of education and outreach materials and advertising, printing, and placement of advertising on television, online, radio, and in newspapers.

Advertisements will educate the public about ozone and PM 2.5 pollution and encourage actions to reduce activities that contribute to air pollution, especially on days that are forecast as unhealthy for people susceptible to ozone and PM 2.5 pollution.

This project will support partner efforts to discourage idling and promote the use of the air quality index particularly at schools and community centers through the Flags for School program and efforts to install anti-idling signage.

**Tasks**

1. Contract for the design and production of advertisements and promotional literature such as brochures, posters, flags, anti-idling signage, and educational materials.
2. Contract for the placement of advertising on radio, television, web, place-based, or newspapers.

**MPMS# 118494 Eastern Delaware County Bikeway Implementation Plan (TOP)**

**LIMITS:** Municipalities of Upper Darby, Lansdowne, East Lansdowne, and Yeadon

No Let Date

**IMPROVEMENT** Bicycle/Pedestrian Improvement

**NHPP:**

MRPID:R6.01

**MUNICIPALITIES:** Various

**FC:**

AQ Code:A2

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** EE/DVRPC/J. Natale

**CMP:**

This project will implement concepts of The Eastern Delaware County Bikeway Prioritization Study, that was previously funded through a DVRPC TCDI grant. The project will also create a connected bicycle network through the four municipalities of Upper Darby, Lansdowne, East Lansdowne, and Yeadon. The network will connect neighborhoods to regional trails, such as the Darby Creek Trail, the Cobbs Creek Trail, and the Bike Baltimore Avenue Route, as well as schools, parks, transit stations, other areas of interest, and the established bicycle network in the City of Philadelphia.

This conceptual network was developed through a comprehensive stakeholder and public involvement process and will serve to encourage and promote bicycle usage throughout the region. A high-quality bicycle network will allow cyclists to use these routes for both recreational and commuting purposes, thus reducing their dependence on cars and single occupancy vehicle (SOV) trips. Furthermore, it will allow for connection opportunities to neighboring municipalities to the west including Aldan, Haverford, Clifton Heights, Darby, and Springfield and may encourage further investment in bicycle options in other areas of Delaware County.

This project includes investments in many heavily urbanized, dense, and economically distressed communities and will provide more affordable travel options for those with limited access to automobiles who may be dependent on non-motorized or public transportation. It will also provide another option for commuters who may decide to bike to work or to transit stations. Due to the connections to schools and parks, it will also provide safer opportunities for students to get to schools and recreational areas nearby. This may, in turn, take much of the burden off parents who may not be available to transport them nor the option to work from home.

The projects that will be completed as part of the TOP grant are as follows:

- 1) Bywood Road, Fairfield Ave and Connectors
- 2) Baltimore Ave to Philadelphia
- 3) Bywood, Stonehurst, and Beverly Hills Connectors
- 4) West Baltimore Ave and Gladstone Connectors
- 5) Chestnut St
- 6) Garrett Rd--Multi-Use Connector

CMP Subcorridor(s): 14E

The Old York Road bridge is a three span, concrete-encased, I-beam structure supported by reinforced concrete abutments and column pier bents and must be replaced with a new structure. This structure carries five travel lanes (including one left turning lane) of PA Route 611 and two pedestrian sidewalks with a total structure width of 69 feet and structure length of approximately 113 feet. Pedestrian access will be provided to both sides of the bridge from the SEPTA Noble regional rail station. Signalized intersections are located at each approach to the bridge. The existing bridge was rated poor in an inspection report performed in 2019. The overall bridge is deteriorating. The abutment has wide cracks, severe scale and large spalls. The superstructure over the loading platforms are exhibiting spalls and heavy scale. There were two small holes noted in the sidewalk on the bridge.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

AQ Code:2035M

PLAN CENTER:

IPD: 20

PROJECT MANAGER: HNTB/N. Velaga

CMP: Minor SOV Capacity

CMP Subcorridor(s): 14E

This project involves the addition of turn lanes at the PA 73 intersections with Greenwood Avenue and at Rices Mill Road. Left turn lanes will be added on Church Road and right turn lanes will be added on Greenwood Avenue. The traffic signals on PA 73 at Greenwood Avenue and Rice's Mill Road will be interconnected. Drainage in the area will be improved. The existing sidewalk on the east side of Greenwood going north from the intersection with Church Road will be maintained. Additional sidewalks can be considered if there is local support, including the willingness to be responsible for maintenance, and if the improvements can be made ADA compliant. However, the right-of-way constraints are significant, including the Curtis Arboretum and the Rabbinical College. The impacts of additional required right-of-way for bicycle or pedestrian facilities may cause cultural resource and/or community impacts that are not acceptable. These issues will be addressed as the project moves into final design.

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** TSS/S. Hasan

**CMP:** Major SOV Capacity

**CMP Subcorridor(s):** 2A, 11A, 14C

Final Design funding in this project is for Phase 3 of the PA 309 Connector Project: Souderton Pike to PA 309 - MPMS #105803. This is for record keeping and the original timing of MPMS #16438 has not changed, as the physical work was completed in late 2012. See MPMS #77211 for description of project.

The overall effort is to provide an adequate two lane roadway connection by upgrading two existing two lane roads (Wambold Rd. and Township Line Rd.) and connecting them with a two lane roadway approximately one mile in length. This project will correct the disjointed and inadequate road system serving the north/south movement between PA 309 and the PA Turnpike Lansdale Interchange. This project will proceed in 2 phases.

The Right-Sized Phase 1 Project includes the proposed realignment of Sumneytown Pike (PA 63) from Old Forty Foot Road to Freed Road and improvements to Wambold Road from Sumneytown Pike (PA 63) to Allentown Road. The proposed work includes a three lane relocation of PA 63 with shoulders (11' lanes and 8' shoulders) on Wambold Road and a two lane runaround around Mainland Village.

Phase 2 will include the following improvements:

- Extend Wambold Road past its current end at Allentown Road up to the intersection of Cowpath Road and Township Line Road;
- Reconstruct and widen Township Line Road from Cowpath Road to Souderton Pike;
- Realign and signalize the intersection of Penn Street and Township Line Road;
- Signalize the intersection of Township Line Road and Souderton Pike.

Phase 3 will reconstruct and widen Township Line Road between Souderton Pike and the Sellersville Bypass, make a physical connection to PA 309, and is listed under MPMS #105803.

SAFETEA DEMO #613, PA ID# 338 - \$1.280 MILLION, \$0 available. DEMO PA ID #206 - \$4,59,394, \$0 available.

CMP Subcorridor(s): 15B

This project involves full-depth reconstruction of the roadway and drainage system, upgrading and interconnecting traffic signals, new sidewalks, improved transit stops, and adding turn lanes at major intersections such as Butler Pike, Joshua Road, and Crescent Avenue. East of Crescent Avenue, Montgomery County will be reconstructing and widening Ridge Pike as a separate County-funded project.

Project CMP (Congestion Management Process) commitments include signal upgrades, new sidewalk connections, turning movement enhancements, and emergency vehicle signal pre-emption. See DVRPC's 2010 memorandum on supplemental strategies for details related to this project.

AQ Code:S10

**PLAN CENTER:** Town Center

IPD: 26

**PROJECT MANAGER:** EE/J. Brown

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 8E, 9B

This project serves for the pre-construction phases of the Markley Street rehabilitation project for Section 500 of US 202 (SR 3020 and Norristown Borough Street) ; from approximately 700 feet south of Main Street (local street) to Johnson Highway (SR 3017) for a total length of approximately 8,500 linear feet; and on Johnson Highway (SR 3017) from Markley Street to Powell Street (local street) for a total length of approximately 2,200 feet. Between Main Street (local street) and Marshall Street (local street), Markley Street is a four-lane divided street with no parking permitted. Between Marshall Street and Johnson Highway (SR 3017), it is a two-lane street, with parking typically permitted on both sides. This parent project will incorporate all pre-construction phases (UTL and ROW) for MPMS# 80021 (Section 510) and 80022 (Section 520), 106068 (Section 530) and Section 540, which will be used for the respective construction contracts.

The scope also includes some operational improvements instead of strict road reconstruction by adding an extension of Barbadoes Street, in Norristown, between Lafayette Street and Washington Street to provide an eastern connection to Water Street and alleviate truck turning conflicts, for the Norristown Transfer Station, at the intersection of Water Street and Main Street. There is also an upgrade to the railroad grade crossings at Main Street and Marshall Street by installing new gates, signals and crossing surfaces and replacing existing traffic signals on Markley Street at the intersections of Main Street, Marshall Street and Elm Street.

In the DVRPC region, US 202 covers 61 miles, traversing 27 municipalities. It serves as a major commuter route and is a vital link for business and industry. For planning purposes, US 202 has been divided into seven major sections (100 through 700), and some of those sections have been broken down further to simplify construction management.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2011 annual memoranda on supplemental strategies for details related to this project.

MUNICIPALITIES: Horsham Township; Upper Dublin Township

FC: 14; 16

AQ Code:2035M

PLAN CENTER:

IPD: 15

PROJECT MANAGER: TSS/H. Freed

CMP: Minor SOV Capacity

CMP Subcorridor(s): 12A, 12B

The project involves roadway widening and capacity improvements along SR 63 (Welsh Road), SR 2007 (Norristown Road) and SR 152 (Limekiln Pike). Welsh Road and Norristown Road will be widened to a 5 lane section with center left turn lanes. The existing 3 lane section along Limekiln Pike will remain with some additional capacity improvements. The cross section will not provide shoulders. Concrete curbing will be installed. The intersections will be improved to include left turn lanes and some channelized right turn lanes. Some sidewalks are currently located within the project. 4' sidewalks with a 3' grass strip from face of curb are proposed through the project limits. New traffic signal upgrades are proposed for all three project intersections. Signalized intersections will include pushbuttons and hand/man indications.

Signal Replacements will take place at the following intersections: SR 63 (Welsh Road) and SR 2007 (Norristown Road); SR 63 (Welsh Road) and SR 152 (Limekiln Pike); and SR 2007 (Norristown Road) and SR 152 (Limekiln Pike).

Project limits are as follows:

- SR 63-1000' south of Norristown Road intersection to 1200' north of Limekiln Pike intersection
- SR 2007-850' west of Limekiln Pike intersection to 850' east of Welsh Road intersection
- SR 0152-800' south of Norristown Road intersection to 750' north of Welsh Road intersection

#### SR 63 (Welsh Road)

Existing - 2 -12' lanes (varies) with turn lanes at intersections, 0-4' Rt. Shldr. (varies); 24.0'-44.0' Total Pavement width  
Proposed - 3 - 11' lanes, 2-13' lanes adjacent to curb; 24.0'-59.0' Total Pavement width.

#### SR 2007 (Norristown Road)

Existing - 2 -12' lanes (varies) with turn lanes at intersections, 0-4' Rt. Shldr. (varies); 24.0'-44.0' Total Pavement width  
Proposed - 3 - 11' lanes, 2-13' lanes adjacent to curb; 24.0'-59.0' Total Pavement width.

#### SR 152 (Limekiln Pike)

Existing - 2 -12'-18' lanes (varies) with some turn lanes at intersections, 0-8' Rt. Shldr. (varies); 24.0'-51.0' Total Pavement width  
Proposed - 1 - 11' lane, 2-13' lanes (lane widths vary based on existing edge of pavement to remain); 24.0'-55.0' Total Pavement width.

Ridge Pike is a Montgomery County owned principal arterial on the NHS. This project will reconstruct Ridge Pike to provide a center left turn lane to the existing four lane cross-section. Work includes full-depth pavement reconstruction and drainage replacement; upgrading and adding new traffic signals; fiber optic traffic signal interconnections; new sidewalks; and improved transit stops. The overall project extends from the Pennsylvania Turnpike to Chemical Road. Two new bridges over the Turnpike and Norfolk Southern Railroad tracks are proposed under companion projects, MPMS #92839 and #110444, which will be let and constructed concurrently with MPMS #48175.

A narrow bridge over former railroad tracks constrains traffic and restricts sight distance on Route 29 (Gravel Pike) in Pennsburg Borough between 10th and 11th Streets. The bridge would be removed and Route 29 would be connected with the adjacent wider road sections. A pedestrian underpass for the future Perkiomen Trail extension is planned. This is a bridge bill project. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 8F, 9B

This project provides for the widening of US 202 for approximately 1.8 miles from two lanes to five lanes including a center turn lane in this section of US 202 between Johnson Highway and Township Line Road in Norristown Borough, East Norriton & Whitpain Twps. One bridge and one culvert will be replaced in this portion of Section 600. Traffic signal equipment will be replaced at the intersections with Johnson Highway, Germantown Pike and Township Line Road. Bike lanes adjacent to the outside travel lane will be provided in both the northbound and southbound directions. This section is designed under Section 610. ITS elements are included in this project. MPMS #50364 (US 202 Sec 610) contains the final design funding for this project. See MPMS #'s 63491, 63486, and 63490 for construction sections.

In the DVRPC region, US 202 covers 61 miles, traversing 27 municipalities in Delaware, Chester, Montgomery, and Bucks counties. For planning purposes, US 202 has been divided into seven major sections (100 through 700), and some of those sections have been broken down further to simplify construction management.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 annual memoranda on supplemental strategies for details related to this project.

This project involves modifications to the intersection of PA 309 (Bethlehem Pike) with PA 463 (Horsham Road/Cowpath Road) and Business US 202 (Doylestown Road) in Montgomery Township, Montgomery County, Pennsylvania. Improvements to the intersection, commonly referred to as the "5-Points Intersection," will include the installation of additional through lanes on both PA 463 approaches and the PA 309 southbound approach, and the retiming of the existing eight (8) phase traffic signal. Other improvements will include modifying the existing drainage system by installing Stormwater Management basins, implementing Best Management Practices facilities for erosion and sediment pollution control, replacing the existing traffic signal structures, adjusting several existing driveways to accommodate additional lanes, upgrading the signing and pavement markings, and adding sidewalks and ADA complaint curb ramps.

The existing intersection has fifteen (15) lanes approaching the intersection, and the proposed work has eighteen (18) lanes approaching including widening away from the intersection to accommodate lane drops and driveway improvements. The added lanes are on PA 463 eastbound and westbound and PA 309 southbound. There are no improvements on Doylestown Road other than tying in PA 463 westbound to accommodate vehicles turning right to travel northbound on Business US 202. Sidewalks and ADA complaint curb ramps will be added throughout the project.

Work along PA 309 will extend approximately 1,838 feet north of the intersection and 1,181 feet south of the intersection; work along PA 463 will extend 1,439 feet east of the intersection, and 1,336 feet west of the intersection, work along Business US 202 will extend 854 feet north of the intersection.

**PROJECT MANAGER:** Gannett/B. Masi

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 3B, 7B

Widen Belmont Avenue to provide additional lanes, from two to four lanes, intersection improvements and streetscape improvements; replace railroad overpass from from I-76 to Rock Hill Road. This project will also include improvements at the adjacent intersection of Conshohocken State Road and Rock Hill Road.

Project CMP (Congestion Management Process) commitments include signal upgrades, safety treatments, improvements for bicyclists and pedestrians, and turning movement enhancements. See DVRPC's 2009 memorandum on supplemental strategies for details related to this project.

\$21.214M out of an estimated \$44M (2021 CON estimate of \$30M) is programmed for construction in FY34. The construction balance that is not shown in FY34 is in the Long-Range Plan.

CMP Subcorridor(s): 7B

This project involves rehabilitating or replacing a borough owned, through girder type bridge. The bridge currently has one sidewalk. This project is subject to standard PENNDOT design procedures as defined in the Bicycle/Pedestrian Facilities checklist. The bicycle and pedestrian checklists will be incorporated into the project. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

Est Let Date: 11/2/2023

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:** N

MRPID:96

**MUNICIPALITIES:** Upper Merion Township

**FC:** 16

AQ Code:R3

**PLAN CENTER:** Metropolitan Subcenter

IPD: 21

**PROJECT MANAGER:** EE/M. Holva

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 1A, 9B

This project will relocate PA 23 (Valley Forge Road) and SR 3039 (North Gulph Road) in the vicinity of the PA 23/US 422 interchange to improve operations and reduce traffic impacts within Valley Forge National Historic Park. In addition, relocation improvements will be made to North Gulph Road in order to provide the opportunity for a new "gateway" for the Valley Forge National Historic Park. The roadway will be moved approximately 300 feet to the east of the park entrance.

This project is part (1) of the "River Crossing Complex," which is a complex area of roadways, interchanges, intersections, and bridges in and around the Valley Forge National Historic Park. Environmental clearance for various components was undertaken through MPMS #46954, and individual projects have been broken out as follows:

- 1) PA 23/US 422 Interchange and North Gulph Road Improvements (MPMS #66952).
- 2) US 422/PA 363 Interchange, including providing movements to/from the west (MPMS #64796).
- 3) US 422 Exwy Bridge over the Schuylkill River, replacement of the existing bridge (MPMS #70197), and a new parallel four (4) lane bridge and relocation of PA 23 eastbound off-ramp as an expressway fly-over.
- 4) US 422 Widening for 1.8 miles from PA-363 interchange to the US-202 interchange. This project has not yet been broken out.
- 5) Old Betzwood Bridge Bike/Pedestrian Trail will be re-built as a bike/pedestrian bridge only, and will not re-instate vehicular traffic (MPMS# 16703).
- 6) An early action interim project to provide timely and effective relief to westbound afternoon congestion until the long range projects can fully advance was programmed and constructed as MPMS #74648.

The River Crossing complex projects have received the following Earmarks:

2008 Appropriation (PA ID# 711) -\$735,000

SAFETEA-LU (FED ID# 0020/PA ID# 672) -Originally \$20,000,000. Balance available \$6,864,799

TEA-21 (FED ID# 0140/PA ID# 088) -No funds remain.

CMP Subcorridor(s): 15B

This project involves the rehabilitation or replacement of the existing bridge, constructed in 1884, is a 174' long, three-span, wrought iron, pin-connected Pratt pony truss. The bridge carries two lanes of traffic on a narrow 18'-8" curb-to-curb width. The bridge was determined eligible for the National Register of Historic Places for its technological significance. The county will provide pedestrian access on the bridge if replaced to provide a connection from the eastern side of the bridge to the Wissahickon Trail which runs along the creek on the westerly side of the bridge.

A final alternative for the bridge will rehabilitation or replacement will be determined upon Federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

The PA 309 Connector Project is intended to create an improved connection between PA 63 (near the Lansdale Interchange of I-476) and PA 309 (near the southern terminus of the Sellersville Bypass) in Bucks County. Phase 1, which created a bypass around Mainland village in Montgomery County and reconstructed and widened Wambold Road from PA 63 (Sumneytown Pike to Allentown Road, was carried under MPMS #16438.

Phase 2 will include the following improvements:

- Extend Wambold Road past its current end at Allentown Road up to the intersection of Cowpath Road and Township Line Road;
- Reconstruct and widen Township Line Road from Cowpath Road to Souderton Pike;
- Realign and signalize the intersection of Penn Street and Township Line Road;
- Signalize the intersection of Township Line Road and Souderton Pike.

Phase 3 will reconstruct and widen Township Line Road between Souderton Pike and the Sellersville Bypass, make a physical connection to PA 309, and is listed under MPMS #105803.

Project CMP (Congestion Management Process) commitments include signal and intersection improvements, turning movement enhancements, accommodations for pedestrians and bicyclists, coordination with SEPTA, and outreach to employers to promote transportation demand management strategies. See DVRPC's 2016-2017 memorandum on supplemental strategies for details related to this project.

CMP Subcorridor(s): 12A

This project is the rehabilitation of the Fetters Mill Road Bridge in Lower Moreland and Bryn Athyn Borough. The bridge was determined eligible for the inclusion in the National Register of Historic Places in 1999 with the Fetters Mill Historic District being added to the list in 2006. The bridge was closed to traffic in April 2017 and will remain closed until the completion of construction. Since the bridge is being rehabilitated, it was determined that the project will have a "No Adverse Effect" on the bridge and historic district.

NHPP:

MUNICIPALITIES: Upper Dublin Township

FC:

AQ Code:S19

PLAN CENTER:

IPD: 13

PROJECT MANAGER: TSS/GANNETT/S. New

CMP: Not SOV Capacity Adding

CMP Subcorridor(s): 14B

This project is the replacement of the existing two-span concrete slab bridge with a weight restricted of 15-tons. The bridge will be replaced with a precast reinforced concrete box culvert bridge with minimal approach roadway work. During construction, one lane of traffic in each direction will be maintained to allow traffic to be uninterrupted.

Funding for this project will be drawn down from the County Bridge Line Item (MPMS# 95447) at the appropriate time.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

**PROJECT MANAGER:** HNTB/N. Velaga

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 9A, 11A

This intersection realignment project will replace the intersection of Germantown Pike, Ridge Pike, and River Road—which currently sits near the Ridge Pike Bridge over Perkiomen Creek—with two separate intersections to the east in order to reduce congestion and improve traffic flow through this corridor. The first of these will relocate the River Road intersection with Germantown Pike utilizing a roundabout configuration. The second intersection will be signalized and will connect Ridge Pike with the re-aligned Germantown Pike south of the new roundabout. Reconfiguring these intersections will improve safety and mobility in the project area by increasing the spacing between the existing bridge and the new Ridge Pike and Germantown Pike intersection. The roundabout will direct traffic more efficiently to the new signal controlled intersection on Ridge Pike. In addition, a short new connector road will be built between Ridge Pike and Pechins Mill Road to provide access to residents along Pechins Mill Road, which is also being realigned to improve traffic flow. These advance operational improvements are considered Phase 1 of a future improved crossing of the Perkiomen Creek being proposed due to congestion and safety issues where Germantown Pike, Ridge Pike, Main Street, and Route 29 converge. The Ridge Pike Bridge over Perkiomen Creek was constructed in 1791 and is the second oldest stone arch structure in Pennsylvania. Additional improvements in Collegetown are currently being advanced as part of an HOP to realign First and Second Avenue and eliminate offset intersections.

A future Phase II Second Collegetown/Perkiomen Crossing south of the existing stone arch bridge is planned, but due to impacts to wetlands, floodplains, parks, threatened and endangered species, and archaeology, Phase I operational improvements will be constructed in advance of a new crossing and will be evaluated for traffic impacts. The Phase 1 improvements are required before a second bridge can be constructed as they will provide connectivity of the second bridge with the existing roadway network.

IMPROVEMENT Bridge Repair/Replacement

NHPP:

MUNICIPALITIES: West Conshohocken Borough

FC:

AQ Code:S19

PLAN CENTER:

IPD:

PROJECT MANAGER: L. Guarini

CMP: Not SOV Capacity Adding

The project would involve the rehabilitation or replacement of the bridge that carries Woodmont Road over Arrowmink Creek, located in West Conshohocken Borough, Montgomery County. The bridge was constructed in 1932. It is anticipated that the proposed bridge will be replacement on the existing horizontal alignment with minimal approach work to tie back into existing conditions. To maintain access to properties, half width construction will be investigated.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

Montgomery County Bridge #275 is a 28-foot long single span steel I-beam bridge that carries approximately 2,400 vehicles per day. The bridge is in poor condition and the superstructure is in poor condition. The superstructure exhibits significant paint loss with moderate to heavy rust, section loss and pitting. The substructure is exhibiting vertical cracks.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

CMP Subcorridor(s): 14C

The PA PA 309 Connector Project is intended to create an improved connection between PA 63 (near the Lansdale Interchange of I-476) and PA 309 (near the southern terminus of the Sellersville Bypass) in Bucks County. Phase 1, which created a bypass around Mainland village in Montgomery County and reconstructed/widened Wambold Road from PA 63 (Sumneytown Pike) to Allentown Road, was carried under MPMS #16438. Phase 2 is listed under MPMS #77211 and will extend Wambold Rd. on a new alignment and upgrade a portion of Township Line Rd.

Phase 3 will reconstruct and widen Township Line Road between Souderton Pike and the Sellersville Bypass, make a physical connection to PA 309, and is listed under MPMS #105803. Phase 3 will begin along Township Road just east of Hatfield Souderton Road, the terminus of Phase 2. Township Line Road will be widened and the intersection of Bethlehem Pike and Township Line Road will be totally reconstructed to include additional turn lanes. The proposed connector will continue after the intersection to follow existing Fairhill Road and the existing bridge over PA 309 will be reconstructed. The interchange will consist of two ramps, the northbound on ramp intersection will be a proposed roundabout with the proposed connector and existing Fairhill Road. Along Bethlehem Pike improvements will be made to the Bergey Road intersection to the south and Spur Road intersection and County Line Road intersection to the north. The intersection of Bethlehem Pike and County Line will be the location of a proposed roundabout to improve safety and traffic flow.

Phase 1 of the Powerline Trail is a 10 foot multi-use trail connecting an existing and heavily used US 202 Parkway Trail with the Township Building as well as the Township's newly constructed Community and Recreation Center. This trail is a Primary Trail in "The Circuit." This will not only connect one of the region's spine trail corridors with the community center, it will also improve safety at several major road crossings for trail users. Important destinations exist along the proposed route including the Montgomery Township Municipal Building and the Montgomery Township Police Department. It will provide a first class multi-use trail to a large concentration of Montgomery Township's population connecting the new Township's Community & Recreation Center as well as the US 202 Parkway Trail.

Project was awarded \$850,000 regional TAP (TAU) funds from the 2016 TAP round, which was approved by the March 24, 2016 DVRPC Board. Approximately \$7.6 million was available for the five-county Southeastern Pennsylvania region.

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 3B

This project will provide for the rehabilitation of the five-span concrete arch with a closed deck bridge on Belmont Avenue/Green Lane which connects Montgomery County and the City of Philadelphia over the Schuylkill River. The current structure is 564 feet long, has a bridge deck area of 32,260 SF, and serves an AADT of 22,891. At nearly 90 years old, it has a sufficiency rating of 38, while the substructure condition has been rated as 'poor.' Any weight restriction or closure would cause significant traffic disruption to the region. This bridge is Montgomery County bridge #200 and is also Philadelphia City Bridge #7 and is a jointly owned structure between the City of Philadelphia and Montgomery County.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project proposes to streamline the six-legged intersection of Philmont/Tomlinson/Pine Roads in two stages by removing both legs of Tomlinson Road from the intersection and relocating them. Stage 1 would realign the northern leg of Tomlinson Road into Pine Road, and straighten out both Pine Road approaches to Philmont. Stage 2 will realign the southern leg of Tomlinson Road into a new intersection with Philmont Avenue 700 feet east of the original location. Additional shoulder and turning lane improvements along Philmont Avenue and Pine Road are also proposed.

This project will extend the Cynwyd Heritage Trail nearly 1/2 mile from Cynwyd Station to City Ave. along the SEPTA ROW. Extension will ultimately continue into Philadelphia and would connect with the network of existing paths in Fairmount Park and to Parkside Ave.

**MPMS# 110971** *Main Street Safety Improvements*

**LIMITS:** Main Street (SR 3009) corridor from Egypt Rd. to Airy St./Forrest Ave.

Est Let Date: 4/17/2025

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:** N

**MUNICIPALITIES:** West Norriton Township

**FC:**

AQ Code:2035M

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** Traff/A. Patel

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 8E, 9B

The project will implement a 4-lane partial "road diet" configuration along Main Street (SR 3009) between Egypt Road (SR 4002) and Forest Avenue/West Airy Street. The existing four-lane undivided roadway will maintain two (2) through lanes in the westbound direction, one (1) lane eastbound, and a shared left-turn lane throughout the project limits with dedicated turn lanes at the signalized intersections. In addition to the improvements along Main Street, the intersection of Main Street & Egypt Road/Jefferson Avenue/Orchard Lane will be reconstructed as a 5-leg "hybrid roundabout". The "hybrid roundabout" will include a 2-lane exit for Main Street and a single lane exit for Egypt Road. Temporary and permanent right-of-way acquisitions will be required in the area of the "hybrid roundabout". The existing traffic signals at Schuylkill Avenue, Whitehall Road, and Forrest Avenue/West Airy Street will be modified, as necessary. The ADA and pedestrian facilities along the corridor will be evaluated and updated, as necessary, to meet current ADA standards.

**PROJECT MANAGER:** EE/M. Holva

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 2B, 3C

This project will provide flex funds to be transferred to SEPTA for a new "smart" parking garage at SEPTA's Conshohocken Station which will increase parking availability by approximately 500 spaces and will leverage \$22,000,000 of SEPTA capital funds for the station project on the Manayunk/Norristown Regional Rail Line. The garage and the information system to provide real time parking and travel information is one of the elements of improving multi-modal travel and mitigating congestion as part of the I-76 Integrated Corridor Management project (see MPMS # 106662 in the Interstate Management Program). Traffic studies and empirical evidence demonstrate the need to divert traffic on the Schuylkill Expressway between the PA Turnpike (I-276) to the west and US 1 to the east. Parking expansion at SEPTA's Conshohocken Regional Rail Station will enhance the opportunity to utilize Regional Rail service along this corridor and complement PennDOT's ongoing efforts to manage congestion on the Expressway.

**MPMS# 112232** *I-76 Slope Repair Westbound*

**LIMITS:**

Est Let Date: 1/12/2023

**IMPROVEMENT** Roadway Rehabilitation

**NHPP:**

**MUNICIPALITIES:** Lower Merion Township

**FC:**

AQ Code:S2

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** TSS/S. Fellin

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 3C

This project involves the construction of permanent slope repairs along I-76 Westbound near mile post 335.3 in Lower Merion Township, Montgomery County. Slope failure has occurred along the I-76 Westbound shoulder. County maintenance forces have evaluated and performed temporary repairs, but the slope has continued to erode and fail over time. This has placed the I-76 travel lanes at risk of destabilization and failure. A more permanent solution will be required to avoid the possible closure of the roadway for repair in the event of a major slope failure. The causes of the slope failures may include water, erosion, and/or a loss of vegetative support. A site reconnaissance and investigation will be performed to assist with designing remedial measures, which may include excavation and replacement with rip rap, excavation and stabilization with soil nails, and other measures.

**CMP:** Not SOV Capacity Adding

Upper Dublin Township (UDT) and Municipal Authority (MA) committed to construction of the regional Cross County Trail along 2.5 miles through the Fort Washington Office Park. UDT and the MA have received 13 grants for over \$14.3 Million of the total \$22.8 Million estimated cost to install the trail from Pennsylvania Avenue to Susquehanna Road. Three projects are constructed and the remaining three will be constructed by 2021. UDT and MA are committed to extending this Circuit Trail to the municipal boundary at Welsh Road along Dreshertown Road. A Complete Streets approach is required to accommodate all transportation modes. The focus of this grant is Construction funding for the first phase of the overall program to extend the Cross County Trail 0.7 miles between Susquehanna Road and Beacon Hill/Bantry Drives, construct missing segments of sidewalk, widen Dreshertown Road north of Limekiln Pike to provide a common center left turn lane to Beacon Hill/Bantry Drives, upgrade traffics signals and replace a culvert to accommodate the trail and three lane roadway.

PLAN CENTER:

PROJECT MANAGER: Jim Mosca

CMP:

NHPP:

FC:

No Let Date

MRPID:R6.07

AQ Code:X1

IPD:

This program will improve efficiency of the regions transportation system by collecting and analyzing traffic data to determine the utilization of the regions transportation network.

This ongoing regional program collects and processes travel data, the primary form being traffic counts, including hourly and 48-hour traffic volumes, for selected locations on the regional highway network. Data collected will provide input to Vehicle Miles Traveled (VMT) forecasting, the Traffic Monitoring System (TMS), the Congestion Management System (CMS), travel simulation models, individual project level analysis, traffic monitoring, and trend analysis. This information is vital to all project studies that address highway deficiencies and proposed solutions. Traffic count information from the database may be queried at <https://www.dvrpc.org/webmaps/TrafficCounts/>. The program is supported by funding from various sources. Because this is a regional program, the federal PL funds help support the operations and infrastructure required as base elements to run a travel monitoring program region wide. These base elements include the leases on a fleet of travel monitoring vehicles, operations and maintenance of those vehicles, an inventory of data collection and safety equipment, editing, processing and uploading of the count data into the database system which feeds the count viewers on the DVRPC website

To facilitate uninterrupted data collection, it will be necessary to procure new counting equipment, supplies, repairs, or services as needed.

#### Tasks

1. Coordinate with PennDOT, NJDOT, and member governments to review traffic count locations.
2. Establish weekly schedules, staff assignments, and control procedures.
3. Collect traffic data at approximately 3,000 selected locations.
4. Process counts, edit for quality control, upload data into the DVRPC Traffic Count Database.
5. Maintain and further automate traffic data systems and procedures to enhance productivity, including data obtained by third parties via remote sensors, etc.
6. Submit counts collected during the year electronically by specific deadlines established by PennDOT and member governments.
7. Maintain an inventory of data collection and safety equipment, including purchasing new equipment with enhanced technology and capability, purchasing needed supplies such as road tube, and procuring necessary repairs if existing equipment gets damaged.
8. Collect travel data from non-highway modes, including pedestrian, bicycle and public transportation travel system characteristics and user traits as requested.
9. DVRPC will also coordinate with PennDOT and NJDOT, the counties, and cities on the collection and validation of data on the local transportation asset inventory (as requested).

MPMS# 115974 District 6 Modeling Assistance 2022-23

LIMITS: I-95 Reconstruction areas, other areas as needed across the District

No Let Date

IMPROVEMENT Other

NHPP:

MUNICIPALITIES: Various

FC:

PLAN CENTER:

IPD:

PROJECT MANAGER: EE/E. Elbich

CMP:

This project provides for technical and planning assistance to PennDOT District 6 for support in implementation of the I-95 Reconstruction Projects, and other traffic studies as identified by PennDOT. DVRPC will be on call for quick-turnaround analysis or data collection tasks in support of specific and timely I-95 project planning needs. Tasks will include data collection, meeting and stakeholder coordination, traffic modeling and forecasting, and general research as needed.

This project will dedicate two-person years of DVRPC modeling staff time to prepare traffic forecasts throughout the I-95 corridor in Pennsylvania and on other District 6 projects as required. The staff members will report to the Manager, Office of Travel Trends and Forecasts, and work with other staff as needed to prepare traffic forecasts and other modeling services.

New traffic data and forecasts are needed for several tasks. These include analyzing additional interchange configurations to improve safety, reduce congestion, and address community concerns; support new or updated Point-of-Access (POA) studies; extend the horizon year of previous traffic forecasts in the corridor; analyze and plan for future freight activity; and prepare detour route forecasts for later construction phases.

#### Tasks

1. Coordinate with PennDOT and their consultants; attend meetings and make presentations as needed.
2. Focus and calibrate regional travel demand model on the I-95 corridor, and other facilities as needed.
3. Conduct computerized traffic assignments to determine horizon year traffic volumes under No-Build and Build scenarios.
4. Prepare average weekday daily traffic (AWDT) traffic volumes for I-95 mainline, ramps, and selected facilities impacted by the I-95 scenarios throughout Sectors A, B, C, and D.
5. Prepare AM and PM peak hour traffic forecasts, including intersection turning movements for the No-Build and Build scenarios, as needed.
6. Collect, tabulate, and/or process origin-destination and travel time data, as needed.
7. Prepare forecasts to evaluate the impact of new or improved transit connections on highway patterns, volumes, and interchange operations, as needed.
8. Prepare forecasts to evaluate the impacts of new land uses and/or redevelopment on travel patterns, volumes, and interchange operations, as needed.
9. Prepare maps and tables for transmittal of the data and travel forecasts to PennDOT and their consultants.
10. Prepare technical memorandums documenting the results of the travel forecasting; incorporate any comments from PennDOT and their consultants.
11. Continue supporting PennDOT's consultants for US 422 and the Market Street Bridge Closure modeling efforts.
12. Provide daily traffic forecasts the six proposed movements at the I-95 and PA Turnpike interchange.

PROJECT MANAGER: Jim Mosca

CMP:

This work program supports the delivery of the regional transportation demand management (TDM) program (with administration and coordination tasks funded separately under project 23-52-100).

TDM focuses on the many options available to residents to travel to and from work, as well as to get around our region for other purposes, in a coordinated, cost-effective, and environmentally-positive way. It involves the strategies that more efficiently distribute travel demand across all modes, and especially reduce SOV travel. An important element of TDM is providing education and outreach to commuters, employers, residents, and visitors within our region about available travel options, and providing a mix of incentives to encourage behavior change toward more efficient use of the regional transportation system.

Recent major technological developments have changed the way the public considers and makes transportation choices. Mapping applications in wide use, like Waze and Google Maps, are themselves a form of TDM, enabling a more efficient use of transportation networks, but they don't necessarily reduce SOV demand. New mobility options like ride-hailing services (uber, lyft, etc.), bike share, and e-bike and e-scooter rentals are being developed and evolving rapidly, and are increasingly linked into shared scheduling and trip purchasing platforms mobility as a service (MaaS). These new technologies and modes, and the changes to travel patterns they have enabled, have also led to more exploration of larger TDM-related policy initiatives such as variable road pricing, trip-reduction plans, and transportation benefit ordinance requirements. All of these conditions warrant novel consideration of which TDM strategies can work most effectively in the greater Philadelphia region; therefore a Regional TDM Plan was developed and is used as a guide for these efforts.

Although DVRPC has long included TDM as an element in many individual projects and efforts, there was not a formal, coordinated TDM program for the full DVRPC service region until FY21. This new competitive and coordinated program of projects and activities helps DVRPC and its planning partners better address growing transportation-related needs and challenges, particularly the need to provide connections to various safe and affordable transportation modes, and to reduce congestion and improve air quality. In coordination with the development of the Commissions 2050 Long-Range Plan, new regional TDM direction and efforts will allow for a broader, more strategic approach to TDM in the region, which differs from the service area-based approach used now.

A uniform, performance-based and outcome-driven approach to evaluating and undertaking projects will help staff and stakeholders strengthen existing TDM programs, and pilot new initiatives that can serve as a foundation for the future regional TDM portfolio. Completion of this work may require the purchase of equipment or services. Beginning in FY23, this program will be funded largely with Surface Transportation Block Grant funds (also called STU in PA), instead of Congestion Mitigation Air Quality (CMAQ) funds; however, some projects in DVRPC's NJ counties (especially outside of the Philadelphia Urbanized Area) will continue to be partially funded with CMAQ dollars. Staff are familiar with the eligibility requirements for CMAQ funds from the previous TOP funding cycle, so can properly evaluate any projects submitted in the geographic areas that will require CMAQ instead of STBG funds; FHWA-NJ will also be consulted.

#### Tasks

1. With planning and administrative tasks funded under project 23-52-100, DVRPC will work with partners as appropriate to solicit and deliver projects showing demonstrable results related to the five principles in the Regional TDM Plan, in both PA and NJ. This may include managing vendor/provider contracts.
2. Obtain and record relevant data to support analysis of each activity's impact; strategy effectiveness will inform subsequent program rounds.

MUNICIPALITIES:

FC:

AQ Code:X1

PLAN CENTER:

IPD:

PROJECT MANAGER: Jim Mosca

CMP:

This project will fund and guide the TMAs & contractors that will work with employers & encourage commuters to choose travel alternatives to the single-occupancy vehicle (SOV) through educational programming & relevant products & services within specific areas.

The Transportation Management Associations (TMAs) and other related partners in Southeastern Pennsylvania have helped promote Transportation Demand Management (TDM) options and programs for over two decades, in the form of two grants funded by PennDOT the TMA Assistance Grant (one available to all TMAs in PA), and the Mobility Alternatives Program (MAP) grant (available only in Southeastern PA). For FY2023, DVRPC and PennDOT have created a TDM grant program that combines these two legacy grants into one new base TDM grant for each organization previously funded through one or both of the legacy grants. Each TMA/Contractor will contract and collaborate with DVRPC on work program development and implementation, along with their respective county planning department(s), PennDOT (Central Office and District- 6), and FHWA, to ensure relevant TDM issues and needs are addressed. Completion of this work may require the purchase of equipment or services.

#### Tasks

1. TDM education and outreach to the general public.
2. TDM education and outreach to employers and municipalities.
3. TDM education and outreach to other commute-related groups, professional organizations, community groups, etc.
4. Promotion of and assistance with the Share-A-Ride (SAR) ride match program and the Emergency Ride Home (ERH) program.
5. Locally-based projects that enhance commuters ability to choose a mode other than driving alone to work.

NHPP:

MUNICIPALITIES:

FC:

AQ Code:X1

PLAN CENTER:

IPD:

PROJECT MANAGER: Jim Mosca

CMP:

This project supports ongoing administration, strategic planning, and priority-setting work for the regional competitive Travel Options Program (TOP), which funds implementation of TDM projects in Southeastern PA.

In FY2021, DVRPC convened a new Regional TDM Advisory Committee with relevant partner agencies, which developed and help staff reach consensus on goals, objectives, and an initial Vision Statement for this new regional approach to prioritizing TDM strategies in the DVRPC region, and incorporating new efforts. This Committee also helped develop and prioritize strategies to guide the selected pilot projects for testing, and helped determine ways to measure performance and impact. This planning and administration work also includes ongoing peer/best practice assessment for successful historic and current TDM plans and programs, here and in other regions, and evaluation of current plans and data that can be used to inform new priorities.

This project can include development and oversight of competitive expression of interest (EOI) and project application process(es), and establishing tracking procedures for measuring the impact of the program's projects and tasks. It may include outreach on release of the EOI and subsequent updates on selected projects. DVRPC also manages the contracts and invoicing activities with each of the selected grantees under this program.

A performance-based and outcome-driven approach to developing, evaluating, selecting, and undertaking projects will help staff and stakeholders strengthen existing TDM programs, and determine new longer-term initiatives that can serve as a foundation for the regional TDM portfolio in future years. Completion of this work may require the purchase of equipment or services.

#### Tasks

1. Convene regular meetings and/or workshops of the Regional TDM Advisory Committee, comprised of DVRPC member governments, State DOTs, transit agencies, partner MPOs and others, as appropriate, to continue providing input to and support for the Regional TDM Program.
2. Manage administrative functions associated with grants and reporting, as well as contract management and accounting activities.
3. Based on the outcomes of funded projects, including pilot programs, and relevant TDM practice nationally, further develop and prioritize strategies and pilot programs for testing in the DVRPC region, as well as ways to measure performance. Document historic and ongoing TDM activities, in our region and nationally, as applicable, and consider relevant, available plans and data that can be used to inform new regional priorities for action.
4. In collaboration with multiple departments across DVRPC, continue to monitor and report on COVID-related travel and behavior changes and their implications for TDM strategies, as relevant.
5. Review and revise, if necessary, the Regional TDM Plan (vision, goals, outcomes, and strategies) for our approach to TDM in the DVRPC region. Maintain a living strategic plan of priority TDM projects that builds on current activities and success, and also cultivates new strategies for trial, evaluation, and growth.
6. Based on the outcome of initial pilot projects, continue to develop proposed 'early action' projects for advisory committee consideration, with programs added to PA and NJ TIPs as appropriate.

Upgrade and interconnect the signal controls at six intersections including incidental stormwater improvements, incorporating preference for SEPTA Route 36; narrow the roadway to accommodate pedestrians; and simplify three intersections. This project location is included in Philadelphia's Bike Network and is rated BF (Bike Friendly - wide shoulders or lanes).

This project is the complete reconstruction of a five span, concrete encased steel thru girder bridge over Amtrak's Northeast Corridor along with historically sensitive approach paving restoration, utility, and railroad electrification work. The new bridge will be a single span steel girder bridge founded atop new reinforced concrete abutments.

The existing bridge was built in 1913, has a Sufficiency Rating of 32.0 and is posted for a weight limit of 10 Tons. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

**FC:** 14

AQ Code:S19

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** George Dunheimer ADE CONSTR    **CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 3A

This project involves the rehabilitation of complex structures around 30th Street Station and over Amtrak's Northeast Corridor rail lines in the City of Philadelphia. There are six structures within the project limits. The work area includes Market Street and Little Market Street (S.R. 3010 and S.R. 3026), Arch Street (S.R. 3030), and Chestnut (S.R. 0003) between 30th Street and Schuylkill Avenue West. It also includes 30th St. Street (S.R. 3026) between Arch Street and Market Street. The roadways around the station are built on a structure to accommodate the railroad tracks (AMTRAK, SEPTA) and highway (I-76, Schuylkill Expressway) that pass underneath. Also, no changes to the horizontal or vertical geometry or clearances are anticipated. This affected section of Market Street is on the NHS.

The purpose of the project is to maintain and enhance safe and efficient transit to serve the existing and future transportation needs associated with the highly urban center of Philadelphia, PA. Areas of structural deterioration include deck joints, structural members with corrosion and fatigue cracks, and road deck calcification. Painting of existing structural steel is included. Extensive coordination with Amtrak is required for the substructure repairs between the tracks. The roadway surface and drainage capabilities will be improved on Market, Little Market and Chestnut Streets. On Arch Street and 30th Streets, surface improvements have previously been completed under a separate project and this project will only address rehabilitation of the substructures for these structures.

Traffic will be maintained during construction using staged construction methods. The deck configuration for the Market, Little Market and Chestnut Street structures entails a sub-deck as part of the encasement of the steel substructure. Membrane waterproofing and a concrete protective layer are on top of the sub-deck. Above the concrete protective layer is varying height fill, a level of concrete and a bituminous overlay. The project only entails milling and overlaying the bituminous in the roadway with full depth replacement at the joints and sidewalks.

The project is located in a rolling urban setting with a variety of industrial, commercial, and transportation land uses immediately adjacent to the project area. The area has a high level of pedestrian traffic to and from 30th Street Station and public bus stops. For Market and Little Market Streets, pedestrian enhancements will be incorporated as part of the City of Philadelphia's planned "Station Square" concept between 30th Street Station and the IRS Building (formerly housing the Post Office).

## Pennsylvania - Highway Program (Status: TIP)

### Philadelphia

**MPMS# 69828**      **Market Street Bridges (3) Over Schuylkill River and CSX Railroad (MSB) SR:3010**

**LIMITS:** Over Schuylkill River and CSX Railroad

Est Let Date: 8/24/2023

**IMPROVEMENT** Bridge Repair/Replacement

**NHPP:** Y

MRPID:245

**MUNICIPALITIES:** Center City Philadelphia; West Philadelphia

**FC:** 14

AQ Code:S19

**PLAN CENTER:** Metropolitan Center

IPD: 14

**PROJECT MANAGER:** AECOM/D. Didier

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 3A, 7A, 10A

This project involves the rehabilitation of the 2-span bridge carrying Market Street over the Schuylkill River, the replacement of the bridge carrying Market Street over the Schuylkill River Park and CSX railroad from a 4-span bridge to a 1-span bridge, and replacement of the 3-span Market Street bridge over I-76 at the Schuylkill Avenue West intersection in the City of Philadelphia.

The 2 span, 361'-long concrete encased steel arch bridge over the Schuylkill River was built in 1932 and is finished with limestone spandrel walls and fascia rings. Concrete urn-shaped balustrades and statues decorate the structure, although a quadrant of the balustrade has been filled with concrete. The bridge is significant as a contributing resource to the 30th Street Station Historic District. This bridge was previously determined eligible for listing in the National Register. The project includes the repairing and patching of the parapets and sidewalks as needed, replacement/repair of the deck and beams, and replacement of cobrahead lighting. The bridge is poor condition due to severe rust in in the substructure and spalling in the superstructure.

The 4 span, 216' long built up deck girder bridge over CSX railroad, built in 1932, is supported on concrete abutments and three steel pier bents, of which two are encased in concrete. This bridge was previously determined ineligible for listing in the National Register. This bridge will be replaced with a 1 span bridge with wider sidewalks.

The 3 span bridge over I-76 at the Schuylkill Avenue West intersection was built in 1932 and significantly modified in the late 1950s when I-76 was constructed. The bridge has significantly deteriorated and will be replaced.

Pedestrian and bicycle improvements are being coordinated with the City of Philadelphia throughout the project.

This project involves rehabilitating or replacing the bridge carrying Willits Road (S.R. 1011) over Wooden Bridge Run in the City of Philadelphia. The purpose of the project is to extend the service life of the existing structure. The existing structure has severely rusted components, large open spalls exposing rusted reinforced steel, and cracks with efflorescence. Work will include replacing or rehabilitating the existing superstructure and reinforced concrete overlay. The project could also include upgrades to the guiderail approaches.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project will resurface and rehabilitate the pavement on the bridge and all approach roadways. The project will also reconstruct and rehabilitate the bridge expansion joints on the suspension spans and approach spans. The project will also replace existing overhead guide signs on the bridge for eastbound traffic, and repair deteriorated concrete on the ceiling and walls of the 5th Street Pedestrian Tunnel.

The Benjamin Franklin Bridge (BFB) is a long span suspension bridge across the Delaware River that connects Philadelphia, Pennsylvania and Camden, New Jersey. The overall length of the structure from end to end is approximately 8,240 feet, and the roadway width is 77'-10". The bridge roadway carries seven lanes and the total average daily traffic is approximately 100,000 vehicles per day. The bridge was last resurfaced in 2004.

Rehabilitation of the poor condition; load posted bridge on John F. Kennedy (JFK) Boulevard between Market Street and 30th Street at 32nd Street over SEPTA double track (West Branch).

The current structure is posted for 15 tons based on the substructure condition. The proposed work includes deck and sidewalk repairs/replacement, joint replacement, steel superstructure and substructure repairs/replacement, zone painting of superstructure and substructure, possible bearing replacement, drainage upgrades, and concrete substructure repairs. The project will also include streetscape improvements such as bike lanes and street lighting upgrades. A feasibility study will be undertaken to examine relocation of the I-76 on/off ramps and traffic/pedestrian/transit circulation around 30th Street Station.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This is a breakout from MPMS #69828.

**FC:** 14

AQ Code:S6

**PLAN CENTER:**

IPD: 18

**PROJECT MANAGER:** Gannett/B. Masi

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 15A

This 4.0 mile corridor consists of Henry Avenue from Lincoln Drive (near the Wissahickon Creek) to Port Royal Avenue through Philadelphia's Roxborough neighborhood. Improvements will include: "hand/man" pedestrian signals at all locations; installing centerline rumble strips at all painted median locations where appropriate; performing selective tree removal where appropriate based on crash cluster information and will consider removing all trees from curbed median areas; installing reflective pavement markers to better delineate the travel lanes along the median and in between lanes; and installing enhanced signage. Many of the improvements to this corridor will not only improve safety and potentially reduce crashes but will also address congestion.

The anticipated benefits of this project are to: reduce the frequency of both reportable and non-reportable crashes that is occurring at the signalized intersections and mid-block locations; increase capacity at the signalized intersection for the daily peak travel periods; provide signal coordination to better manage traffic flows during peak periods and incidents; reduce the severity of the reportable crashes; and mitigate the crash clusters. The corridor improvements have been broken out to 2 separate projects. See companion project MPMS #102134.

This project involves rehabilitating or replacing the bridge carrying Roosevelt Boulevard US 1 over Roberts Road, Wayne Avenue Station, Clarissa Street, Germantown Avenue, and N. Gratz Street. The existing bridge is 2,589 feet in length and carries two 12-foot northbound lanes, three 12-foot southbound lanes, shoulders, and a center median barrier. The rehabilitation will include deck replacement, superstructure and substructure repairs, bridge painting, bearing maintenance, evaluation of pin & hangers, fatigue analysis, and seismic analysis. The project will be constructed under traffic. This project will also include the rehabilitation of the Fox Street Bridge over US 1.

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout from Section BSR (MPMS #47811 ).

This phase of SR 95 Section BSR covers the reconstruction of Aramingo Avenue from Church Street to Tacony Street, and the reconstruction of Harbison Avenue from Tacony Street to Torresdale Avenue, including traffic signal modifications at the following intersections:

- Aramingo Avenue at Orthodox Street
- Aramingo Avenue at Margaret Street
- Aramingo/Harbison Avenues at Tacony Street
- Harbison Avenue at Tacony Street/Wakeling Street
- Harbison Avenue at Tacony Street/Wakeling Street
- Harbison Avenue at Bridge Street
- Harbison Avenue at Torresdale Avenue

This project will construct a multi-use sidepath on the east side of Aramingo Avenue from Church Street to Orthodox Street and Margaret Street. The existing bicycle lanes and the sidewalk on the east side of Aramingo Avenue will be removed. Also, the area vacated by the removal of the southbound I-95 on-ramp in the BR4 project (MPMS #103559) will be converted to a community amenity. The existing veterans' memorial will be preserved. For an overall description of the SR 95 Section BSR section see MPMS #47811.

I-95 is a major facility built in the 1960s which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. More than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95 in Philadelphia for approximately eight miles between I-676/Vine Street and Cottman Avenue that PennDOT is currently working to improve in order to address critical repairs on aging bridges and interchanges, and improve traffic flow by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the particular construction section. This reconstruction of I-95 has been divided into various "sections" (including GIR, CPR, BSR, BRI, AFC, Congestion Management, and drainage projects) in over 30 separate MPMS #s, most of which appear in the Interstate Management Program (IMP), and some of which appear in the DVRPC Regional Highway Program of the TIP. MPMS #s for the overall corridor include: 17821, 47394, 47811, 47812, 47813, 79683, 79685, 79686, 79826, 79827, 79828, 79903, 79904, 79905, 79908, 79910, 79911, 79912, 80094, 83640, 87784, 98207, 102304, 102305, 102309, and 103553 through 103564. Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance. Related sections of I-95 Reconstruction: MPMS #'s 47811, 79908, 79910, 87784, 103562, 103563 and 103564.

\$10M out of an estimated \$60M (2021 CON estimate of \$41M YOE'd to FY34) is programmed for construction in FY34. The construction balance that is not shown in FY34 is in the Long-Range Plan.

This project is a breakout of MPMS# 69801, and will provide for the operation of emergency service patrols on congested state highways to detect and clear incidents rapidly by providing emergency assistance to stranded motorists. Approximately half of all delays experienced by highway users in congested areas are caused by traffic accidents, vehicle breakdowns, and other incidents. Prompt incident management programs such as this, can reduce delays significantly. Service will be provided on 30 linear miles including: I-76, I-95, and I-676 in Philadelphia.

PLAN CENTER:

IPD:

PROJECT MANAGER: George Dunheimer ADE CONSTR CMP: Minor SOV Capacity

This project is a congestion reduction and traffic flow improvement program. This project will continue the corridor timing program launched by the Philadelphia Streets Department in 2011. Starting with nine key corridors, the City has now advanced the retiming of over 30 corridors with local, state and federal funding, with at least 4 more currently pending.

The City will continue to conduct signal retiming along corridors throughout Philadelphia as funding allows, with the following sub corridors currently being advanced as part of this project:

- Adams Ave - Tookany Creek Parkway to Whitaker – 4 intersections – Excluding Tabor Ave
- Cecil B Moore Ave - 32nd to 8th. – 21 intersections – excluding Ridge Ave and Broad St
- Cedar Ave - 52nd to Cobbs Creek. – 11 intersections – excluding 52nd St
- Diamond St - 31st to 5th. – 21 intersections – excluding Ridge Ave and Broad St
- Elmwood Ave - 73rd to 57th. – 14 intersections – excluding 70th St
- Front St - Berks to York. – 6 intersections
- Kingsessing Ave - 46th to 65th.- 16 intersections – excluding 58th St
- Monument Ave - Ford to Target. – 3 intersections
- Oxford Ave - Frankford to Sanger. – 9 intersections
- Washington Ln - Morton to Limekiln. – 13 Intersections
- Wayne Ave - Windrim to Walnut. – 13 intersections – excluding Chelten Ave
- Girard Avenue – Lancaster Ave to 33rd St – 14 Intersections
- Market Street – 63rd St to 39th St – 24 intersections
- Packer Ave – 10th St to 7th St – 3 intersections
- Pattison Ave – 11th St to Front St – 6 intersections
- Darien Street – Hartranft St – 1 intersection
- Broad Street – Oregon Ave to 11st St – 11 intersections
- Front St – Oregon Ave to Pattison – 5 Intersections

Additional corridors may be added as funding allows and as new priorities are identified.

This project is a bridge replacement of 59th Street over AMTRAK in the City of Philadelphia.

The current structure was built in 1926, and consists of a four simple-span, partially concrete-encased-steel girder/floorbeam/jackarch superstructure atop reinforced concrete abutment and pier substructures. The anticipated work includes demolition and removal of the existing superstructure and portions of the existing reinforced concrete abutments & piers and construction of a new steel multi-girder bridge with reinforced concrete composite deck atop reinforced concrete abutments and piers; as well as roadway approach reconstruction and repaving, curb and sidewalk reconstruction, streetlighting improvements, ADA accessibility improvements, railroad electric traction (ET) system modification and utility relocations, and other related work.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project is a component of the County Bridge Line Item (MPMS #95447).

CMP Subcorridor(s): 5G

This project is a bridge rehabilitation/replacement of Tabor Road over Tacony Creek in the City of Philadelphia.

The bridge carrying Tabor Road over Tacony Creek is a three span, non-composite, adjacent box beam bridge that was built in 1957. Anticipated work includes demolition and replacement of the superstructure; rehabilitation of the existing reinforced concrete abutments, wingwalls, and piers; full depth pavement reconstruction of the bridge approaches; replacement of the parapet, railing, curb and sidewalk; reconstruction of ADA curb ramps; coordinated relocation of utility facilities; and other miscellaneous construction. Construction will be staged, allowing the bridge to remain open for traffic and avoiding the need for a lengthy detour. Temporary pedestrian and multi-use trail detours may be required.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project is a component of the County Bridge Line Item (MPMS #95447).

### Philadelphia

**MPMS# 102134** *Henry Ave Corridor Safety Improvements, Phase 2*

**LIMITS:** Henry Ave. from Abbotsford Avenue to Barnes Street

Est Let Date: 9/30/2021

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:** Y

**MUNICIPALITIES:** Philadelphia City

**FC:**

AQ Code:S6

**PLAN CENTER:**

IPD: 20

**PROJECT MANAGER:** Gannett/B. Masi

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 5G, 15A

This 1.6 mile corridor consists of Henry Avenue from Abbotsford Avenue to Barnes Street in Philadelphia's East Falls and Wissahickon neighborhoods. Improvements will include: "hand/man" pedestrian signals at all locations; installing centerline rumble strips at all painted median locations where appropriate; performing selective tree removal where appropriate based on crash cluster information and will consider removing all trees from curbed median areas; installing reflective pavement markers to better delineate the travel lanes along the median and in between lanes; and installing enhanced signage. Many of the improvements to this corridor will not only improve safety and potentially reduce crashes but will also address congestion, Geometric changes to a traffic island to reduce the turning radius for vehicles, Left turn lanes, A raised intersection, Bumpouts and medians, including sidewalk and ADA ramps, Roadway lighting, A shared-use bicycle and pedestrian path, High-friction surface treatments on horizontal curves, Pavement markings and signing, speed reduction pavement markings, Electronic speed feedback signs, Delineators and updated guide rail, Philadelphia Water Department drainage and water relocation, Interconnected and coordinated traffic signals, and Upgraded traffic signals including new mast arms, signal heads, pre-emption equipment, timing optimization with video and radar detection, and the addition of pedestrian countdown timers and accessible signals.

The anticipated benefits of this project are to: reduce the frequency of both reportable and non-reportable crashes that are occurring at the signalized intersections and mid-block locations; increase capacity at the signalized intersection for the daily peak travel periods; provide signal coordination to better manage traffic flows during peak periods and incidents; reduce the severity of the reportable crashes; and mitigate the crash clusters. The corridor improvements have been broken out to 2 separate projects. See companion project MPMS #80104. PE will be funded and completed under MPMS# 80104.

CMP Subcorridor(s): 10A

Part of the Schuylkill River Trail and the regional trail network, 'The Circuit,' this project will provide a bicycle and pedestrian connection between the Kingsessing and Grays Ferry neighborhoods of Philadelphia across the Schuylkill River, allowing users to access destinations and services throughout South and Southwest Philadelphia and Center City. Completing a river crossing in the vicinity of the Philadelphia, Wilmington & Baltimore Railroad Bridge No. 1, an abandoned swing bridge set in the 'open' position since its closing in 1976, will connect the recently completed Grays Ferry Crescent Trail with the Bartram's Mile Trail currently in design by Philadelphia Parks and Recreation, further connecting with the East Coast Greenway and Cobbs Creek Trail through the TIGER funded Bartram's Garden Trail and 58th Street Connector. The project will utilize portions of the abandoned bridge to construct a multi-purpose bicycle and pedestrian trail structure, replacing the main truss with a smaller, lighter movable span to maintain access for river traffic and reconstructing approach spans on both sides of the river including on-grade approaches. The crossing will also accommodate emergency vehicles. A conceptual study and initial engineering has been completed by the Schuylkill River Development Corporation (SRDC) with funding from DVRPC's Regional Trails Program and the Pennsylvania Department of Conservation & Natural Resources (DCNR).

The Circuit is a 750-mile interconnected network of multi-use trails spanning Greater Philadelphia with Philadelphia and Camden as its hub, and is included in DVRPC's Long-Range Transportation Plan. Circuit trails will generally meet minimum design standards (10-foot wide, paved, and separated from traffic) to reflect their intended use as the arteries of a dedicated regional non-motorized transportation system. Circuit trails located near and connecting to downtown Philadelphia are already used heavily for transportation purposes, and the implementation of the network will further encourage the surging growth of bicycle commuting in the region. At 2.3%, Philadelphia has the highest bike-to-work percentage of the 10 largest cities in the country according to the 2013 American Community Survey.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project has been awarded \$3,265,000 in Federal TIGER grant funding which will be used for construction.

## Pennsylvania - Highway Program (Status: TIP)

### Philadelphia

**MPMS# 103563** I-95: Delaware Avenue Extension (BS5)

**LIMITS:** N. Delaware Ave. Extension from Buckius St. to Tacony St.

Est Let Date: 12/14/2023

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:**

MRPID:65

**MUNICIPALITIES:** Philadelphia City

**FC:**

AQ Code:2035M

**PLAN CENTER:**

IPD: 21

**PROJECT MANAGER:** AECOM/P. Shultes

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

The BS5 section is a part of the I-95 Reconstruction, SR 0095 Section BSR, also known as the Bridge Street Ramps section. This phase of SR 95 Section BSR covers the 1.3 mile extension of North Delaware Avenue from Buckius Street to Tacony Street. The project includes a new bridge over Old Frankford Creek. A roadway connection from the North Delaware Avenue Extension to the vicinity of the Richmond Street/Bridge Street intersection will be investigated. Also included is a section of the East Coast Greenway multi-use trail from Buckius Street to the K&T Trail on the north side of Old Frankford Creek.

The northern terminus of the Delaware Avenue Extension is Tacony Street at the location of two relocated ramps from the I-95 Bridge Street Interchange. There will be a southbound off-ramp to Tacony Street/North Delaware Avenue and a companion on ramp to I-95 northbound.

For an overall description of the SR 95 Section BSR section, see MPMS #47811.

I-95 is a major facility built in the 1960s which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. More than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95 in Philadelphia for approximately eight miles between I-676/Vine Street and Cottman Avenue that PennDOT is currently working to improve in order to address critical repairs on aging bridges and interchanges, and improve traffic flow by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the particular construction section. This reconstruction of I-95 has been divided into various "sections" (including GIR, CPR, BSR, BRI, AFC, Congestion Management, and drainage projects) in over 30 separate MPMS #s, most of which appear in the Interstate Management Program (IMP), and some of which appear in the DVRPC Regional Highway Program of the TIP. MPMS #s for the overall corridor include: 17821, 47394, 47811, 47812, 47813, 79683, 79685, 79686, 79826, 79827, 79828, 79903, 79904, 79905, 79908, 79910, 79911, 79912, 80094, 83640, 87784, 98207, 102304, 102305, 102309, and 103553 through 103564. Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. Related sections of I-95 Reconstruction: MPMS #s 47811, 79908, 79910, 87784, 103562, 103563 and 103564.

MPMS# 105092 Citywide Resurfacing 104

LIMITS: City of Philadelphia

Actl Let Date: 4/12/2018

IMPROVEMENT Roadway Rehabilitation

NHPP:

MUNICIPALITIES: Philadelphia City

FC:

AQ Code:S10

PLAN CENTER:

IPD:

PROJECT MANAGER: PWB/V. Fleish

CMP:

The primary purpose of this project is to restore roadway surfaces to fully functional and optimal conditions; provide smoother riding surfaces for enhanced traffic movement; install pavement markings for better direction for motorists, bicyclists, and pedestrians; and to upgrade non-compliant ADA ramps at crosswalks to current standards. The work will increase the service life of these roadways and reduce future maintenance costs.

All street segments will be milled and resurfaced with bituminous material and restriped. Any ground disturbance will occur within the existing right-of-way and will be limited to the cartway and sidewalks in the various corridors. In most cases, pavement restoration in the disturbed areas will match existing pavement types.

Potential candidates for this resurfacing package include:

- 5th St. - Lehigh Ave. to Luzerne St.; G001, Minor Arterial
- 40th St. - Baltimore Ave. to Girard Ave.; G080, Urban Collector
- Bainbridge St. - Broad St. to Grays Ferry Ave.; G022, Urban Collector
- Enterprise Ave. - Island Ave. To I-95; G178, Minor Arterial
- Green Ln - Main St. to Ridge Ave.; G558, Minor Arterial
- Island Ave. - Penrose Ave. to Enterprise Ave.; G178, Minor Arterial
- Krewstown Rd. - Grant Ave. to Rising Sun Ave.; G497, Minor Arterial
- Leverington Ave. - Main St. to Ridge Ave.; G114, Minor Arterial
- Morrell Ave. - Academy Rd. to Frankford Ave.; G701, Urban Collector
- South St. - Broad St. to Front St.; G018, Minor Arterial/Principal Arterial

## Pennsylvania - Highway Program (Status: TIP)

### Philadelphia

**MPMS# 105290** *Ben Franklin Bridge Eastbound Operational Improvements*

**LIMITS:** Eastbound approach to the Ben Franklin Bridge; vicinity of 5th St & 6th St

No Let Date

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:** Y

**MUNICIPALITIES:** Philadelphia City

**FC:**

AQ Code:R3

**PLAN CENTER:** Metropolitan Center

IPD: 13

**PROJECT MANAGER:** HNTB/N. Velaga

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 3A, 10A, 14A

This project will improve traffic operations on the eastbound approaches to the Benjamin Franklin Bridge, and improve the safety and connectivity of the pedestrian and bicycle facilities within the approach areas.

Currently, eastbound traffic enters onto the bridge from three local streets; Sixth Street, Race Street (SR 3032) and Fifth Street, Three or four lanes are provided on the bridge in the eastbound direction, depending on the configuration of the movable barrier. Three travel lanes are available during the morning peak period and four travel lanes during the evening peak period. Existing operations create vehicular conflicts, reduced speeds and congestion created by high volumes.

Pedestrians and bicycles within the vicinity of the eastbound approach are confronted with several, uninterrupted traffic streams and a lack of clearly defined crossings. Pedestrians and bicycles destined for the bridge or the Philadelphia Plaza use inappropriate routes, creating conflicts with vehicular traffic.

Proposed improvements include realigning the Fifth Street approach north of Race Street to intersect with the Race Street approach at a new, signalized intersection. Shifting the Fifth Street intersection to the west can improve the turning radius for larger vehicles, and eliminate the need to dedicate Lane 7 on the Bridge for the exclusive use of the Fifth Street approach. A mountable concrete island is proposed to separate the Fifth Street/Race Street approach from the Sixth Street approach. Proposed improvements also include signage to direct pedestrians and bicycles to appropriate routes, and barriers to reduce potential conflicts with vehicular traffic.

AQ Code:A2

PLAN CENTER:

IPD: 17

PROJECT MANAGER: EE/E. Elbich

CMP: Not SOV Capacity Adding

CMP Subcorridor(s): 4B, 10A

This project creates an innovative complex of a cap structure, viaduct, road, and trail structures that re-establish a strong connection between central Philadelphia and its waterfront, while making multi-modal enhancements that improve the transportation experience for pedestrians, cyclists, and vehicles. The new cap/bridge structure will span both I-95 and Christopher Columbus Boulevard between Chestnut and Walnut Streets, providing more direct access to the waterfront.

The scope of this project includes 5 major components: 1) replacing and expanding the existing cap/bridge structure near Penn's Landing and constructing a new, extended cap/bridge structure which will span both I-95 and Christopher Columbus Boulevard between Chestnut and Walnut Streets for pedestrian and vehicular use (note the current cap extends from Chestnut Street to Sansom Walk, and only Chestnut Street and Walnut Street span Columbus Boulevard); 2) extending the South Street pedestrian bridge from the east edge of I-95 northbound over Columbus Boulevard to Penn's Landing; 3) reconstructing the viaduct connection between Chestnut and Market Streets at Penn's Landing; 4) constructing a section of the Delaware River Trail along Christopher Columbus Boulevard; and 5) inspection and repairs of underwater concrete piles located in the Penn's Landing area.

Note that \$60 million local funds will be provided by the City of Philadelphia via bonding for structure construction, and a series of private contributions will be made available for the project: \$25 million for amenities; and \$20 million for reconstructing the viaduct connection between Chestnut and Market Streets at Penn's Landing.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project provides for technical and planning assistance to PennDOT District 6 for support in implementation of the I-95 Reconstruction Projects. DVRPC will be "on call" for quick-turnaround analysis or data collection tasks in support of specific and timely I-95 project planning needs. Tasks will include data collection, meeting and stakeholder coordination, and general research as needed. Subject areas include congestion mitigation strategies, as well as transit, Transportation Management Association, environmental, freight, historic, and bicycle/pedestrian issues. District 6 has limited planning staff, while DVRPC planning staff has multiple areas of expertise which are beneficial for this work and have been utilized in the past.

Tasks:

- 1.Facilitate discussion and prioritization with SEPTA on capital improvements to mitigate congestion on I-95 during and beyond the reconstruction project timeline; provide sketch-level benefit/cost analysis of proposed improvements.
- 2.Coordinate implementation of recommended strategies developed from the DVRPC Alternatives Development for Roosevelt Boulevard Transit Enhancements study.
- 3.Coordinate implementation of recommended strategies developed from the DVRPC Improving Non-motorized Access to Regional Rail Stations on the I-95 Corridor study.
- 4.Coordinate implementation of recommended strategies developed from the Bucks County Planning Commission on bicycle and pedestrian access to stations in Lower Bucks County on SEPTA's West Trenton Line.
- 5.Facilitate coordination between SEPTA, Amtrak, PennDOT, and other agencies.
- 6.Coordinate communications and outreach activities with the TMAs, particularly with TMAs in Center City, and Bucks and Delaware counties.
- 7.Assist with bicycle and pedestrian planning and coordination efforts in the I-95 corridor.
- 8.Assist with trail alignment and coordination efforts for trails along the I-95 corridor, especially for portions related to the East Coast Greenway.
- 9.Assist with environmental mitigation efforts and context sensitive planning related to the I-95 reconstruction projects.
- 10.Assist with coordination of historical preservation efforts related to the I-95 reconstruction projects.
- 11.Coordinate with freight industry representatives on construction activities and detour routes.
- 12.Provide mapping and Geographic Information Systems (GIS) support as requested.
- 13.Provide support in coordinating and developing legal agreements, as needed.

Est Let Date: 7/13/2023

**IMPROVEMENT** Intersection/Interchange Improvements

**NHPP:**

**MUNICIPALITIES:** Philadelphia City

**FC:**

AQ Code:2025M

**PLAN CENTER:**

IPD: 28

**PROJECT MANAGER:** Traff/A. Patel

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 4B

The project will implement the PennDOT Intersection Safety Plan (ISIP) at specific intersections through the corridor. The project will also systematically implement low-cost improvements at signalized intersection including signage, pedestrian countdown timers, audible peds (where appropriate), pavement markings, ADA ramps and intersection lighting. The project will improve signal design by upgrading signal heads, upgrading control boxes and upgrading mast arms. Replacing the existing outdated signal controllers results in the need to address coordination along the corridor, and installing interconnect to ensure effective progression along this corridor of closely spaced traffic signals to help mitigate congestion-related crashes, minimize aggressive driving, and operate the corridor on a real-time basis from the City's new Traffic Operations Center. The project will also include the installation of curb extensions as traffic calming measures at select documented problematic locations to improve pedestrian safety.

The limits of the signalized interconnect is Frankford Avenue from Girard Avenue to Knights Road.

Dock Street, Spruce Street, 38th Parallel Place and Front Street are all Federal Aid Network segments surfaced with historic granite block or "Belgian Block" pavers. All street segments will have granite block reset and regouted as needed along with necessary base repairs and accessibility improvements. The primary purpose of the project is to restore roadway surfaces to fully functional and optimal conditions; to provide smoother riding surfaces for enhanced traffic movement; to install pavement markings for better direction for motorists, bicyclists, and pedestrians and to upgrade noncompliant ADA ramps at crosswalks to current standards. In most cases, pavement restoration in the disturbed areas will match existing pavement types.

Streets/Project Boundaries:

Dock Street (G307/G710) from 2nd Street to Christopher Columbus Boulevard

38th Parallel Place (G307) from Dock Street to Spruce Street

Spruce Street (G008) from 38th Parallel Place to Christopher Columbus Boulevard

Front Street (G005) from Vine Street to Ellen Street

This project will include the design and construction of ADA ramps that were transitioned from other Federal Aid projects, including, but not limited to, Center City SE Quad Signals (MPMS #17655), Passyunk Ave Signals (MPMS #16987), 52nd St. Streetscape (MPMS #17829), Citywide Resurfacing 103 (MPMS #91837), and various streetscape projects; and as well as ramps located on Center City Philadelphia Federal Aid routes that were repaved with local funding. The ramps would have typically been included as design build items in the project contracts, however, in some instances, the urban context of the ADA ramp locations warrants further coordination or study. To allow the original construction projects to proceed in a timely fashion, these ramps were pulled from the original construction contracts, and will now be addressed as part of this transition project. This will allow the City to design and construct the ramps to current ADA requirements while providing for stairs, cellar doors, unique paving materials, adjacent historic properties and other considerations as necessary.

This project is for improvements to the Falls Road Bridge in Philadelphia to extend its useful life. The bridge is currently considered in poor condition, with a five-ton posted weight limit and a sufficiency rating of 13, and will continue to deteriorate without rehabilitation. Anticipated work includes demolition and replacement of the existing deck and floorbeams, bearing replacement, repairs to existing stone abutments, repairs to select steel truss members and pins, repainting of existing superstructure steel, full depth roadway reconstruction & limited repaving, curb & sidewalk reconstruction (including ADA curb ramp construction), street lighting improvements, and other miscellaneous construction. The current cross-section will be maintained, as will the significant character-defining features of this National Register-eligible structure.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project is a component of the County Bridge Line Item (MPMS #95447).

MUNICIPALITIES: Philadelphia City

FC:

AQ Code:S19

PLAN CENTER:

IPD: 14

PROJECT MANAGER: TSS/RKK/C. Carmichael

CMP: Not SOV Capacity Adding

CMP Subcorridor(s): 3A

The purpose of this project is to rehabilitate the MLK Drive (formerly West River Drive/Spring Garden St. Lower) Bridge over the Schuylkill River near Center City Philadelphia. Work will include complete bridge deck replacement, new expansion joints, new scuppers and down spouting, new bearings, bridge painting, and limited substructure repair. The single 5 ft. sidewalk, used by both pedestrians and bicycles, will be widened to accommodate a normal width, multi-use bike path. The bridge is currently posted for 33 tons with a sufficiency rating of 48. This work is necessary to remove the current posting and prevent continued deterioration that could lead to further restrictions.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

### Philadelphia

MPMS# 110314 30th Street Viaduct over 30th Street Lower (Bridge)

LIMITS: Market Street and Walnut Street

Est Let Date: 2/20/2025

IMPROVEMENT Bridge Repair/Replacement

NHPP:

MUNICIPALITIES: Philadelphia City

FC:

AQ Code:S19

PLAN CENTER:

IPD: 14

PROJECT MANAGER: TSS/RKK/C. Carmichael

CMP: Not SOV Capacity Adding

CMP Subcorridor(s): 3A, 10A

The purpose of the project is to rehabilitate the 30th Street Viaduct over 30th Street Lower between Market Street and Walnut Street to extend the useful life of the bridge. Work is planned to include deck replacement, superstructure and substructure cleaning & repair, and possible further rehabilitation. The underside of the bridge superstructure will be cleaned and repainted, with steel repairs as necessary. The bridge's drainage system will also be replaced and upgraded as needed. Recent bridge repairs have revealed accelerated deterioration of the structure, which will continue to worsen without rehabilitation, and could result in eventual weight restrictions or closure. Recent high-density development in the area has increased use of the viaduct, and pending future developments in the 30th Street Station area will further increase its importance, making future restrictions or closures highly disruptive.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project will construct the first phase of the South Broad Street sidepath from the Navy Yard to Pattison Avenue in South Philadelphia.

The South Broad Street sidepath will connect NRG Station (formerly named Pattison Avenue and AT&T Station) to the Navy Yard through a sidepath on the west side of South Broad Street. The sidepath will run from Hartranft Street to the Navy Yard entrance at League Island Boulevard. To accommodate the sidepath near the Terminal Avenue intersection, the southbound lane configuration will be converted from two (2) left turn lanes and two (2) through lanes to one (1) left turn lane, one (1) shared left/through lane, and one (1) through lane. The project also proposes to include appropriate lighting, pavement markings and signage, and an upgrade of ADA facilities.

# DVRPC FY2023-2026 TIP for PA

## Pennsylvania - Highway Program (Status: TIP)

### Philadelphia

MPMS# 112500 Citywide 3R 110

LIMITS: City of Philadelphia

Est Let Date: 3/16/2023

IMPROVEMENT Roadway Rehabilitation

NHPP:

MUNICIPALITIES: Philadelphia City

FC:

AQ Code:S10

PLAN CENTER:

IPD:

PROJECT MANAGER: PWB/VLF/V. Fleysch

CMP: Not SOV Capacity Adding

The intent of a '3R' project is to restore roadway surfaces to fully functional and optimal conditions while making whatever improvements are necessary to bring the roadway up to current standards. Typical components include base repair, milling & overlay, drainage improvements, signal modernization, and guiderail improvements. All street segments except Barnett Street and Elbridge Street will be resurfaced with bituminous material and restriped. Barnett and Elbridge, currently existing concrete roadways, will receive base repair and will be considered for a possible asphalt overlay. All ground disturbance will occur within the existing right-of-way. This project will provide smoother riding surfaces for enhanced traffic movement; install pavement markings for better direction for motorists, bicyclists, and pedestrians, and upgrade non-compliant ADA ramps to current standards. Bike lanes will be included as the road widths allow. Broad Street, Front Street, and portions of Belfield & Gray's Ferry Avenues are part of the National Highway System (NHS).

Streets included in this package include:

- North 2nd Street (G168) Old 2nd Street to Cheltenham Avenue (Minor Arterial)
- North 5th Street (G001) Luzerne Street to Roosevelt Boulevard (Minor Arterial)
- North 5th Street (G001) Spring Garden Street to Lehigh Avenue (Minor Arterial)
- 61st Street (G095) Passyunk Avenue to Lindbergh (Minor Arterial)
- 70th Street (G069) Essington Avenue to Cobbs Creek Parkway (City Limit) (Minor Arterial)
- Algon Avenue (G123) from Levick Street to Cottman Avenue (Minor Arterial)
- Barnett St (G060) from Tacony Street to Levick Street (Minor Arterial)
- Belfield Avenue (G248) from Old York Road to Baynton Street (Principal Arterial/Collector)
- North Broad Street (G703) Old York Road to Cheltenham Avenue (Principal Arterial)
- Byberry Road (G193/G197) Philmont Avenue to Roosevelt Boulevard (Minor Arterial)
- Elbridge Street (G060) Levick Street to New State Road (Minor Arterial)
- Front Street (G005) Oregon Avenue to Pattison Avenue (Principal Arterial)
- G Street (G495) from Hunting Park Avenue to Wyoming Avenue (Collector)
- Grays Ferry Avenue (G016/G021) South St. to 34th St. (Principal Arterial/Minor Arterial)
- Haldeman Avenue (G200) Red Lion Road to Bustleton Avenue (Collector)
- Lansdowne Avenue (G064) Cobbs Creek (City Limit) to Lancaster Avenue (Minor Arterial)
- Montgomery Drive (G082) Martin Luther King Jr. Dr. to Belmont Ave. (Minor Arterial)
- Powelton Avenue (G020) Market Street to 31st Street (Collector)
- Race Street (G010) from Broad Street to 8th Street (Minor Arterial)
- Rising Sun Avenue (G056/G003) from Broad Street to Luzerne Street (Collector)
- Rowland Avenue (G496) Cottman Avenue to Solly Avenue (Minor Arterial/Collector)
- South Street (G018) 27th Street to Broad Street (Minor Arterial)
- Woodland Ave. (G726/G097) Baltimore Ave to Grays Ferry Ave (Principal/Minor Arterial)
- Woodland Avenue (G097) South 49th Street to Island Avenue (Minor Arterial)

IMPROVEMENT Roadway Rehabilitation

NHPP:

MUNICIPALITIES: Philadelphia City

FC:

AQ Code:S10

PLAN CENTER:

IPD:

PROJECT MANAGER: PWB/VLF/V. Fleysch

CMP: Not SOV Capacity Adding

This "Transition List" project will include the design and construction of ADA ramps that were originally included in the scope of other federal aid projects – primarily Center City Signals NE Quad (MPMS# 70014), completed in 2017, and the cancelled Citywide Bumpouts project (MPMS# 64805) – as well as various streetscape projects and ramps located on select Federal Aid routes that were repaved with local funding. These ramps typically would be included as design build items in the original project contracts, however, in some instances, the urban context of the ADA ramp locations warrants further coordination or study. To allow the original construction projects to proceed in a timely fashion, these ramps were pulled from the original construction contracts and will now be addressed as part of this transition list package. This will allow the City to design and construct the ramps to meet current ADA requirements while properly providing for stairs, cellar doors, unique paving materials, adjacent historic properties and other considerations as necessary.

Roosevelt Blvd Crossover Lanes  
Philadelphia  
Modification of crossover lanes

This project will aim to improve traffic flow and reduce congestion for vehicles and buses along Roosevelt Boulevard. This will be accomplished through modifying crossovers at six locations, offsetting left hand turns at Grant Avenue, and intersection improvements at Woodhaven Road off ramp to Roosevelt Boulevard Northbound. Crossover locations include:

- 1) Revere Street, includes mid-block pedestrian crossing and pedestrian signal
- 2) Winchester Avenue
- 3) Fulmer Street
- 4) Michener Street
- 5) Strahle Street
- 6) Faunce Street

**CMP:** Not Yet Determined

This Interactive Highway Safety Design Model (IHSDM) study will look at two sample sections, which are being selected as representative of Roosevelt Boulevard north end and south end of the Boulevard. These two selections have curves and high ADT intersections within them and do represent Roosevelt Boulevard as a whole. Due to the high estimate for an IHSDM study to be completed for an entire corridor it was decided to choose these sections as a first studies area. First area is F Street to Pratt Street. Second area is Grant Avenue to Red Lion Road.

**FC:**

AQ Code:2035M

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:**

**CMP:** Minor SOV Capacity

CMP Subcorridor(s): 5F, 7A, 10A

The proposed scope of this project include:

- Adding lane lines on corridor – the corridor is two lanes in each direction for the majority of the length but pavement markings are not currently visible to drivers.
- Upgrading signal equipment by replacing 8” signal heads with 12” signal heads, installing retroflective back plates, adding additional signal heads (one for each lane, currently only one head per approach), installing countdown pedestrian signal heads.
- Evaluating and updating left-turn phasing at several intersections with a high number of angle crashes for left-turning vehicles.
- Evaluating and updating vehicle and pedestrian clearance timings.
- Convert the signalized intersection of Cobbs Creek Parkway (SR 3015) and Spruce Street/Marshall Road (SR 3031) to a single-lane roundabout.

The goal of this project is to develop a tool that can accurately quantify impacts of new, mixed-use developments in terms of total person-trips generated and mode shares of vehicular, transit, bicycle, and pedestrian; collect necessary data and apply and validate the tool for Philadelphia County. Phase I will focus on the software development. Phase II will be the model estimation and validation tasks, specifically to determine AM and PM peak period person trip rates for mixed-use developments in Philadelphia as a function of locations, dwelling units, parking supply and retail employment.

PROJECT MANAGER: Jim Mosca

CMP:

This project will support the key policies of Connections 2050 by ensuring a diverse and competitive regional and local economy by encouraging reinvestment in the region by coordinating regional transportation, land use, redevelopment, and economic development.

At the regional level, staff will continue to lead, participate, and support economic development investment strategies in the region; including managing and maintaining the regions Comprehensive Economic Development Strategy (CEDs), as required by the US Economic Development Administration (EDA). Tasks may include completing and submitting the CEDs updates to EDA, amending the list of vital projects as appropriate, assisting in grant applications to EDA, and working with federal and regional partners to identify how to best advance the CEDs goals. To continue to comply with EDA guidelines, staff will explore the regions vulnerability with regard to a major economic downturn caused by natural events, loss of a major employer, pandemic or similar major health crises, or international trends. Staff will continue to engage and build partnerships with US EDA and other economic development practitioners and provide for potential US EDA funding applications. Additional activities may include convening economic development partners for project development and reaching out to county partners outside of the DVRPC service area. Staff will continue to analyze employment and industry data and report on regional trends and any other data requests as part of our economic analyses supporting the long-range plan and CEDs.

Rating the Region: Staff will provide updated data and analysis for the regional comparisons report (Rating the Region), as part of our Connections 2050 efforts, by collaborating with long-range planning staff to add the Rating the Region indicators to DVRPCs existing Tracking Progress dashboard. Indicators for the regional CEDs will also be combined with the Tracking Progress indicators to expand the Tracking Progress dashboards scope. Updates will be made to increase user accessibility and readability.

Access to Tourist Destinations: Staff will continue to identify livability and sustainability strategies to tie the quality and location of transportation facilities to multi-modal accessibility of tourist destinations and employment. Tasks may include working with local communities to make better use of their tourist destinations, convening tourism stakeholders in the region, and addressing multi-modal feasibility to tourist destinations.

Camden County Missing Middle Housing: Since many of the regions mature communities face social, economic, transportation (motorized and nonmotorized), and infrastructure challenges, staff will continue community development and revitalization efforts that strive to implement Connections 2050, and assist with investment and equitable development strategies at the local level. Specifically, staff will collaborate and assist on the Housing Initiative developing specific case studies in Camden County on missing middle housing. As part of the Housing Initiative, staff will use the Regional Economic Development Forum (RCEDF) to provide outreach to communities highlighted in the identified case studies to discuss the research and best practices.

Retail Districts: Staff will continue to monitor community resilience, specifically for the regions identified retail districts and downtowns to address pandemic recovery needs. This may include zoning recommendations, street design flexibility, and/or convening stakeholders. The retail district typology work will continue to be evaluated and enhanced.

Roebing Steel Plant Land Use and Feasibility Study (Florence Township, Burlington County, NJ): Staff will assist on the Roebing Steel Plant Land Use and Feasibility Study to determine the highest and best use of this brownfield transit-oriented development, including market feasibility. Tasks may include land use and zoning research, census and retail data collection, regulatory document research, and outreach including stakeholder interaction and presentations.

Regional Community and Economic Development Forum (RCEDF): Staff will hold a minimum of two but up to four meetings of the Regional Community and Economic Development Forum (RCEDF). At least two meetings will be used for the Housing Initiative case study outreach meetings. The RCEDF facilitates networking and coordination between the region's transportation, economic development, and land use planning professionals on issues of regional importance; fosters greater cooperation between agencies; and strives to coordinate regional transportation and land use planning activities with the needs of the economic development community.

TCDI: Program administration of the Transportation and Community Development Initiative (TCDI) grant program will continue. FY 2023 will include project solicitation for eligible New Jersey communities with project selection in spring 2023. Projects will then be managed by DVRPC staff and this will include all tasks related to procurement, invoicing, progress reports, and outreach meetings, as necessary. Staff will continue to maintain the TCDIdirect (project management) database specifically providing project management for previously awarded FY22 Pennsylvania projects.

Municipal Outreach: Staff will continue municipal outreach through educational events and workshops. These events provide Certification Maintenance (CM) credits for American Institute of Certified Planners (AICP) members. Staff will maintain the Municipal Funding Resource (MFR) which provides a list of grant programs for stakeholders. The MFR is a shared online database with our county partners that enables

## Pennsylvania - Highway Program (Status: TIP)

### Philadelphia

each to share programs and opportunities.

Completion of this work may require the purchase of equipment and data services.

#### Tasks

1. Work with EDA and regional stakeholders on the development of the regional CEDS.
2. Maintain the economic development webpage and subpages with current data.
3. Update Tracking Progress interface to include regional and CEDS-related economic development indicators.
4. Analyze multi modal access to tourist destinations.
5. Assist on the Camden County Housing Missing Middle analysis.
6. Identify and engage local stakeholders and community leaders, as well as provide local technical assistance to communities on revitalization strategies through educational events and workshops.
7. Provide analysis on the Roebling Steel Plant Land Use and Feasibility Study.
8. Convene a minimum of two (2) but up to four meetings of the Regional Community and Economic Development Forum (RCEDF). Two meetings specifically for the Housing Initiative outreach and case studies.
9. Develop the FY 23 TCDI Program Guidelines and updated webpage.
10. Maintain the TCDI Direct project management database.
11. Deliver Municipal Outreach presentations as requested.
12. Provide AICP CM credits as requested.
13. Work with county partners to maintain the Municipal Funding Resource Database.

#### Products

1. CEDS Key Regional Economic Development Project Database.
2. Memos or products as requested by US EDA (as it pertains to our pending Economic Development District (EDD) status), as well as EDA support letters for potential funding applicants.
3. Economic Data bulletins and/or Snapshots.
4. Updated Tracking Progress dashboard that includes metrics to compare regions.
5. Technical memo on increasing multimodal access to tourist destinations.
6. Deliverable/Report on Camden County Missing Middle Housing.
7. Retail District analysis.
8. Roebling Steel Land Use and Feasibility Study deliverable(s).
9. Minutes of the Regional Economic Development Forum Meetings (RCEDF)
10. FY 23 TCDI Program Guidelines and updated webpage.
11. TCDI Direct project management database.
12. Municipal Outreach presentations as requested.
13. AICP CM credit event surveys.
14. Municipal Funding Resource Database.

This project will ensure the timely selection and delivery of traditional and non-traditional local projects in an effort to enhance the transportation system within our region.

Funding from a Transportation Improvement Program line item enables DVRPC staff to assist PennDOT with the implementation of traditional and non-traditional projects by serving as adjunct project and program managers. This assistance will generally involve facilitation and coordination among the project sponsor and their team, local governments, the public, the PennDOT district office, PennDOTs central office staff, and the FHWA in order to develop a project to the point of construction.

The current federal authorizing legislation for highways and transit includes funding for bicycle and pedestrian transportation projects such as multi-use trails, streetscapes, bike lanes and historic transportation structure restorations, as well as projects that contribute to the attainment of the Clean Air Act by reducing emissions from highway sources. The three current categories of federal funding for these non-traditional transportation projects are: Transportation Alternatives Set Aside, Congestion Mitigation and Air Quality, and the Surface Transportation Program.

TIP funds are also provided to the sub-regions through the Local Concept Development, Local Lead, and Highway Safety Improvement Programs in New Jersey. The goal of the Local Concept Development program is to complete a study that identifies potential alternatives, identifies any environmental issues, and completes a conceptual design. This will ensure that projects that move into Preliminary Engineering are ready to move forward in a timely manner and are eligible for inclusion in the State Transportation Improvement Program (STIP). As part of this work, staff will also continue to assist counties and municipalities with Federal Aid Highway Program requirement compliance. Completion of this work may require the purchase of equipment or services.

For more information, see the following website: <http://www.dvrpc.org/ProjectImplementation/>

#### Tasks

1. For each program, as appropriate, establish a Steering Committee and develop a process for project application and selection.
2. Develop project application and guidance materials in coordination with the DOTs. Establish evaluation criteria and process. Solicit, screen, and evaluate candidate projects.
3. Conduct public information sessions, respond to questions, and provide assistance to applicants, as appropriate.
4. Recommend selected projects to the DVRPC Board.
5. Prepare requests for proposals, solicit proposals, and in concert with the appropriate county, evaluate proposals received.
6. Prepare consultant selection documentation and files, when required.
7. Prepare consultant agreements, establish accounting procedures, arrange methods of progress, and expenditure reporting, when required.
8. Coordinate activities leading to the implementation of the project within its planned time frame, maintain costs within the budget, and ensure that applicable federal and state standards are observed.
9. Submit the consultants final documents to the DOTs for approval. DVRPC, in cooperation with the DOTs, will prepare and submit when required, the appropriate documents for federal approval on each project phase.
10. Work with the DOTs to update schedules, costs, and statuses of each project in the respective DOT system, as needed.
11. Prepare status reports that will be posted on the DVRPC website.

**PROJECT MANAGER:** Jim Mosca

**CMP:**

This project will ease traffic congestion and improve the efficiency of existing transportation facilities and services through enhanced coordination and integration of Intelligent Transportation Systems (ITS) with Transportation Systems Management and Operations.

Federal metropolitan planning regulations require MPOs to incorporate transportation operations into their transportation planning processes. DVRPC addresses that requirement through the conduct of two longstanding related initiatives. The Transportation Operations Program Area (23-52-050) and the Transportation Systems Management and Operations Project highlight key activities undertaken by these programs. The Transportation Systems Management and Operations (TSMO) Project incorporates strategies to help proactively manage the transportation system by addressing recurring and nonrecurring congestion. Strategies such as traffic incident management, traveler information services, safety service patrols, work zone management, and freight management improve system efficiency, enhance public safety, help reduce traveler delays and improve information access. Successful integration of these and other TSMO strategies will help to make the region more cohesive, and enhance communications and collaboration among transportation partners.

DVRPCs TSMO program encompasses a wide range of activities including the coordination of multi-agency regional initiatives. Its centerpiece is the Regional Integrated Multi-modal Information Sharing (RIMIS) project, an information exchange network functioning as the communications backbone among transportation operation centers throughout the region. A virtual video wall component allows operations center and field personnel to view traffic video feeds in the region.

RIMIS became operational in 2010 and since it is managed by the same developer as the NJDOT system, it automatically receives incident and operational information from NJDOTs database. To receive PennDOT incident information, a data interface to PennDOTs Road Conditions Reporting System (RCRS) was constructed in FY 2011. A data interface to the City of Philadelphia Streets Departments Road Permit system provides street closure information related to events such as utility work, block parties, special events, and construction. This not only greatly increased the amount of usable data for RIMIS users, but was a critical project for the Philadelphia Traffic Management Center. DVRPC has continued to roll out RIMIS to regional transportation agencies, county 911/emergency management centers, local police and fire departments in major corridors, and counties' engineering/public works departments in New Jersey as requested. Assistance in using RIMIS in local municipalities for Integrated Corridor Management (ICM) purposes is offered, especially with respect to the I-76 ICM Project in Pennsylvania.

In FY 2023, the primary emphasis will be operating and maintaining RIMIS software, continuing to expand the number of agencies participating in RIMIS, continued exploration of the RIMIS SPATEL tool, and working with the agencies to ensure quality control of RIMIS data. As the number of RIMIS users has grown, it is becoming more essential to coordinate with our RIMIS users, monitor usage, and rapidly address any issues that they may be encountering.

Other focus areas of DVRPCs TSMO program include updating DVRPCs Interactive Detour Route Mapping (IDRuM) application, providing training programs for ITS operators and emergency response personnel, monitoring performance measures, security planning, and providing technical assistance to agencies.

IDRuM is being enhanced and updated into a new online web version. IDRuM is designed to give emergency responders access to the detour routes that allow them to be prepared when an incident occurs on a nearby highway. Typically traffic is diverted off the highway onto the arterial network and those arterials often become congested. By planning these routes and identifying key control points, local police can provide traffic control assistance to help ease the flow of traffic in their communities. The new online version was rolled out for Pennsylvania detours in FY2021 and work continues this year to incorporate the New Jersey detour routes.

There continues to be emphasis placed on integrating the use of performance measures into strategic and operations planning. One of the primary outcomes that operations programs strive for is reduced congestion, and typical performance measures include travel times and travel time reliability, which tell us that conditions are better or worse than in the past. DVRPC will continue to work with our stakeholders to develop a consistent approach where applicable to define the proper measures, collect and analyze the data, and report on our regions performance measures.

Activities listed below fall under two broad categories: RIMIS and Other TSMO Tasks. The former includes Operations and Maintenance (O&M) tasks performed by the software vendor (TRANSCOM) and DVRPC supervisory/technical activities associated with RIMIS. The latter category includes DVRPC staff activities that support programs for greater integration among the regions TSMO stakeholders, and more general activities. Some of these activities may require DVRPC to purchase equipment and/or services.

Tasks  
RIMIS Software Vendor Tasks

## Pennsylvania - Highway Program (Status: TIP)

### Philadelphia

1. Software vendor will perform software operations and maintenance functions.
2. Software vendor will function as the system administrator, adding additional ITS devices to the RIMIS database and modifying the highway and transit network as required.
3. Software vendor will make enhancements to RIMIS software as directed.
4. Software vendor will assist RIMIS agencies in developing data interfaces with legacy software systems as required.
5. Software vendor will periodically meet with DVRPC and the users to review RIMISs status and discuss and resolve operational issues.

#### DVRPC RIMIS Tasks:

1. Coordinate software vendors activities with the RIMIS users and the Transportation Operations Task Force.
2. Supervise the RIMIS software vendors adherence to its contract.
3. Review and approve all invoices and progress reports with respect to the RIMIS software vendor.
4. Organize training programs for RIMIS users.
5. Work with software vendor to phase-in additional RIMIS users. This may include construction of additional data interfaces.
6. Perform system administration functions, such as modifying agency and user accounts, installing RIMIS software for users, developing video walls for users, and assisting the RIMIS software vendor in performing some of the other minor administration functions.
7. Perform quality control review of RIMIS information and its usage. Work with users to ensure that information entered into RIMIS is accurate and timely, and that agencies use RIMIS information to manage events.
8. Perform additional activities associated with RIMIS as the need arises.

#### Other TSMO Tasks

1. Continue and expand initiatives to enhance interagency information sharing and cooperation. Activities include providing technical assistance to operating agencies.
2. Continue to operate and maintain Interactive Detour Route Mapping (IDRuM). Work toward developing a new web version of IDRuM program, including using GIS to make necessary updates to the detours to reflect changes to any routes or construction activity.
3. Continue the regional construction coordination efforts to minimize traffic impacts of overlapping construction projects.
4. Continue to maintain the regions ITS Infrastructure Inventory.
5. Participate in appropriate security planning efforts by attending external meetings, webinars and other events such as the Delaware Valley Intelligent Center (DVIC) security roundtable quarterly meetings.
6. Continue to promote and provide training programs on TSMO and ITS strategies. These activities may include identifying training opportunities, hosting training courses, bringing in industry experts, sponsoring conferences on special topics, and arranging tours of ITS deployments within and outside of the region.
7. Continue coordination and participation with local and regional partners and their committees, such as The Eastern Transportation Coalition, Southeastern Pennsylvania Regional Task Force and the Philadelphia Local Emergency Planning Committee.
8. Continue to work with our stakeholders to develop a consistent approach where applicable to define the proper measures, collect and analyze the data, and report on our regions performance measures.

The purpose of this program is to support the implementation of I-95 Reconstruction Projects by serving as a planning and coordination resource for PennDOT.

This project provides for technical and planning assistance to PennDOT District 6 for support in implementation of the I-95 Reconstruction Projects. DVRPC will be on call for quick-turnaround analysis or data collection tasks in support of specific and timely I-95 project planning needs. Tasks will include data collection, meeting and stakeholder coordination, and general research as needed. Subject areas include congestion mitigation strategies, as well as transit, Transportation Management Association, environmental, freight, historic, and bicycle/pedestrian issues. District 6 has limited planning staff, while DVRPC planning staff has multiple areas of expertise which are beneficial for this work and have been utilized in the past.

#### Tasks

1. Facilitate discussion and prioritization with SEPTA on capital improvements to mitigate congestion on I-95 during and beyond the reconstruction project timeline; provide sketch-level benefit/cost analysis of proposed improvements as needed. Assist with design coordination and implementation of congestion mitigation strategies.
2. Coordinate implementation of recommended strategies developed from the DVRPC Alternatives Development for Roosevelt Boulevard Transit Enhancements study.
3. Coordinate implementation of recommended strategies developed from the DVRPC Improving Non-motorized Access to Regional Rail Stations on the I-95 Corridor study.
4. Coordinate implementation of recommended strategies developed from the Bucks County Planning Commission on bicycle and pedestrian access to stations in Lower Bucks County on SEPTAs West Trenton Line.
5. Facilitate coordination between SEPTA, PennDOT, and other agencies, including multiple agencies/departments within the City of Philadelphia.
6. Coordinate communications and outreach activities with the TMAs.
7. Assist with bicycle and pedestrian planning and coordination efforts in the I-95 corridor.
8. Assist with trail alignment and coordination efforts for trails along the I-95 corridor, especially for portions related to the East Coast Greenway.
9. Assist with environmental mitigation efforts and context sensitive planning related to the I-95 reconstruction projects.
10. Assist with coordination of historical preservation efforts related to the I-95 reconstruction projects.
11. Coordinate with freight industry representatives on construction activities, detour routes, long range planning, and general coordination.
12. Provide mapping and Geographic Information Systems (GIS) support as requested.
13. Provide support in coordinating and developing legal agreements, as needed.
14. Assist with identifying and cataloging transportation infrastructure projects within the corridor.
15. Assist with coordination related to other transportation and land development projects in the corridor, as requested.

This "Transition List" project will include the design and construction of ADA ramps that were originally included in the scope of other federal aid projects as well as various streetscape projects and ramps located on select Federal Aid routes that were repaved with local funding. These ramps typically would be included as design build items in the original project contracts, however, in some instances, the urban context of the ADA ramp locations warrants further coordination or study. To allow the original construction projects to proceed in a timely fashion, these ramps were pulled from the original construction contracts and will now be addressed as part of this transition list package. This will allow the City to design and construct the ramps to meet current ADA requirements while properly providing for stairs, cellar doors, unique paving materials, adjacent historic properties and other considerations as necessary.

PROJECT MANAGER: EE/E. Elbich

CMP:

This project will involve the landscaping, building and amenities portion of the I-95 CAP project being paid for by local and private dollars.

12/3/2021--This project has been created for the items that are essential for functioning of the public spaces but not eligible for transportation funding. The funding for this portion of the work is City of Philadelphia bond and private.

This second contract will be let under an open bid by the Delaware River Waterfront Corporation, a registered 501(c)3 nonprofit corporation that acts as the steward of the waterfront and funded in part by the City. The parameters for the ownership, responsibility, and maintenance of all the cap components listed above are identified in a license agreement with the City that is currently in the process of execution. The Department will only be responsible for the heavy infrastructure with all landscape, building and amenities being the responsibility of the City and DRWC. Agreement language has been developed by the Office of Chief Counsel, Counsel for Department of General Services, and the office of the City Solicitor.

**CMP:**

The Transportation and Community Development Initiative (TCDI) is a grant program that supports smart growth in the individual municipalities of the Delaware Valley through initiatives that implement the regions long-range plan, Connections 2050 Plan for Greater Philadelphia. Central to the effort is the objective to enhance quality of life choices by providing and maintaining essential infrastructure, supporting local and regional economic development, and linking land use and transportation planning.

TCDI provides a mechanism for our planning partners to undertake locally-directed actions to improve their communities, which in turn implements their local county comprehensive plans and supports the goals and vision of the regions long-range plan. This grant program seeks to support and leverage state and county programs, by providing funding to undertake planning, analysis or early-stage design projects which improve the efficiency of the regional transportation system.

Through a competitive selection process, DVRPC will award \$1.2 million to select projects in the 5-county Pennsylvania region which includes the counties of Bucks, Chester, Delaware, Montgomery and Philadelphia.

**Tasks**

1. Distribute \$1.2 million dollars to selected projects within Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties.

### Philadelphia

MPMS# 117930 PA Transportation Demand Management (TDM) Base Program Administration and Commuter Services 2022-23

LIMITS: Districtwide

No Let Date

IMPROVEMENT Other

NHPP:

MUNICIPALITIES:

FC:

AQ Code:X1

PLAN CENTER:

IPD:

PROJECT MANAGER: Jim Mosca

CMP:

This work program will manage the work of TMAs and contractors that serve employers implementing commute alternatives programs and encourage commuters to choose travel alternatives to the single-occupancy vehicle (SOV).

The Transportation Management Associations (TMAs) and other related partners in southeastern Pennsylvania have helped promote Transportation Demand Management (TDM) options and program for over two decades, in the form of two grants funded by PennDOT the TMA Assistance Grant (one available to all TMAs in PA), and the Mobility Alternatives Program (MAP) grant (available only in SE PA). For FY2023, DVRPC and PennDOT have developed a new TDM grant program that combines these two legacy grants into one new base TDM grant for each organization previously funded through one or both of the legacy grants. Each organization will be awarded an amount of funding to perform activities like education and outreach on TDM options, TDM strategies, and the advantages for both employers and employees to implement or use these options. DVRPC will contract with and oversee the work program development and approval for each subrecipient receiving these grants and work with their respective county planning department(s) as well as PennDOT (Central Office and District 6) and FHWA in this development and in tracking progress and results from their efforts.

This program supports DVRPC staff activities for planning, marketing, procurement and accounting, as well as funding to lease software for and manage the regional Share-A-Ride (SAR) ride match program, the Emergency Ride Home (ERH) program and provide necessary materials, schedules and tools to help contractors promote TDM with a unified message in the SE PA region. This program is part of the larger coordinated regional TDM effort that includes the Travel Options Program (TOP) competitive grant program. Completion of this work may require the purchase of equipment or services.

Tasks

1. Work with TMAs/Contractors to develop Work Programs for base TDM efforts.
2. Ensure this work involves outreach to both employers and the general commuting public.
3. Oversee TMA/Contractor TDM education and outreach efforts and development and placement of relevant materials; encourage cooperative efforts whenever possible.
4. Operation of the Share-A-Ride (SAR) ride match program, including annual software lease agreements, database management and quarterly reporting, registrant communications and training.
5. Creation and administration of contracts with each of nine subrecipients.
6. Review and payment of monthly or quarterly invoices and reports for each of nine subrecipients.

MPMS# 117935 Philadelphia Trip Generation Model 2022-23

LIMITS: Districtwide

No Let Date

IMPROVEMENT Other

NHPP:

MUNICIPALITIES: Various

FC:

PLAN CENTER:

IPD:

PROJECT MANAGER: Jim Mosca

CMP:

The project will be undertaken in three phases. The first phase will design and build the tools software and user interface, assemble various transportation and land use datasets, and create a data collection plan and tablet-based survey instrument. It is assumed that the software will be an extension and modification of DVRPCs TIM data viewer and the geographic level of analysis will be the travel models Traffic Analysis Zones (eg, Census Block Groups in Philadelphia).

Phase II will focus on site selection and data collection. This phase will be deferred until FY2023 to avoid any temporary travel behavior changes due to the COVID-19 pandemic. The final phase will analyze the collected data, develop the relationships between input and output variables, and validate the tool for mixed-use developments in Philadelphia. A Users Guide with instructions for using the tool will be written as part of Phase III. This phase will begin in FY2023 and continue into FY2024. Later phases could be added to extend the tool to urban areas in other counties in the DVRPC region.

This project may require the purchase of goods and/or services, including temporary survey workers.

#### Tasks

##### Phase I Software Development Tasks:

1. Coordinate with Philadelphia Planning Commission and Office of Transportation, Infrastructure, and Sustainability to identify the tools functions and outputs.
2. Review relevant literature on adjustments to ITE Trip Generation Rates.
3. Specify software design including functionality, interface, background layers and tiles, input data, calculations to perform, output data, graphics and reports, and results for download and export results.
4. Prepare GIS and other existing datasets including retail employment, accessibility measures, transit score, distance to transit stations, parking availability and cost, occupied housing units, land-use mix/entropy variable, level of bicycle traffic stress, sidewalk connectivity, density, and real estate characteristics.
5. Prepare ITE Trip Generation Rate and TIM3.1 travel model data for comparisons to model outputs.
6. Populate PostGRES database by exporting GIS and VISUM datasets.
7. Modify TIM Data Viewer and add functions to view existing input datasets, to modify input data to account for proposed developments, and to calculate and report person trips by vehicular, transit, bicycle, and pedestrian modes for AM and PM peak periods.
8. Modify Data Viewers Tile Server to display additional layers.
9. Create Python scripts to facilitate data import and calculations.
10. Modify zonal reporting, downloading, and exporting functions.

##### Phase II Data Collection Tasks:

1. Coordinate with Philadelphia Planning Commission and Office of Transportation, Infrastructure, and Sustainability to identify candidate sites to survey. Coordinate with neighborhood groups and improvement districts on outreach to building owners and managers.
2. With assistance from PCPC and oTIS, create data collection plan, specify site characteristics, and identify candidate sites.
3. Interview, hire, and train temporary surveyors.
4. Prepare data collection schedules and itineraries.
5. Create intercept survey form and code survey onto tablet computers.
6. Execute Survey
7. Tabulate and process survey data, clean data, and expand survey results.

##### Phase III Model Estimation and Validation Tasks:

1. Perform regression analyses and other calculations to determine AM and PM peak period person trip rates for mixed-use developments in Philadelphia as a function of location, dwelling units, parking supply, and retail employment.
2. Perform regression analyses and other calculations to determine AM and PM peak period mode shares for vehicular, transit, bicycle, and pedestrian trips.
3. Incorporate calculated relationships into Philadelphia Trip Generation Tool
4. Configure Tool to be hosted on City of Philadelphia's server and website.
5. Test and validate tools predictions by predicting trip rates for additional sites, collecting data at those sites, and comparing predicted to observed results.
6. Modify model as needed.
7. Prepare Users Guide and Instructions.

## Pennsylvania - Highway Program (Status: TIP)

### Philadelphia

MPMS# 118496 *The Woodland Avenue Trolley Portal Complete Streets Project (TOP)*

LIMITS: City of Philadelphia

No Let Date

IMPROVEMENT Bicycle/Pedestrian Improvement

NHPP:

MRPID:R6.01

MUNICIPALITIES: West Philadelphia

FC:

AQ Code:A2

PLAN CENTER:

IPD:

PROJECT MANAGER: EE/DVRPC/J. Banks

CMP:

The project will improve traffic safety for all users and enhance transit service performance and reliability along Woodland Avenue in West Philadelphia.

TOP funding will support purchasing traffic signal equipment and materials as well as bicycle infrastructure materials in the project area. TOP funds will not be used for the installation of the equipment and materials purchased using TOP funding. The proposed improvements will include transit priority capabilities and protected bike lane infrastructure on Woodland Avenue.

**Traffic Signal Equipment** TOP funding will be used to purchase new traffic signal materials and equipment. Specific materials and equipment will be identified after final design is completed. The signal will include transit priority capabilities and allow for the completion of a pedestrian crosswalk between the 40th Street Trolley Portal and Woodland Avenue. In the installation of the signal equipment purchased by the TOP grant, the City will also install the pedestrian crosswalk and ADA curb ramps at the appropriate locations. This new signal will: (1) allow pedestrians to cross to the Woodlands, (2) allow trolleys to safely and reliably, (3) include emergency vehicle preemption, and (4) calm vehicle speeds on Woodland Avenue.

**Bicycle Infrastructure Materials** TOP funding will be used to purchase bicycle infrastructure materials. Through the use of precast curb molds, the proposed bicycle infrastructure improvements will allow concrete curb to be installed on top of the asphalt after paving. This is seen as a similar level of protection for the bike lane as a traditional concrete curb but does not require full-depth reconstruction and restoration of the roadway. This will reduce the amount of time and effort required to implement this project and will allow the City to test an innovative approach for constructing safer, quick-build multimodal infrastructure that is easier to maintain.

The protected bike lanes will connect West and Southwest Philadelphia with University City via Woodland Walk, a popular bike/pedestrian only facility through the University of Pennsylvania. The bike lanes also connect to the Woodlands, a popular park in the neighborhood. Safe bike and pedestrian connections to the Woodlands have been a long-standing community request, and this project will allow for improved access to the Woodlands while also greatly improving transit operations.

Funds will be flexed to SEPTA to administer the project in FFY24.

IMPROVEMENT Streetscape

NHPP:

MUNICIPALITIES: Philadelphia City

FC:

AQ Code:S6

PLAN CENTER:

IPD:

PROJECT MANAGER: AECOM/P. Shultes

CMP:

The City of Philadelphia's capital project will implement critically needed transportation safety improvements, accessibility enhancements, and state of good repair upgrades along seven high crash corridors totaling nearly five miles located in historically disadvantaged communities and areas of persistent poverty. Proposed improvements include traffic safety treatments based on FHWA's Proven Safety Countermeasures, signal modernization, ADA ramps, curb extensions and corner bumpouts, raised crosswalks, RRFB's, resurfacing, and sidewalk upgrades.

Locations include: 57th Street (Upland Way to Wynnefield Avenue); Westminster Avenue (40th to 52nd Streets); Springfield Avenue (51st to 57th Streets); Limekiln Pike (Medary Avenue to Haines Street); Tioga Street (5th to 15th Streets); 11th Street (Master Street to Diamond Street); and Longshore Avenue (Roosevelt Boulevard to Frontenac Street)

This project funds a Construction Management Open End Consultant that assists with projects selected by the District. The Consultant regularly meets with District Construction Management and performs various tasks as directed by the Construction unit.

**Agreement Management Functions**

- Completion of work orders and supplemental quality control
- Fiscal document completion
- Agreement, work order, and supplement status tracking and reporting
- Agreement closeout functions

**Accrued Unbilled Costs (AUC) Resolution**

- Research and clearing of Accrued Unbilled Costs from MPMS
- Preparation of a summary report on the project items responsible for the AUCs
- Preparation of the appropriate fiscal/justification documents
- DBE and Trainee Tracking and Shortfall Resolution

**Project Startup Assistance**

- Provision of CM Support Services until project-specific work orders have been executed
- Attendance at Pre-Bid and Pre-Construction meetings
- Review of project plans, specifications, and schedule submissions
- Completion of Constructability Reviews

**PennDOT Project Collaboration Center (PPCC)**

- Management of project setups
- Delivery of user training and support
- Preservation of District 6 submittal types and workflows

**Curb Ramp Verification**

- Verification of the "as built" conditions of curb ramps
- Documentation of these conditions for conformance with ADA requirements
- Submission of electronic forms to PennDOT's Central Archive.

**Construction Documentation Services Support**

- Assistance with RTKL processes
- Assistance with CDS V3 migration, additional documentation, and project closeout tasks

Additional Administrative Functions as determined by Construction Unit management

PROJECT MANAGER:

CMP: Not SOV Capacity Adding

This project will fund supplemental services performed by contractors in the implementation of the Air Quality Action program. Types of services may include design and production of education and outreach materials and advertising, printing, and placement of advertising on television, online, radio, and in newspapers.

Advertisements will educate the public about ozone and PM 2.5 pollution and encourage actions to reduce activities that contribute to air pollution, especially on days that are forecast as unhealthy for people susceptible to ozone and PM 2.5 pollution.

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:**

**CMP:** Not SOV Capacity Adding

The Congestion Mitigation and Air Quality Improvement Program (CMAQ) was established by ISTEA and continued under TEA-21, SAFETEA-LU, and MAP-21. CMAQ funds are allocated to the states for use in non-attainment and maintenance areas for projects that contribute to the attainment of the Clean Air Act standards by reducing emissions from highway sources. Project types that are eligible for CMAQ funding include bicycle and pedestrian facilities; traffic flow improvements; ridesharing and other demand management programs; alternative fuel vehicles; and public transit improvements.

During a round of the DVRPC Competitive CMAQ Program, a call for projects goes out, applications are submitted, and candidate projects are ranked and selected by the DVRPC Board based on their emissions reduction potential, as well as other criteria such as cost-effectiveness, ease of implementation, project readiness, and sponsor commitment to provide matching funds.

The following projects selected in the calendar year 2011-2012 Competitive CMAQ Program will have funds drawn down from this Line Item at the appropriate time:

- MPMS #96221 - Multi-modal Access to New Britain Train Station -\$212,000 (\$169,600 CMAQ/ \$42,400 Matching funds)
- MPMS #96215 - City Avenue Adaptive Signals - \$1,143,500 (\$800,000 CMAQ/ \$343,500 Matching funds)
- MPMS #96222 - Enhanced Bike Facility Connection between Gray's Ferry and Bartram's Garden - \$600,000 (\$400,000 CMAQ/ \$200,000 Matching funds)
- MPMS #96227 - Traffic Operations Center Cameras - \$600,000 (\$480,000 CMAQ/ \$120,000 Matching funds)
- MPMS# 96238 - Upper Merion to Bridgeport Train Station Pedestrian Facilities Improvements - \$260,253 CMAQ/ \$304,832 Matching funds)
- MPMS# 96240 - Park Road Trail - \$1,455,908 (\$764,726 CMAQ/ \$691,182 Matching funds)

The following projects selected in the calendar year 2016 Competitive CMAQ Program will have funds drawn down from this Line Item at the appropriate time:

- 1) MPMS# 107636 - Neshaminy Greenway Trail -\$2,279,000 (\$1,823,000 CMAQ/ \$456,000 Matching funds)
- 2) MPMS# 107630 - Paoli Pike Trail Segment D-E -\$2,415,000 (\$1,736,000 CMAQ/ \$679,400 Matching funds)
- 3) MPMS# 107652 - US 202/US 1 ITS Corridor -\$3,300,000 (\$3,300,000 CMAQ/ State Matching funds)
- 4) MPMS# 107642 - Smithbridge Rd. Corridor Improvement Project -\$2,027,500 (\$1,589,500 CMAQ/ \$438,000 Matching funds)
- 5) MPMS# 107639 - Installation of Adaptive Signal Control Along Route 3 -\$700,000 (\$560,000 CMAQ/ \$140,000 Matching funds)
- 6) MPMS# 107634 - Pedestrian Enhancements for Media Borough -\$909,818 (\$727,854 CMAQ/ \$181,964 Matching funds)
- 7) MPMS# 107649 - Connecting Wallingford to Mass Transit -\$471,162 (\$370,168 CMAQ/ \$100,994 Matching funds)
- 8) MPMS# 107650 - Easton Road Traffic Signal System Project -\$975,244 (\$780,195 CMAQ/ \$195,049 Matching funds)
- 9) MPMS# 107644 - Fayette Street Traffic Signal Improvements – Phase 2 -\$870,999 (\$799,606 CMAQ/ \$71,393 Matching funds)
- 10) MPMS# 107640 - Route 463 Traffic Signal System Project -\$1,141,450 (\$913,160 CMAQ/ \$228,290 Matching funds)
- 11) MPMS# 107646 - West Main Street Traffic Signal Improvements -\$551,455 (\$487,825 CMAQ/ \$63,630 Matching funds)
- 12) MPMS# 107654 - Advancing CNG in Philadelphia -\$7,154,000 (\$2,000,000 CMAQ/ \$3,350,000 Matching funds)
- 13) MPMS# 107637 - Ramping up to Rapid Transit on Roosevelt Boulevard -\$2,989,500 (\$1,999,500 CMAQ/ \$990,000 Matching funds)

Geographic Information Systems (GIS) combine computer based mapping and database technologies to provide planners and engineers with new and efficient methods to analyze data related to the transportation system. The counties and operators in the region are each developing such systems. This line item will provide funding for the common elements of such systems as part of an effort to achieve a greater degree of regional consistency and obtain economies of scale.

Internet mapping task work is included.

This project will fund analysis and planning efforts by a system integrator to support the District 6 Regional Traffic Management Center (RTMC) activities, and the regional ITS and traffic management elements deployed and proposed along expressway and arterial corridors. This will involve planning phases with deployment as a separate effort. The system integrator will support defining any potential implementation and operational strategies, and assist in developing a comprehensive strategic deployment plan (including estimate costs) along the corridors. Tasks will include ITS design review (prepared by others), video and data sharing support, ITS reporting and equipment management, ITS maintenance coordination support, communications and fiber management system support, and other similar activities.

**MPMS# 63406**      *Retrofit for Bike Lanes and Shoulders*

**LIMITS:** Regionwide

No Let Date

**IMPROVEMENT** Bicycle/Pedestrian Improvement

**NHPP:**

**MUNICIPALITIES:** Various

**FC:**

AQ Code:NRS

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** Jonathan Korus

**CMP:** Not SOV Capacity Adding

The purposes of this project are to (1) place an engineering consultant on retainer to undertake the necessary design work to retrofit bike lanes and bicycle-friendly shoulders where appropriate, coincident with resurfacing projects and (2) maintain existing and future bicycle facilities, including installation, maintenance, and replacement of striping and damaged and missing signs. Work would include bike lanes, edge line striping, signs, and revising traffic signal permit drawings to continue edge line revisions through signalized intersections. Work would be limited to Bucks, Chester, Delaware, Montgomery counties, and the City of Philadelphia.

There is a collaborative process in place with the four counties, PennDOT District 6-0, DVRPC, and the Bicycle Coalition of Greater Philadelphia which has developed potential projects in corridors with bicycling activity or where there is a latent demand for bicycling if bicycle-friendly facilities were provided. Continuation of this process will permit this funding to be used on the projects already developed or other projects that the group may develop.

**IMPROVEMENT** Other

**NHPP:**

**MUNICIPALITIES:** Various

**FC:**

AQ Code:X3

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:**

**CMP:** Not SOV Capacity Adding

The Transportation and Community Development Initiative (TCDI) provides a mechanism for the individual municipalities of the Delaware Valley to undertake locally-directed actions to improve their communities, which in turn implements their local and county comprehensive plans and supports the goals and vision of the regional plan. Pennsylvania and New Jersey, as well as a number of counties within the region, have programs now underway to support community revitalization.

The regional Transportation and Community Development Initiative seeks to support and leverage those programs, by providing funding of up to \$100,000 in selected municipalities to undertake planning, analysis or design initiatives for projects or programs which enhance development or redevelopment and improve the efficiency or enhance the regional transportation system. A 20% cash or in-kind match is required.

The program is targeted to the core cities, inner-ring suburbs, and older boroughs of the region that have lost jobs and population and are in need of assistance to generate growth and redevelopment. Identified census tract areas in 75 southeastern Pennsylvania municipalities as well as much of the city of Philadelphia, are eligible to apply for TCDI funding. Projects will be selected on a competitive basis and designated by the DVRPC Board.

FY13 Funds are programmed for projects selected as part of Round 8, 2014/2015. Funds are made available for projects in order to accommodate the program operating on an every other year cycle. This activity is a component of the DVRPC Work Program (UPWP).

### Various

**MPMS# 64984** *Transportation Alternatives - Urban (TAU) Line Item*

**LIMITS:** Region-wide

No Let Date

**IMPROVEMENT** Bicycle/Pedestrian Improvement

**NHPP:**

**MUNICIPALITIES:** Various

**FC:**

AQ Code:X12

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** L. Guarini

**CMP:** Not SOV Capacity Adding

This line item sets aside the funding allocated by FHWA for the new Infrastructure Investment and Jobs Act/Bipartisan Infrastructure Law's (IIJA/BIL) Surface Transportation Block Grant Set-aside for the continuation of the Transportation Alternatives Set-Aside Program (TASATAP) in the DVRPC region. The Transportation Alternatives Set-Aside of the Surface Transportation Block Grant Program (TA Set-aside) provides funding for programs and projects defined as transportation alternatives, including on and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, environmental mitigation, trails that serve a transportation purpose, and safe routes to school projects. For the DVRPC regional funds, priority has been established for bicycle and pedestrian facilities, conversion of abandoned railway corridors to trails, and storm-water management projects. Federal law requires that 59% of the funds are sub-allocated to regions with populations greater than 200,000 (TAU).

The IIJA/BIL apportions \$7,932,000 TAU in FY23, \$8,097,000 TAU in FY24, \$8,266,000 TAU in FY25, and \$8,438,000 TAU in FY26 and thereafter annually, directly to the DVRPC southeastern Pennsylvania region for use in selecting projects on a competitive basis. A recent competitive round (2022 Round) of three years' worth of MPO funding occurred in fall of 2021, with final projects awarded in winter 2022. Selected projects are assigned an individual MPMS project number and description in the TIP, and funding will be drawn down from this line item and programmed at the appropriate time. Each project will be broken out of the Line Item as an individual project at the appropriate time.

The following projects were added to the Transportation Alternatives – Urban (TAU) Line Item which were approved through the TA Set-Aside program in Winter 2022:

- Bucks – Newtown Rail Trail Phase 2 Bristol Road to Churchville Nature Center – MPMS #117953 - \$650,000
- Bucks – Route 332 & Tyler Park Connection – MPMS #117971 - \$825,000
- Chester – Toughkenamon Streetscape Improvements – MPMS #117969 - \$965,000
- Chester – Moores Road Sidewalk – MPMS #117970 - \$500,000
- Delaware – Highland Avenue Complete Streets – MPMS #117957 - \$1,135,000
- Delaware – Media - Smedley Connector Trail - Phase 1 – MPMS #117972 - \$450,000
- Montgomery – Main St. East to Ruth Road Sidewalk Connections – MPMS #117961 - \$985,000
- Montgomery – Liberty Bell Trail - Phase 3 – MPMS #117965 - \$600,000
- Philadelphia – Franklin Square Pedestrian Access P2 – MPMS #111496 - \$850,000
- Philadelphia – Overbrook Educational Center Slow Zone – MPMS #117966 - \$985,000

The following projects were approved through the TA Set-Aside program in Winter 2018:

- Bucks – Neshaminy Greenway Trail (Core Creek Park to Woodbourne Road) – MPMS #110773 - \$995,000
- Bucks – Iron Work Creek Sidewalk – MPMS #110774 – \$894,000
- Chester – Kennett Area Safer Active Transportation Routes – MPMS #110775 - \$915,000
- Chester – Paoli Trail, Segment A – MPMS #110776 - \$483,000
- Delaware – Pennsy Trail – Phase II Improvements – MPMS #110777 - \$1,163,000
- Montgomery – Jenkintown to Pennypack Trail – MPMS #110778 - \$715,000
- Montgomery – Parkside Cynwyd Trail Extension – MPMS #110779 - \$534,000
- Philadelphia – North Broad Street – Vision Zero Priority Corridor – MPMS #110780 - \$300,000
- Philadelphia – Renewing Philadelphia's Historic Streets – MPMS #110781 - \$1,000,000
- Philadelphia – Restoration of Historic Shawmont Station – MPMS #110782 - \$1,000,000

\$4,000,000 of the Winter 2018 solicitation is to be used for regionally significant trail projects in the future, including projects in the Circuit Line Item – MPMS #105291.

The following projects were approved through the TAP program in Spring 2016:

- Bucks – Neshaminy Greenway Trail (Bristol to Upper State) – MPMS #102830 - \$1,255,000
- Chester – Paoli Pike Trail, Segment C – MPMS #107176 - \$1,000,000
- Delaware – Moore Road Sidewalk Project – MPMS #107177 - \$825,000
- Delaware – Springfield Township Sidewalk Improvements – MPMS #107178 - \$280,000
- Montgomery – FWOP, Cross County Trail Final Segment – MPMS #107179 - \$750,000
- Montgomery – Powerline Trail Connection – Phase 1 – MPMS #107180 - \$850,000
- Philadelphia – Chetlens-Greene Plaza Reconstruction – MPMS #107181 - \$370,000

## Pennsylvania - Highway Program (Status: TIP)

This project is a placeholder of the highway funds that PennDOT has "flexed" for transit use in the DVRPC region as part of the Planning Partner Financial Guidance. SEPTA may choose to use these funds to supplement its other federal and state funding for any capital project.

Each year SEPTA will apply these "flexed" funds to one of its other projects in the TIP, but may choose to apply them to a new project through the TIP amendment process.

FY 2013-2020 funding in the amount of \$136,664,000 has been applied to MPMS# 90512, SEPTA Bus Purchase Program.

SEPTA will continue to utilize FY 2021-20224 FHWA Transit Flex funding in the amount of \$68,332,000 to support the SEPTA Bus Purchase Program (MPMS #90512).

DVRPC's Intelligent Transportation System (ITS) program encompasses a wide range of activities including the ITS Technical Task Force, incident management programs, ITS architecture development, training programs for ITS operators and emergency response personnel, and technical assistance to agencies. Its centerpiece is the Regional Integrated Multi-modal Information Sharing (RIMIS) concept which will implement an Information Exchange Network (IEN) that will function as the communications backbone among operation centers throughout the region. This system would be used to notify agencies about incidents or unusual conditions which affect them, and will allow them to share resources (e.g., variable message signs) and coordinate a unified response. Information will be made available to the public via traffic reporting agencies. This activity is a component of the DVRPC Work Program (UPWP).

This project is integral to the Delaware Valley Freight Corridors initiative.

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** PWB/V. Fleysh

**CMP:** Not SOV Capacity Adding

This signal re-timing program provides for the evaluation of existing signals along an identified corridor, with the goal of improving traffic operations along said corridor through revised signal timing plans. The program was implemented first using corridors identified in the City of Philadelphia, with the goal of expanding a successful program to other counties. The selected vendor would collect current traffic data, compare it against the functioning signal timing, and prepare and implement a revised signal timing plan on approval of the PennDOT's District 6.

**PROJECT MANAGER:** James Mosca

**CMP:** Not SOV Capacity Adding

DVRPC continually strives to keep its travel simulation models up to date to insure the accuracy of travel forecasts and to respond to new forecasting requirements associated with the FTA New Starts program, FHWA conformity demonstration requirements, and EPA clean air amendments and other environmental regulations. DVRPC's travel simulation process requires periodic updating. This includes updating the travel simulation models, the software that runs the models, and the data that the models are based on. This project will make upgrades in all three areas. The travel models will be upgraded to bring them in line with the state of the art/science of demand modeling. The various data required to operate, calibrate, and validate the model, including socioeconomic data, traffic data, and travel surveys, will be updated as well. This activity is a component of the DVRPC Work Program (UPWP).

**PLAN CENTER:**

IPD: 1

**PROJECT MANAGER:** Gannett/V. Genua

**CMP:** Minor SOV Capacity

This project is a breakout of MPMS# 88616, and will operate in the suburban counties of Bucks, Chester, Delaware, and Montgomery as part of the Expressway Service Patrol contract for an additional two years. The program will provide for the operation of emergency service patrols on congested state highways to detect and clear incidents rapidly by providing emergency assistance to stranded motorists. Approximately half of all delays experienced by highway users in congested areas are caused by traffic accidents, vehicle breakdowns, and other incidents. Prompt incident management programs such as this, can reduce delay's significantly. Service will be provided on 50 linear miles including: I-76 from Philadelphia to PA Turnpike; I-95 from the New Jersey State Line to the Bucks County line; I-476 from I-95 to the PA Turnpike; US Route 202 from I-76 to US 30; US Route 422 from Route 202 to Royersford; PA 309 from PA 63 to Easton Road; and US 30 from Business Route 30 to PA 10.

A separate contract for the Philadelphia Expressway Service Patrol (MPMS #91490) is currently programmed on the DVRPC TIP and utilizes federal funding.

**MPMS# 95447** County Bridge Line Item

**LIMITS:** Region-wide

No Let Date

**IMPROVEMENT** Bridge Repair/Replacement

**NHPP:**

**MUNICIPALITIES:** Various

**FC:**

AQ Code:S19

**PLAN CENTER:** Rural Center; Town Center

IPD: 29

**PROJECT MANAGER:** L. Guarini

**CMP:** Not SOV Capacity Adding

This line item sets aside funding allocated for county owned bridges that are in need of repair in the DVRPC region. Funds will be broken out and drawn down at the appropriate time for projects that were selected in the fall of 2012 (Round 1), and summer of 2016 (Round 2). Projects were selected for using 20% local match. State or federal shares will be programmed as appropriate.

Woodland Avenue over SEPTA (MPMS #98232) was programed with 100% federal funds, for preliminary engineering, final design, and construction to allow SEPTA to manage the project on behalf of the City of Philadelphia. This project was drawn down in the FY2013 TIP.

Anticipated programming and costs of projects include:

Round 1 (fall 2012 selections):

#### Bucks County

-Clymer Avenue Bridge over Mill Creek (MPMS #92872), West Rockhill Township,

FD \$59,000, CON \$1,194,000. Total cost \$1,253,000. This is a retro-reimbursement project. Drawn down in FY14 of the FY2013 TIP.

-Branch Road over E. Branch Perkiomen Creek, (MPMS #102666), Bridge #239, Bridge ID # 09700904310239, East Rockhill Twp, PE \$10,000, FD \$60,000, Construction \$535,000. The total cost of this project is \$605,000. This is a retro-reimbursement project. Drawn down in FY15 of the FY2015 TIP.

-Quarry Road over Morris Run, (MPMS #102667), Bridge #244, Bridge ID #09700904210244

PE \$5,000, FD \$25,000, Construction \$335,000. The total cost of this project is \$365,000. This is a retro-reimbursement project. Drawn down in FY15 of the FY2015 TIP.

-Strock's Grove Road Bridge over Beaver Creek Bridge (MPMS #98221), Nockamixon Township, PE \$300,000, FD \$375,000, ROW \$90,000, UTL \$50,000, CON \$2,000,000. The total cost of this project is \$2,630,000.

#### Chester County

-Sunnyside Road Bridge over East Penn Railway (MPMS #78521) in Penn Township FD \$120,000, ROW \$31,000, CON \$1,021,000. The total cost of the project is \$1,172,000. This is a retro-reimbursement project. Drawn down in FY14 of the FY2013 TIP.

-Creek Road Bridge over Pickering Creek (MPMS #98223) in Schuylkill Township, PE \$300,000, FD \$300,000, ROW \$75,000, CON \$1,904,000. The total cost of this project is \$2,579,000.

-Spring City Road over Stony Run (MPMS #98224) in East Pikeland Township, PE \$300,000, FD \$200,000, ROW \$40,000, CON \$1,400,000. The total cost of this project is \$1,940,000.

#### Delaware County

-Michigan Avenue over Little Crum Creek (MPMS #98216) in Ridley Township, PE \$350,000, FD \$250,000, ROW \$50,000, UTL \$50,000, CON \$2,200,000. The total cost of this project is \$2,900,000.

-Hilldale Bridge (MPMS #98217) in Lansdowne Borough, PE \$410,000, FD \$300,000, ROW \$50,000, UTL \$50,000, CON 2,850,000. The total cost of this project is \$3,660,000.

-South Avenue over Muckinipattis Creek (Mulford Bridge) (MPMS #98218) in Glenolden Borough, PE \$450,000, FD \$300,000, ROW \$50,000 UTL \$50,000, CON \$2,900,000. The total cost of this project is \$3,700,000.

#### Montgomery County

-Butler Pike over Prophecy Creek (MPMS #98225) in Upper Dublin Township,

PE \$400,000, FD \$300,000, ROW \$25,000, UTL \$50,000, CON \$1,200,000. The total cost of this project is \$1,975,000

-Maple Avenue Bridge (MPMS #98226) in Hatfield Township, FD \$143,000, CON \$432,000. The total cost of this project is \$575,000. This is a retro-reimbursement project. Drawn down in FY15 of the FY2015 TIP.

-Allendale Road Bridge (MPMS #98227) in Upper Merion Township FD \$350,000, CON \$650,000. The total cost of this project is \$1,000,000. This is a retro-reimbursement project. Drawn down in FY15 of the FY2015 TIP.

-Store Road Bridge (MPMS #98228) in Lower Salford Township PE \$11,000, FD \$80,000, CON \$300,000. The total cost of this project is \$391,000. This is a retro-reimbursement project. Drawn down in FY16 of the FY2015 TIP.

#### City of Philadelphia

-59th Street over Amtrak (MPMS #98229) PE \$3,000,000, FD \$2,000,000, UTL/RR \$4,100,000, CON \$20,000,000. The total cost of this project is \$29,100,000, project is BOF eligible;

-Woodland Avenue over SEPTA (MPMS #98232) PE of \$480,000, FD \$320,000, CON \$952,000, CON \$10,048,000. The total cost of this project is \$10,848,000. Drawn down in FY14 of the FY2013 TIP, and FY18 of the FY2017 TIP.

-Tabor Road over Tacony Creek (MPMS #98230) PE \$240,000, FD \$600,000, CON \$6,000,000. The total cost of this project is \$6,840,000.

## Pennsylvania - Highway Program (Status: TIP)

### Various

Round 2 (summer 2016 selections):  
MPMS #s will be created once invoices are received by PennDOT.

#### Bucks County

- Walnut Street Bridge over Perkiomen Creek (CB #13) (MPMS #13248), Perkasio Borough, CON \$5,150,000. This is a retro-reimbursement project.
- Frosty Hollow Road over Mill Creek - CB #15 (MPMS #103620), Middletown Township, PE \$25,000, FD \$75,000, ROW \$25,000, CON \$550,000. Total cost \$675,000. This is a retro-reimbursement project. Drawn down in FY2017 TIP.
- Mill Creek Road over Martins Creek - CB #220 (MPMS #102598), Falls Township, PE \$41,000, FD \$250,000, ROW \$50,000, CON \$2,464,000. Total cost \$2,805,000. This is a retro-reimbursement project.

#### Chester County

- State Street in Avondale - CB #289 (MPMS #14246), Avondale Borough, PE \$100,000, FD \$250,000, ROW \$20,000, UTL \$150,000 CON \$1,800,000. Total cost \$2,320,000. This is a retro-reimbursement project.
- Mill Road in Tredyffrin Twp - CB #167 (MPMS #13981), Tredyffrin Township, Study \$150,000, PE \$300,000, FD \$300,000, ROW \$75,000, UTL \$100,000, CON \$2,000,000. Total cost \$2,925,000. This is a retro-reimbursement project.
- Bertolet School Road - CB #196 (MPMS #86271), East Vincent Township, Study \$200,000, PE \$450,000, FD \$300,000, ROW \$75,000, UTL \$100,000, CON \$2,775,000. Total cost \$3,900,000. This is a retro-reimbursement project.

#### Delaware County

- Paper Mill Road over Darby Creek (Worrall Bridge) - CB #221 (MPMS #TBD), Newtown Township, Engineering \$410,000, ROW \$15,000, CON \$2,900,000. Total cost \$3,325,000. This is a retro-reimbursement project.
- Fox's Bank Bridge - CB #94 (MPMS #TBD), Middletown Township, Engineering \$300,000, ROW \$50,000, CON \$2,500,000. Total cost \$2,850,000. This is a retro-reimbursement project.

#### Mongtomgery County

- Moreland Avenue over Branch Pennypack Creek - CB #38 (MPMS #TBD), Hatboro Borough, PE \$350,000, FD \$200,000, ROW \$60,000, UTL \$40,000, CON \$2,500,000. Total cost \$3,150,000. This is a retro-reimbursement project.
- Easton Road over Branch Tacony Creek - CB #268 (MPMS #TBD), Cheltenham Township, PE \$350,000, FD \$200,000, ROW \$60,000, UTL, \$40,000, CON \$2,550,000. Total cost \$3,200,000. This is a retro-reimbursement project.
- Moyer Road over East Branch Perkiomen Creek - CB #262 (MPMS #TBD), Upper Salford Township, PE \$350,000, FD \$250,000, ROW \$25,000, UTL, \$20,000, CON \$4,355,000. Total cost \$5,000,000. This is a retro-reimbursement project.

#### City of Philadelphia

- MLK Drive over Schuylkill River - (MPMS #108129), City of Philadelphia, PE \$960,000, FD \$640,000, CON \$10,000,000. Total cost \$11,600,000.

**NHPP:**

**MUNICIPALITIES:** Various

**FC:**

AQ Code:S19

**PLAN CENTER:**

IPD: 18

**PROJECT MANAGER:** L. Guarini

**CMP:** Not SOV Capacity Adding

This line item will provide funds for rehabilitation or replacement of municipal bridges that are identified through a regional review and selection process. Projects may be considered for retroactive reimbursement. A non-traditional, retroactive reimbursement process allows a municipality to perform work to fix or replace a bridge using local funds, and subsequently be reimbursed by PennDOT with state funds. Projects for retroactive reimbursement must be selected and approved by the region before a commitment of retroactive reimbursement would be made.

Nine (9) local bridge projects requesting \$9,513,109 (\$7,610,487 State 183/\$1,902,622 Local) for reimbursement at the time of application, selection, and approval by the DVRPC Board are shown below. Funding listed below represents the total project cost estimate at the time of selection and approval.

#### Bucks County

(1) Dark Hollow Road over Tributary of Neshaminy Creek (Bridge Key 40485) in Warwick Township - \$134,115 (\$107,292 State 183/\$26,823 Local);

(2) Fairway Drive over Tributary to Fish Creek (Bridge Key 40484) in Warwick Township - \$268,694 (\$214,955 State 183/\$53,739 Local)

#### Chester County

(3) East Locust Lane Bridge (Bridge Key 10786) in East Marlborough Township - \$1,020,000 (\$816,000 State 183/\$204,000 Local);

(4) Skelp Level Road Bridge over Norfolk Southern (Tracks Removed) (Bridge Key 10771) in East Caln Township - \$1,452,200 (\$1,161,760 State 183/\$290,440 Local);

#### Montgomery County

(5) Alderfer Road Bridge (Bridge Key 28075) in Lower Salford Township - \$1,232,400 (\$985,920 State 183/\$246,480 Local);

(6) Delaware Drive over Pine Run 3257-K9 (Bridge Key 48820) in Upper Dublin Township - \$1,250,000 (\$1,000,000 State 183/\$250,000 Local);

(7) Indian Creek Road Bridge (Bridge Key 28076) in Lower Salford Township - \$718,200 (\$574,560 State 183/\$143,640 Local);

(8) Lincoln Avenue Bridge (Bridge Key 42587) in Hatfield Borough - \$1,287,500 (\$1,030,000 State 183/\$257,500 Local);

(9) Pulaski Drive Bridge (Bridge Key 28142) in Whippen Township - \$2,150,000 (\$1,720,000 State 183/\$430,000 Local).

Twelve (12) projects requesting \$10.6 million for reimbursement at the time of application, selection, and approval by the DVRPC Board are shown below. Funding listed below represents the total project cost estimate at the time of selection and approval, except for Dowling Forge Bridge over Shamona Creek (item #6 below).

#### Bucks County

(1) Rockhill Road Bridge over Three Mile Run in East Rockhill Township - \$1,059,094 (\$847,275 State 183/\$211,819 Local) (Bridge Key 7599) - MPMS #86209 - COMPLETED

(2) Forsythia Crossing over Mill Creek (aka Forsythia Gate Bridge) in Middletown Township - \$394,133 (\$315,306 State/\$78,827 Local) (Bridge Key 48823) - MPMS #103828

#### Chester County

(3) Howellville Road Bridge over Norfolk Southern Corp. in Tredyffrin Township- \$2,100,000 (\$1,680,000 State 183/\$420,000 Local) (Bridge Key 10821) - MPMS #14363;

(4) Kulp Road Bridge over Pigeon Creek in East Coventry Township - \$675,000 (\$540,000 State 183/\$135,000 Local) (Bridge Key 10774) - MPMS #86293 - COMPLETED;

(5) East Boot Road Bridge over Ridley Creek in East Goshen Township \$500,000 (\$400,000 State 183/\$100,000 Local)(Bridge Key 10781) - MPMS #103573 - COMPLETED;

(6) Dowlin Forge Bridge over Shamona Creek in Uwchlan Township \$400,000 (\$320,000 State 183/\$80,000 Local) (Bridge Key 10829) - MPMS #103574 - COMPLETED.

#### Delaware County

(7) South Swarthmore Ave. Bridge over Stoney Creek in Ridley Township \$1,084,000 (\$867,200 State 183/\$216,800 Local) (Bridge Key 15432) - MPMS #104196;

(8) Bullens Lane Bridge over Crum Creek in Ridley Township - \$980,000 (\$784,000 State 183/\$196,000 Local) (Bridge Key 15433) - MPMS #103573 - COMPLETED.

#### Montgomery County

Ten bridges in Bucks, Chester, Delaware, and Montgomery counties that are poor condition will be replaced with minimal roadway improvements. The scope of work will not change the typical section of the roadways or increase their capacities.

The bridges in Bucks County are:

- Souderton Pike over Branch Mill Creek (Bridge Key 6883)
- Carver-Wisner Road over Hickory Creek (Bridge Key 7105)
- Allentown Road over Branch of the Unami Creek (Bridge Key 7403)

The bridges in Chester County are:

- West Miner Street over Branch of Blackhorse Run (Bridge Key 10267)
- Hill Church Road over Tributary of Stony Run (Bridge Key 10366)

The bridges in Delaware County are:

- Bethel Road over Branch of Marcus Hook Creek (Bridge Key 15314)
- Smith Bridge Road over Webb Creek (Bridge Key 15341)

The bridges in Montgomery County are:

- Allentown Road over Branch of Skippack Creek (Bridge Key 27524)
- Black Rock Road over Crossmans Run (Bridge Key 27779)
- Linfield Road over Tributary of the Schuylkill River (Bridge Key 27822)

**NHPP:**

**MUNICIPALITIES:** Various

**FC:**

AQ Code:X1

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** James Mosca

**CMP:** Not SOV Capacity Adding

This continuing project collects and processes travel data, the primary form being traffic counts, including hourly and 48 hour traffic volumes, for selected locations on the regional highway network. Data collected will provide input to VMT forecasting, the Traffic Monitoring System (TMS), the Congestion Management System (CMS), travel simulation models, individual project level analysis and traffic monitoring and trend analysis. This information is vital to all project studies that address highway deficiencies and proposed solutions. In addition, DVRPC facilitates the periodic review and revision of the highway functional classification system. Traffic count information from the database may be queried at <http://www.dvrpc.org/traffic>. To facilitate uninterrupted data collection, it will be necessary to procure new counting equipment, supplies, and repairs as needed.

**Tasks:**

- 1) Coordinate with PennDOT and member governments to review traffic count locations.
- 2) Establish weekly schedules, manpower assignments, and control procedures.
- 3) Collect traffic data at approximately 3,000 selected locations.
- 4) Upload data into the DVRPC Traffic Count system, process county, edit for quality control, and develop annual average daily traffic volumes.
- 5) Maintain and further automate traffic data systems and procedures to enhance productivity, including data obtained by third parties via remote sensors, etc.
- 6) Submit counts collected during the year electronically by specific deadlines established by PennDOT and member governments.
- 7) Input traffic count data files into the comprehensive regional GIS-T database for sharing over the internet.
- 8) Maintain an inventory of data collection and safety equipment, including purchasing new equipment with enhanced technology and capability, purchasing needed supplies such as road tube, and procuring necessary repairs if existing equipment gets damaged.
- 9) Collect travel data from non-highway modes, including pedestrian, bicycle and public transportation travel system characteristics and user traits.
- 10) DVRPC will also coordinate with PennDOT, the counties, and cities on the collection and validation of data on the local transportation asset inventory: locally owned public roads and bridges (eight to 20-foot spans), including georeferencing data.

**Products:**

- 1) Computer database file containing new and updated traffic counts
- 2) Transmittals of traffic data to DOTs, member governments, and interested parties

This program provides funds for advancing the Circuit Trail Projects. Regional Trails Program funding from the William Penn Foundation was provided to design Circuit trail projects according to the PennDOT process in order to prepare them for a variety of federal and state construction funding opportunities. \$10 million in CMAQ funding will be used to advance CMAQ eligible Circuit projects to construction. The following projects are included in this line item:

- 1) Bucks - Bridge Street Crossing on D&L Towpath MPMS #105845;
- 2) Delaware - Chester Creek Trail Phase 2 MPMS# 116147;
- 3) Philadelphia - Parkside Cynwyd Trail MPMS# 116126;
- 4) Philadelphia - Pennypack Trail - State and Rhawn Crossing MPMS #105849;
- 5) Philadelphia -Spring Garden Street Greenway MPMS #105850
- 6) Philadelphia - Wissahickon Gateway Trail MPMS# 116125.

This project is part of the Circuit Trails. The Circuit is a planned 800-mile interconnected network of multi-use trails spanning Greater Philadelphia with Philadelphia and Camden as its hub, and is included in DVRPC's Long-Range Plan. Existing and future Circuit Trails are required to meet minimum design standards (10-feet wide, paved, and separated from traffic with limited exceptions) to reflect their intended use as the arteries of a dedicated, regional, non-motorized transportation system. Circuit Trails located near and connecting to downtown Philadelphia are already used heavily for transportation purposes, and the implementation of the network will further encourage the surging growth of bicycle commuting in the region. At 2.2%, Philadelphia has the highest bike-to-work percentage of the 10 largest cities in the country and the 11th highest of the 70 largest cities according the 2016 American Community Survey.

Projects that were part of this Line Item and have since been broken out to their own individual projects are listed below:

- 1) Bucks - Newtown Branch Rail Trail - Southampton Twp. MPMS #105847;
- 2) Montgomery - Chester Valley Trail Extension Design Supplement for MPMS #16705;
- 3) Philadelphia -Lindbergh Blvd Sidepath - 84th St to John Heinz NWR MPMS #105853.

This is the Reserve Line Item for sink hole repairs. A sinkhole is generally a circular hole or a depression in the ground that is caused by erosion and water drainage. The size of a hole can range from a few feet to a size large enough to engulf an entire building. It can suddenly appear without warning and may continue to grow after the initial collapse. Sinkholes are naturally part of Pennsylvania's landscape called karst and are considered a serious geologic hazard in central and eastern Pennsylvania.

MPMS# 106654 I-95 Transportation Demand Mgt (TMA)

**LIMITS:**

IMPROVEMENT Other

MUNICIPALITIES: Various

PLAN CENTER:

PROJECT MANAGER: EE/E. Elbich

NHPP:

FC:

CMP: Not SOV Capacity Adding

No Let Date

MRPID:65

AQ Code:NRS

IPD:

This project will provide for coordination activities among multiple Transportation Management Associations (TMAs) in Bucks, Delaware, and Philadelphia counties to assist PennDOT with mitigating congestion on the I-95 corridor by reducing the number of drivers on the road during construction, particularly during AM and PM peak commute hours. Outreach efforts will focus on select employers with employees using the corridor; some efforts will reach those same employees directly. Outreach activities will include sharing and supplementing efforts to inform regular users of upcoming construction schedules, in addition to educating and assisting employers to help employees who are regular users with finding viable alternatives to driving alone along this corridor, utilizing Travel Demand Management (TDM) techniques.

Interstate 95 is a critical corridor for the movement of commuters and goods between the City of Philadelphia and neighboring Bucks and Delaware counties in Pennsylvania. Delays from traffic congestion, already commonplace on I-95 during peak commute times, are further exacerbated by ongoing construction work. Proactive steps are needed to ensure that the public is educated on both the nature and timing of these upcoming construction projects and made aware of alternative means of commuting that will help to lessen the impact of these projects on traffic flow, with a specific focus on employer concerns (on-time arrivals, reliable commute times, reducing use of vacation/sick time, improving employee morale, etc.).

**PROJECT MANAGER:** EE/E. Elbich

**CMP:** Not SOV Capacity Adding

This project provides for technical and planning assistance to PennDOT District 6 for support in implementation of the I-95 Reconstruction Projects, and other traffic studies as identified by PennDOT. DVRPC will be "on call" for quick-turnaround analysis or data collection tasks in support of specific and timely I-95 project planning needs. Tasks will include data collection, meeting and stakeholder coordination, traffic modeling and forecasting, and general research as needed.

This project will require an expansion of DVRPC staff to include a dedicated travel modeler to prepare traffic forecasts throughout the I-95 corridor in Pennsylvania. The additional staff member will report to the Manager, Office of Modeling and Analysis, and work with other OMA staff as needed to prepare traffic forecasts and other modeling services.

New traffic data and forecasts are needed for several tasks. These include analyzing additional interchange configurations to improve safety, reduce congestion, and address community concerns; support new or updated Point-of-Access (POA) studies; extend the horizon year of previous traffic forecasts in the corridor; analyze and plan for future freight activity; and prepare detour route forecasts for later construction phases.

**MUNICIPALITIES:** Various

**FC:**

AQ Code:A1

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** Jim Mosca

**CMP:** Not SOV Capacity Adding

Commuter Services is a DVRPC Unified Planning Work Program TIP Funded Task. Note that funding for this task was formerly shared with the Transportation Management Associations (TMA) work programs under MPMS# 17900. The DVRPC Work Program Task funding has now been broken out under this MPMS# 110460 for distinction from the TMA work programs task and for more efficient administration purposes. The TMA portion is now covered under MPMS# 110429.

The DVRPC Comptroller will establish a "Sub-Account" charging number in the DVRPC UPWP totaling \$50,000 so that the non-CMAQ eligible administrative tasks can be charged to that specific charge code. The funding for this project will break down as follows: \$201,000 CMAQ which will be toll credit matched, \$34,000 State 581 which will be a state contribution to the project, and \$16,000 in DVRPC Local funds. This arrangement will require PennDOT to develop two new WBS elements for FY21. The first new WBS element will be to address the CMAQ funds while the second WBS element will address the state contribution and DVRPC Local Funds.

Regional Traffic Management Center (RTMC) planning, designing and building/commissioning of a facility to optimize the performance of the surface transportation network by expanding the current function of the freeway management systems to include active traffic management of dynamic junction control, flex lanes, and, part time shoulder use, ramp metering, multimodal coordination, and proactive management of traffic signals along major regional arterial corridors. In addition the RTMC will collect and process/disseminate real time transportation data in order to measure performance. This facility will be the technical and institutional hub to bring together the various regional jurisdictions, modal interests, and service providers to focus on the common goal of optimizing the performance of the transportation network.

The total cost estimate for this project is \$59,952,000. However, FHWA has indicated that federal funds are eligible on the RTMC but not for the parking structure as it will not be open to the public. As a result of this decision, PennDOT will be using \$48,152,000 for the RTMC and \$11,800,000 of Department of General Services (DGS) state funding for the parking structure.

Transportation Management Associations (TMA's) help the region address demand for the region's transportation system. They are public-private partnerships that provide a forum to resolve transportation issues in their service areas. Services include a range of transportation improvement options, including task forces, employer and construction project shuttles, advocacy, and congestion reduction assistance to employers along corridors and in municipalities. TMA's work closely with PennDOT to keep businesses connected and informed about construction projects. Because they actively promote congestion reduction measures and transit use, the TMAs help to lower the need for new highway capacity. Each TMA contractor has a work program tailored to the transportation issues and needs of their constituencies and territories. Work programs are developed collaboratively with PennDOT, DVRPC, and their respective County/City Planning departments.

IMPROVEMENT Other

NHPP:

MUNICIPALITIES: Various

FC:

AQ Code:A1

PLAN CENTER:

IPD:

PROJECT MANAGER: James Mosca

CMP: Minor SOV Capacity

The TMA Competitive Grant Program (TMA CGP) provides a mechanism for southeastern Pennsylvania's TMAs and MAP contractors to supplement their regular Work Programs with additional funding to carry out supplemental activities that are core to their missions, related to transportation issues of reducing traffic congestion, improving air quality by lowering vehicle emissions, facilitating multi-modalism, embracing new technology, and promoting commute alternatives to the single-occupant vehicle, and that concurrently help implement the region's long-range plan. All of the TMAs and MAP contractors submit annual Work Programs under a two-year contract period with PennDOT, and the TMA CGP funding program can either bolster and leverage existing, effective strategies, or be applied for new initiatives consistent with the CMAQ funding source.

The projects that were selected in April of 2019 are:

Partnership TMA - Bicycle Audits and Employee Workshops for Commuters. Expected benefits from this project are improvements that encourage more employees to bike to work.

Delaware County TMA - TDM Targeted Social Media Campaign. Expected benefits from this project would increase awareness of TDM options available and encourage more mode changes for commuting with a younger demographic.

Greater Valley Forge TMA - TDM Outreach and Education along Route 422. Expected benefits from this project are education on TDM options along this corridor and how implementing them can help reduce congestion and improve air quality along the corridor on a more regular basis.

PennDOT District 6-0 is federally required (23 CFR 750.705b) since 2006 to conduct regular surveillance and ongoing illegal sign surveillance for outdoor advertising devices.

The current surveillance must be completed before December 2020. An average of 16 approved sign per week must be surveilled, over a two year cycle, to meet the deadline for regular surveillance.

A total of 1,450 approved signs must be surveilled on a regular basis:

- Bucks County – 300 signs
- Chester County – 150 signs
- Delaware County – 150 signs
- Montgomery County – 150 signs
- City of Philadelphia – approximately 700 signs

The ongoing surveillance of illegal signs will: 1) identify illegal signs for the purpose of legalization, 2) assure that signs erected comply, at a minimum, with size, spacing, and lighting, and 3) remove illegal signs expeditiously.

In addition, the District will continue to perform the administrative responsibilities of application processing by reviewing available documentation and conducting routine field inspections to make recommendations for approval or denial of Outdoor Advertising Device Permits. The District will also continue to log all signs identified as illegal and follow through with written requests for permit applications or removal of the signs.

### Various

MPMS# 114939 *Regional TDM Program*

LIMITS: Regionwide

No Let Date

IMPROVEMENT Other

NHPP:

MUNICIPALITIES: Various

FC:

AQ Code:A1

PLAN CENTER:

IPD:

PROJECT MANAGER: Jim Mosca

CMP: Not SOV Capacity Adding

TDM focuses on the many options available to residents to travel to and from work, as well as to get around our region, in a coordinated, cost-effective, and environmentally-positive way. It centers on the strategies that more efficiently distribute travel demand across all modes, and especially reduce single-occupant vehicle (SOV) travel. An important element of TDM is providing public education and outreach to commuters, employers, residents and visitors within our region about available travel options, and providing a mix of incentives to encourage behavior change toward more efficient use of the regional transportation system. Traditional TDM strategies include public transportation and biking/walking incentives, forming car and van pools - often facilitated by robust park-and-ride lot options - as well as encouraging adding flextime and compressed work weeks, telework plans, and emergency ride home programs into an employer's benefits package.

The time is right for a fresh approach to TDM in the DVRPC region. Recent major technological developments have changed the way the public considers and makes transportation choices. Mapping applications in wide use like Waze and Google Maps are themselves a form of TDM, enabling a more efficient use of transportation networks but not reducing SOV demand. New mobility options like ride-hailing services (uber, lyft, etc.), bike share, and e-bike and e-scooter rentals are being developed and evolving rapidly, and are increasingly linked into shared scheduling and trip purchasing platforms - "mobility as a service (MaaS)." These new technologies and modes, and the changes to travel patterns they have enabled, have also led to more exploration of larger TDM-related policy initiatives and Transportation Control Measures (TCM), such as variable road pricing, trip-reduction ordinances, and transit benefit ordinance requirements. All of these conditions warrant a fresh consideration of which TDM or TCM strategies can work most effectively in the greater Philadelphia region.

Although DVRPC has long included TDM as an element in many individual projects and efforts, there has not been, to date, a formal, coordinated TDM program for the full DVRPC service region. This new coordinated program of projects and activities will help DVRPC and its planning partners better address growing transportation-related needs and challenges, particularly the need to reduce congestion and improve air quality. In coordination with the development of the Commission's 2050 Long-Range Plan, new regional TDM direction and efforts will allow for a broad and strategic approach to TDM in the region, which differs from the mostly ad hoc and service area-based approach used now.

A performance-based and outcome-driven approach to evaluating and undertaking projects will help staff and stakeholders strengthen existing TDM programs, and pilot new initiatives that can serve as a foundation for the future regional TDM portfolio.

CMAQ-funded activities carried out through this program are eligible under FHWA's 2013 CMAQ Guidance VII.F.5. Transportation Control Measures; VII.F.8. Travel Demand Management; and VII.F.9. Public Education and Outreach Activities. Additional Innovative Projects, to be determined, may also be eligible for the use of CMAQ funding under section VII.F.16.

**NHPP:**

**MUNICIPALITIES:** Various

**FC:**

AQ Code:S6

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** Jim Mosca

**CMP:** Not SOV Capacity Adding

Goals: Promote more efficient and cost-effective use of the existing transportation network and services through enhanced coordination and integration of Intelligent Transportation Systems (ITS) and Transportation Systems Management and Operations (TSMO) strategies in order to create more reliable traffic flow, improved safety, reduced congestion, less wasted fuel, cleaner air, and more efficient use of resources including facilities and funding.

Federal metropolitan planning regulations require incorporating transportation operations into the transportation planning process. DVRPC addresses that requirement through the conduct of two long-standing related initiatives. The Transportation Operations Program Area and the Transportation Systems Management and Operations Project (21-41-060) highlight key activities undertaken by these programs which were re-organized for FY 2021 to make sure that all the associated tasks were eligible for the appropriate federal funding sources assigned to each. This required the movement of some tasks from one program to another. The overall project budget for the Transportation Systems Management and Operations Project went down considerably while the Transportation Operations Program Area budget went up significantly. Overall, between both projects, there was a slight decrease in funding while still providing the on-going level of effort from previous fiscal years.

The Transportation Operations Program incorporates Transportation Systems Management and Operations (TSMO) strategies to help proactively manage the transportation system by addressing recurring and non-recurring congestion which results in trip reliability, emissions reductions, improved safety, and efficiency. These principles are integrated into DVRPC's planning processes.

This year's work program is divided into four major components: Traffic Incident Management (TIM), Regional Traffic Signal Retiming, Transportation Operations Task Force (TOTF), TSMO planning efforts and technical assistance. As transportation operations activities tend to be short-term oriented, tasks listed under technical assistance are likely to change as new needs arise.

DVRPC implements Traffic Incident Management (TIM) by providing a series of focused, best-practice training and resource-sharing Traffic Incident Management sessions for incident emergency responders comprised of relevant transportation departments including Pennsylvania and New Jersey Department of Transportation, Pennsylvania Turnpike Commission, Pennsylvania and New Jersey State Police, City of Philadelphia, local law enforcement, local fire departments, emergency medical services, county 911 communications, public works departments, towing and recovery companies, hazardous materials clean-up contractors, and other appropriate regional agencies. These sessions termed Incident Management Task Forces (IMTF) are held quarterly for 8 different groups that were established based on high traffic corridors in the region. In addition to the eight Incident Management Task Forces, DVRPC supports other efforts in the region as needed, and serves as the regional clearinghouse for regional incident management activities. IMTFs implement the planned and coordinated multi-disciplinary process to detect, respond to, and clear traffic incidents so that emergency responder safety issues are addressed, traffic flow is restored as quickly and efficiently as possible thereby reducing the duration and impacts of traffic incidents and non-recurring congestion, incident management responses are improved, and interagency coordination is fostered. Typical activities include Post-Incident debriefings, specialized training on the detection, response, and recovery of traffic incidents, and a feedback-loop for relevant construction projects and ITS deployment.

In Pennsylvania, the Philadelphia IMTF includes working with Philadelphia agencies and PennDOT to improve the operations of expressways in the city, with a major emphasis on operational planning for the reconstruction of I-95. DVRPC also continues to manage the IMTF's in Bucks County, Chester County, Delaware County and Montgomery County (with special outreach as needed for the I-76 Integrated Corridor Management Project). In New Jersey, DVRPC continues to manage the NJ SAFR (Southern Area First Responders) IMTF, which covers Gloucester and Camden Counties, and the Burlington and Mercer County IMTFs. Additionally, DVRPC participates in other incident management programs including both statewide Pennsylvania and New Jersey efforts, and IMTFs initiated by other agencies.

DVRPC will hold a Regional IMTF Conference in FY 2021 with support from regional IMTF leaders, as well as hold topical specialized training session(s) to be determined.

Traffic signals play an important role in the transportation network, and county and local arterial roadways are increasingly being called upon to carry more users. FHWA estimates that many signals on these arterials could be improved by updating equipment or by simply adjusting and updating the timing plans. Outdated or poor traffic signal timing accounts for a significant portion of traffic delay on arterials. Traffic signal retiming is one of the most cost effective ways to improve traffic flow and is one of the most basic strategies to help mitigate congestion and reduce emissions. It improves the mobility and safety of the street system, and decreases congestion and delay while improving travel time and travel time reliability.

DVRPC will continue to support the Pennsylvania Regional Signal Retiming Initiative effort by working with PennDOT District 6 and the counties to choose corridors for retiming, provide cost/benefit emissions benefit data, and serve on the project team. DVRPC will be

## Pennsylvania - Highway Program (Status: TIP)

### Various

supporting the New Jersey Regional Signal Retiming Initiative Program by working with a consultant and stakeholder team to choose corridors for retiming and serve on the project team as coordinator.

Quarterly meetings of DVRPC's Transportation Operations Task Force (TOTF) are the focal point of coordinating transportation operations activities in the region, providing highway and transit operators and emergency responders an opportunity to interact with each other. The Task Force is a forum for agencies to share information on various TSMO and ITS deployments and incident management programs, develop a consensus on regional ITS issues and respond to federal initiatives. As a technical-level group, it may often guide DVRPC's Transportation Operations planning activities that in turn support the Task Force members.

As an ongoing TSMO planning effort to support our stakeholders, DVRPC continues to either maintain or update several regional operational efforts such as the Regional ITS Architecture, Transportation Systems Management and Operations Master Plan, and PennDOT District 6-0 Regional Operations Plan.

As part of project development, staff review and make recommendations for DOT infrastructure projects to incorporate ITS and TSMO operational improvements. In FY 2021, DVRPC will continue to produce periodic bulletins to highlight incident management and transportation operations data as available. DVRPC will continue to provide planning and technical assistance on transportation operations for partners as requested. In addition, DVRPC will continue to investigate innovative programs related to transportation systems management and operations.

This work program is subdivided by the four components described above. Some of these activities may require DVRPC to purchase equipment and or services.

#### Tasks:

##### Incident Management Task Forces Tasks

1. Continue to manage and implement resource sharing for the 5 Pennsylvania (Bucks, Chester, Delaware, Montgomery and Philadelphia County) and 3 New Jersey (Burlington, Mercer and NJ SAFR) Traffic Incident Management Task Forces as an on-going training program.
2. Prepare notices for each session, identify and line up speakers, develop agendas, and prepare summaries and training materials and distribute to all stakeholders.
3. At each session, conduct Post-Incident debriefings a.k.a. After Action Reviews (AARs) which examine events that occurred in the past in order to review and assess the process, procedures and actions performed, and to identify best practices, lessons learned, and potential new protocols which will reduce delay.
4. Work with the task forces to address operational and traffic management issues as needed that may include ITS equipment deficiencies, detour routes, traffic management plans, incident management plans, incident management policy and procedures, communications, and work zone traffic management.
5. Educate Responders regarding Active Traffic Management strategies, including working with PennDOT project managers to bring responders and design consultants together to engage responders in identifying issues to consider in the final design of relevant capital projects and ITS deployment.
6. Construction Project Coordination Discussions bring together responders and construction projects managers and implementers to review construction and work zone stages, address incident response zones and identify different ways to access a crash in a work zone if needed.
7. TIM Performance Measure Data Analysis. Work with partner agencies and collect TIM data regarding time of lane closures, and incident duration. These measures will be tracked and measured over time and will be presented and or produced in periodic data bulletins
8. Promote and provide the PA and NJ Statewide Responder Training sessions, specialized training session(s) to be determined, and various online TIM Training efforts.
9. Social Media awareness campaigns for quick clearance
10. Hold Regional TIM Conference. Identify topics and speakers, prepare all materials, and arrange training demonstration.
11. Participate in New Jersey's Statewide Traffic Incident Management Program and Pennsylvania's PennTime Program and any other TIM programs initiated by state agencies and other agencies.
12. Provide technical support, including mapping services, GIS, and other assistance as requested.

##### Traffic Signal Optimization Tasks

1. Provide technical and policy assistance to PennDOT as it advances the concept of retiming and optimizing traffic signals on a regional basis for Pennsylvania's DVRPC Counties. Attend relevant meetings as requested.
2. In cooperation with PennDOT and DVRPC's Pennsylvania counties, select which traffic signals will be chosen for retiming.
3. Provide technical and policy assistance to the New Jersey Regional Signal Retiming Initiative Program.
4. In cooperation with NJDOT, and NJ's DVRPC Counties, select which traffic signals on 500 and 600 numbered routes will be chosen for retiming.
5. Participate in all kick-off, planning, and coordination meetings related to the regional program.

##### Transportation Operation Task Force

1. Host the quarterly Transportation Operations Task Force. Prepare notices, agendas, identify specialized topics, arrange speakers, prepare and distribute summary materials

## Pennsylvania - Highway Program (Status: TIP)

### Various

2. Support multimodal planning efforts and coordination with various transportation agencies
3. Promote and educate regional agencies and public on TSMO strategies such as active traffic management principles and issues.
4. Continue the regional construction coordination efforts to minimize traffic impacts of overlapping construction projects.
5. Provide a feedback loop to DOT's and other transportation operators on design and operational issues for relevant construction projects and ITS deployment.

#### TSMO Planning Efforts

1. Maintain the Regional ITS Architecture for the Delaware Valley. Work with local stakeholders to ensure consistency between the regional architectures and their project architectures. Continue to coordinate with NJTPA, NJDOT, and PennDOT with their regional and statewide ITS Architecture updates.
2. Update and/or maintain the Transportation Systems Management and Operations Master Plan as needed in coordination with the Long Range Plan updates.
3. Coordinate with PennDOT District 6-0 Traffic Operations, and assist them with maintaining their Regional Operations Plan (ROP)
4. As part of project development, staff review and make recommendations for DOT infrastructure projects to incorporate ITS and TSMO operational improvements.
5. Continue to incorporate TSMO, including ITS investments, into the transportation planning process. Evaluate capital projects for their consistency with the Transportation Systems Management and Operations Master Plan and assist agencies to advance projects identified in the Plan, PennDOT's Regional Operations Plan, or in the Regional ITS Architecture.
6. Monitor federal ITS programs, regulations, and initiatives to identify which ones may impact projects in the region.
7. Perform other activities as requested by NJDOT, PennDOT, operating agencies, or other member governments.

#### Products:

##### Transportation Operations Task Force Products

1. Transportation Operations Task Force meeting agendas, summaries, and meeting materials.
2. Regional Operating Agency Contact List
3. Provide topical specialized training session(s) to be determined.

##### Incident Management Task Force Products

1. Incident management task force training session's agendas, summaries, and resource materials.
2. IMTF policy and procedures guidelines, training aids, maps depicting response areas, and other relevant materials identified by IMTF members.
3. AARs summaries for distribution to all task force members to inform them of best practices, lessons learned, and possible new protocols to reduce traffic delay.
4. Conduct expanded Formal After Action Reviews and prepare reports
5. Traffic congestion analysis
6. Incident Duration and lane closure tracking analysis
7. Produce periodic bulletins to highlight incident management and transportation operations data as available.
8. Roster and contact information of regional emergency agencies
9. Marketing Materials such as the Social Media Campaign Tool Kit for Quick Clearance and Move Over Laws

##### Traffic Signal Optimization Products

1. MOUs, Concept of Operations, memorandums, and final reports, developed for both the Pennsylvania and New Jersey Regional Signal Retiming Initiative Programs.

##### TSMO Planning Efforts

1. Maintenance of the ITS Regional Architecture.
2. Maintenance of the TSMO Master Plan.
3. Implementations of programs to foster interagency cooperation.
4. Technical assistance to agencies.

To assist businesses and commuters with navigating their options for travel as restrictions ease from the COVID-19 pandemic and resulting work shut-down, and continue the momentum of existing messaging regarding transportation options that reduce congestion once the back-to-work period begins.

Tasks involved in the DVRPC Work Program include:

1. Facilitate the activities of the SE PA TMAs and Clean Air Council as they continue working with employers on telework issues - proactive and reactive; explore making programs permanent (in some form) after SAH restrictions are listed.
2. Organize and implement telework training for TMAs and Clean Air Council staff (virtual instead of in-person) - "train the trainer," so they can gain even more current and broader information and skills to use with companies.
3. Implement a regional outreach campaign re: telework - promote how well it's been working for businesses (and the positive environmental effects), and why and how it can continue as we phase into back to work.
4. Coordinate and promote Bike (Back) to Work educational programs, including but not limited to virtual and live bike challenges, short presentations or videos on bike maintenance and repair, promoting bike share and bike match programs, and possibly starting a "pledge" campaign that would encourage riders to commit to (occasionally) using their bike for commute purposes.
5. Partner on certain AQP activities to reinforce and promote the data and results on AQ and other environmental benefits resulting from limited vehicle commutes mid-March to mid-May.
6. Reconnect former vanpool members and initiate possible new carpool groups with Virtual Commuter Lunch Clubs or "Pool" Parties.
7. Initiate a marketing campaign on/near select transit routes and stops to thank essential workers and acknowledge transit agencies' attempts to keep vehicles clean and safe for travel for them, while encouraging previous (and potential new) riders to return to using transit.

### PennDOT

MPMS# 93586 *Downingtown Train Station Rehabilitation*

Return

**LIMITS:**

No Let Date

IMPROVEMENT Transit Improvements

NHPP:

MUNICIPALITIES: Downingtown Borough

FC:

AQ Code:2035M

PLAN CENTER: Town Center

IPD: 16

PROJECT MANAGER:

CMP: Not SOV Capacity Adding

CMP Subcorridor(s): 7E

A new Downingtown Station will be constructed at a location that is less than half a mile east of the existing station on State Route 322/Brandywine Avenue. The existing station is an enclosed shelter with a low-level platform, about 360 parking spaces, and is not ADA accessible. The new station location is along a section of tangent track in Downingtown Borough, selected as a result of the alternatives analysis conducted in 2013 by PennDOT with Amtrak, SEPTA, and local communities. PennDOT has acquired property and completed preliminary design.

The new station will continue to serve Amtrak and SEPTA train service and provide full ADA accessibility with two 550-foot-long high-level platforms for inbound and outbound trains. The platforms will have canopies and will be accessed via elevator/stair towers from the ground level parking areas, which combined will have over 500 parking spaces. The existing railroad bridge over Brandywine Avenue will be replaced as part of the project to provide more vertical clearance and to enable addition of a turning lane for vehicular station-related movements. Additional features of the site include retaining walls, bike racks, sidewalks, visual screening (as required for mitigations), stormwater management, site lighting, and security. The railroad right-of-way through the new bridge and station will require modifications, including removal of the DOWNS Interlocking.

Downingtown Station is a component of the Keystone Corridor between Philadelphia and Harrisburg, a 104-mile line owned and operated by Amtrak. The line shares some of the operating characteristics of the Northeast Corridor (NEC) main line, including multiple tracks, full electrification, and full grade separation from the highway grid. Amtrak operates up to 14 Keystone Service intercity round trips per day between Harrisburg and Philadelphia (and extending to New York City) with up to 22 stops at Downingtown Station. SEPTA operates Paoli/Thorndale Line commuter trains on the eastern portion of the line, with up to 42 stops per day at Downingtown Station. Amtrak ridership numbers for the station are 81,326 (FFY 2019).

MUNICIPALITIES: Pottstown Borough

FC:

AQ Code:M1

PLAN CENTER: Town Center

IPD: 7

PROJECT MANAGER: K. High

CMP: Not SOV Capacity Adding

CMP Subcorridor(s): 9A

This project covers the operating subsidies for the Pottstown Urban Transit System. Funds in this project may also be used for capital projects. Pottstown uses the majority of the annual appropriation for operating, and a small portion for equipment purchases and capital projects as required. Section 5340 funds are included with Section 5307 funds. Capital projects planned in FY23-26 include (also see MPMS# 95739): FY 22 Rolling stock; FY23 Shelter replacement \$230,000; FY24 Shelter amenities \$10,000; FY25 Lift replacement \$60,000.

Pottstown Area Rapid Transit (PART) is a small urban transit system operating five bus routes and ADA paratransit service in the Borough of Pottstown, Upper, Lower, and West Pottsgrove Townships, Limerick Township, and North Coventry Township in both Chester and Montgomery Counties. PART receives an annual apportionment of Federal Section 5307 Funds for operating purposes. PART, by request to FTA, may program apportioned funds for capital purposes.

This project will modernize Villanova Station on the Paoli/Thorndale Regional Rail Line, making the station fully ADA accessible, and will advance in phases. Phase 1 improved station accessibility and included construction of a new, wider pedestrian tunnel with access ramps and stairs, additional parking spaces, stormwater management improvements, new signage, lighting, and passenger amenities, completed in 2019. Phase 2 will make the station fully ADA accessible and includes full length high-level platforms, new canopies, station building improvements, passenger shelters, security improvements and passenger amenities.

The total project cost is \$31.46M. Funding is programmed as follows: Prior year funds in the amount of \$21.01M, and \$10.45M in FY 2024 - FY 2026.

The Capital Asset Lease Program provides for lease payments attributable to the acquisition, through financial leasing arrangements, of the following capital assets: communications antennas, copiers, and Amtrak trackage. SEPTA's Amtrak lease provides for the right to use Amtrak tracks for SEPTA's Trenton, Wilmington/Newark and Paoli/Thorndale Regional Rail service, and portions of the Chestnut Hill West, Media/Elwyn, Airport and Cynwyd Regional Rail Lines. The payments to Amtrak represent SEPTA's allocated portion of Amtrak's cost to maintain and upgrade the right-of-way including protection of assets, maintenance and general administrative overhead in accordance with the Passenger Rail Investment and Improvement Act of 2008 (PRIIA).

PROJECT MANAGER:

CMP: Not SOV Capacity Adding

The Utility Fleet Renewal Program is a comprehensive effort to upgrade and replace the Authority's utility fleet and automotive service fleet. SEPTA utility vehicles support transit and railroad operations. In order to have adequate and reliable utility vehicles, SEPTA has developed a program to periodically renew this fleet on a vehicle-by-vehicle basis, contingent upon the vehicle's age, condition and usage within the Authority.

The utility fleet comprises the following types of vehicles and equipment:

- Utility vehicles for transit and paratransit supervisors, and SEPTA police officers.
- Maintenance-of-way vehicles used for inspection, maintenance and construction of buildings, overhead power systems, communications systems, signal systems and track. These vehicles include trucks, cranes, high rail vehicles and maintenance-of-way equipment.
- Transporter vehicles used in garages and shops, including revenue trucks, forklifts for material handling, pick-up trucks for material movement between depots and shops, and for snow removal.
- Service vehicles used for vehicle maintenance including wreckers, tow tractors, man lifts and pick-up trucks.
- Miscellaneous equipment such as generators, compressors, trailers, floor scrubbers and welding units.

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:**

**CMP:** Not SOV Capacity Adding

Capital funds will provide for debt service and costs related to the issuance of bonds, notes, and other indebtedness incurred by SEPTA for the following debt service payments:

Payments on Capital Grant Receipts Bonds, Series 2011/2017- \$156.88M (Final year of debt service funding for Series 2011-2017 Bonds - FY 2029)

Acquisition of 120 Silverliner V Regional Rail Cars - These electric multiple-unit (EMU) cars have replaced the Silverliner II and III rail cars, and provided additional cars to supplement the regional rail car fleet. Vehicles fully comply with Americans with Disabilities Act (ADA) requirements and federal and state regulations. The total cost for this project of \$319.7 million is funded through a combination of grants and capital financing.

Rehabilitation of the Wayne Junction Intermodal Facility - The Wayne Junction Intermodal Facility was originally constructed at the turn of the 20th Century. This project provided for restoring the station's historic integrity while modernizing its structure to provide a more accessible and environmentally friendly facility for local residents. The project provided for the enhancement of passenger amenities such as lighting, signage, shelters, audio and visual public announcement system, windscreens, benches, HVAC systems, and sanitary systems. Structural improvements included station building rehabilitation and ADA accessibility modifications, such as high-level platforms, elevators, stairway renovations, passenger tunnel improvements, new canopies and shelters. The total project cost of \$29.4 million is funded through a Federal Transit Administration Bus and Bus Facilities Livability Grant and capital financing.

In October 2017, the Authority advance refunded a portion of Capital Grant Receipts Bonds, Series 2011 ("Series 2011 Bonds"), to reduce future debt service payments. The final maturity date of the newly issued Series 2017 Bonds was unchanged from the Series 2011 Bonds.

Payments on Fixed Rate Revenue Refunding Bonds, Series 2017/2019 - \$103.25M (Final year of debt service funding for Series 2017-2019 Bonds - FY2028)

Proceeds from the Fixed Rate Revenue Refunding Bonds ("Series 2010 Bonds") were used to refund the Special Revenue Bonds, Series 1999, which provided funds for the Market-Frankford Line cars, various capital improvement projects, and partial refunding of Series 1995A Bonds. In October 2017, the Authority advance refunded a portion of the Series 2010 Bonds to reduce future debt service payments. In December 2019, the Authority refunded a portion of the Series 2010 bonds to further reduce future debt service payments. The final maturity of the Series 2017 and 2019 bonds was unchanged from the Series 2010 bonds

Capital Financing- EB5 Loan - \$241.90M (Refinancing in FY 2022)

In January 2016, SEPTA entered into a loan agreement with the Delaware Valley Regional Center (DVRC) pursuant to the Employment Based Immigration-5th Preference (EB-5) Program administered by United States Citizenship and Immigration Services (USCIS). The loan was made available to SEPTA over a period of several years and was used to partially fund the acquisition of electric locomotives, expansion of Frazer Yard, and substation rehabilitation projects. This loan will be refinanced as part of the Bond Issuance SEPTA is undertaking in calendar year 2022.

Payments on Capital Grant Receipts Bonds, Series 2020 - \$130.89M (Final year of debt service funding for other Capital Financing – FY 2032)

Acquisition of 140 Hybrid (Diesel-Electric) Buses – These buses replaced diesel buses acquired in 2004. The vehicles fully comply with Americans with Disabilities Act (ADA) requirements and federal and state regulations. The buses have electronic exterior and interior destination signs, voice announcement of bus destination and upcoming bus stops, interior video display monitors and the capability for SEPTA's Control Center to broadcast messages directly to passengers. These buses are equipped with on-board video surveillance and automatic passenger counting systems. The buses are also equipped with enhanced passenger amenities such as USB Charging Ports, Cellular Router for real time critical vehicle data on demand and a dual purpose Passenger Wifi system, and a Qpod Wheelchair Restraint System to decrease wheelchair and scooter ambulatory device tipping.

Payments on State Motor Vehicle Sales Tax Bonds, Series 2022- \$984.50M (Final year of debt service funding for other Capital Financing (Estimated – FY 2034)

On February 24, 2022, the SEPTA Board approved the Authority to issue bonds in an amount not to exceed \$800 M to support SEPTA's capital program. This approval is based on PennDOT's prior approval for SEPTA to issue debt pursuant to Section 1514(f) of Title 74 of the

Rehabilitation of City Hall Station on the Broad Street Line and 15th Street Station on the Market-Frankford Line to make the stations fully ADA accessible; bring the stations to a state of good repair; improve customer use, safety and security; and reduce heavy maintenance costs. Specifically, the project will:

- 1) Provide full access for riders with disabilities through fourteen new elevators and ramps to all levels of both stations, new and wider ramped corridors connecting the stations, and new accessible fare line gates;
- 2) Improve passenger flow with new and reconfigured fare lines outfitted for the new SEPTA Key program, new and wider stairs and railings, and more open areas in the 15th Street Mezzanine and on the platforms;
- 3) Update station interiors and systems including new architectural finishes, new signs, Art-in-Transit, new seating and other amenities, new lighting and public address systems, new updated fire alarm system, closed-circuit TV and security systems; and,
- 4) Provide structural repairs and upgrades, mechanical and natural ventilation and improvements to prevent/intercept water infiltration and inflow, new fire suppression systems and new employee restrooms.

The City Hall / 15th Street Stations project has been divided into the following phases:

- Dilworth Park Phase (complete): Included work to prepare for the park's construction by the Center City District (CCD); construction of the new station entrance outside the west portal of City Hall; and five new elevators connecting street level to the rebuilt fare lines and 15th Street Station and the eastbound trolley platform.
- 15th Street Station (complete): Five new elevators for 15th Street Station connecting street level to MFL and trolley platforms and overall interior renovations and upgrades to station finishes, platforms, lighting, fare lines, security system and accessibility improvements.
- Interlocking Reconfiguration: Modification of the interlocking at Fairmount to allow for track outages necessary for City Hall underpinning and station construction.
- Inter-Station Connections and City Hall Station structural work (underpinnings): New and widened corridors with ramps, improved ventilation structures, platform wall openings, and new elevator shaftways from the City Hall Station mezzanines to the platforms.
- City Hall Station: Upgrades within City Hall Station including fitting out the elevator shaftways with elevators to complete ADA compliance and new or renovated platforms, stairs, lighting and amenities.

The total project cost is \$189.04M (Prior year funds - FY 2029).

This program will provide for the construction, renovation, and expansion of SEPTA's parking facilities.

Currently programmed projects include:

- Conshohocken Station Parking Garage\* - \$38.22M (Prior Years - FY2025)
- Holmesburg Junction Parking Expansion - \$690,000 (Prior Years - FY2023)

Due to reduced ridership resulting from the COVID-19 pandemic and as part of the Reimagining Regional Rail initiative, SEPTA is re-evaluating station parking needs. The following projects listed under the previous capital budget will be revisited in coordination with the results of Reimagining Regional Rail and as ridership returns and the need for parking at each location is more clear.

- 69th Street Transportation Center Parking Garage
- Gwynedd Valley Station Parking
- Ivy Ridge Parking
- Noble Station Parking Garage and Storage Track
- Philmont Station Parking
- Fern Rock Transportation Center Complex

\*\$8M of FHWA CMAQ Flex funding is programmed in FY 2023 of MPMS #111005 to fully fund the project.

PROJECT MANAGER: CMP: Not SOV Capacity Adding

This project provides for the engineering and construction of a new multimodal transportation center in Paoli, Chester County. The facility is located on SEPTA's Paoli/Thorndale Regional Rail Line and Amtrak's Harrisburg Line. Connecting services include Bus Routes 92, 106, 204, and 206.

The project includes two phases. Phase 1, completed in September 2019, made the existing station ADA accessible.

Phase 2 includes construction of an additional high-level platform on the outbound side, passenger amenities, enhanced bus facilities, improved station access. A companion PennDOT project will consist of the extension of Darby Road over the railroad, including a new bridge connecting to the station, and the removal of the North Valley Road bridge. This companion project needs to be completed prior to advancement of Phase 2. The estimated cost is \$50.28M (FY 2028 - FY 2034 Design and Construction).

Due to reduced ridership resulting from the COVID-19 pandemic and in conjunction with the Reimagining Regional Rail initiative, SEPTA is re-evaluating its station parking project schedules. A schedule and funding plan for Phase 3 will be developed as ridership levels increase and necessity for additional parking becomes more clear.

**MUNICIPALITIES:** Various FC: AQ Code:M3  
**PLAN CENTER:** IPD:  
**PROJECT MANAGER:** CMP: Not SOV Capacity Adding

SEPTA's Vehicle Overhaul Program (VOH) provides for the systematic replacement or upgrade of systems on SEPTA's rolling stock and VOH support equipment. In addition to vehicle fleet overhauls, this program also provides for vehicle campaigns to address specific component overhaul needs of a bus or rail fleet. The VOH Program allows SEPTA to continue its overhaul of rolling stock, thus ensuring continued safe and reliable service, particularly for its increasingly aging rail vehicle fleet.

Vehicles are scheduled for overhauls during their service lives based on vehicle type and age to optimize performance throughout its useful service life. Prudent fleet management requires a program of preventive maintenance for optimal fleet reliability, service quality, efficient performance, and passenger comfort. Advanced scheduling of vehicle overhauls and campaigns allows SEPTA to purchase material and produce rebuilt components in an efficient and effective manner.

Highlights of the Fiscal Year 2023 program includes the following activities:

Bus Overhaul: 40-foot Nova hybrid buses, 60-foot Nova Articulated hybrid buses and prototypes for the midlife overhaul of New Flyer 40-foot Xcelsior and 30-foot MiDi Series fleets.

Rail Overhaul: Broad Street B-IV cars, City and Suburban trolleys, Regional Rail Silverliner IV and V cars, Regional Rail Push-Pull cars, Market Frankford M-4 cars, Route 15 PCC-II Trolley Cars, Norristown High Speed Line N-5 cars, and support vehicles and equipment.

Highlights of rail transit campaigns for Fiscal Year 2023 include: M-4 LCU Software Upgrade; M-4 carbody bolster repairs. Regional Rail campaigns include Push-Pull cab/coach center door overhaul, HVAC control box upgrade and various Silverliner IV equipment and system overhauls.

SEPTA routinely acquires new revenue vehicles for its paratransit and shared-ride services to replace vehicles that have exceeded their useful life of five years. These vehicles are provided to private carriers, which operate the services and maintain the vehicles under contract to SEPTA.

SEPTA ownership of these vehicles provides the following benefits:

The flexibility to rapidly exchange vehicles between carrier networks should the need arise

Creates an economic incentive for carriers to provide quality service

More control over fleet composition and standardization of the fleet

More control over vehicle design features.

CMP: Not SOV Capacity Adding

The SEPTA Key (New Payment Technologies) Project is modernizing SEPTA's antiquated fare payment and collection system by replacing it with a system that utilizes contactless payment devices and readers. New Fare Kiosks located in stations and other terminal locations will improve customer convenience for fare instrument purchases. Key Cards will also be widely available in retail establishments throughout the SEPTA service area and will be reloadable: 1) at Fare Kiosks or ticket offices; 2) automatically through an account with SEPTA; or 3) through an on-line transaction or the Call Center.

SEPTA Key is unique because it will include all of SEPTA's service modes. In addition to bus, rail transit, and regional rail fare collection improvements, this project will include improvements to the payment and collection procedures for SEPTA's Customized Community Transportation (CCT) operation and SEPTA's parking operations. Computer equipment and software systems will support the enhanced system-wide fare collection system.

SEPTA Key deployment is substantially complete for Transit services (Bus, Trolley, Trackless Trolley and High Speed Lines). Regional Rail phased roll-out is underway with Trailpasses in service. Railroad deployment will continue through 2020 with Travel Wallet, conductor sales, and other features and products. CCT development is underway with deployment starting in 2020. Upcoming Key features include: upgraded Key Card readers, mobile ticketing and open payment/ mobile wallets.

Companion projects supporting the SEPTA Key project include: SEPTA Key 2.0 Fare Payment System, bus and trolley farebox upgrade; Market-Frankford Line and Broad Street Line fiber optics improvements; electrical support for new fare lines at five Center City Regional Rail stations (Temple University, Jefferson Station, Suburban Station, 30th Street Station and Penn Medicine Station); Broad Street Line, Market-Frankford Line and Trolley station fare line improvements; zone offices to monitor fare lines and assist passengers; control modifications for elevators; Railroad station waiting room security; provision of power to Railroad Parking Payment Stations; and 30th Street Railroad Station ticket office/vendor relocations. These SEPTA Key companion projects are necessary to provide enhanced customer service and achieve cost efficiencies and revenue enhancements. Most of this work is complete or nearing completion.

Proposed future funding will ensure SEPTA Key technology remains up-to-date are included in the Safety and Security Technology Upgrades project within the Safety & Security Program.

The SEPTA Board approved a loan agreement with the Philadelphia Industrial Development Corporation (PIDC), Limited Partnership (LP) XXVIII, to partially finance this project. The total project cost includes the loan repayment, interest, and companion project costs.

The total project cost is \$315M. Funding is programmed as follows: Prior year funds in the amount of \$310M and \$5M in FY 2023.

Project status updates are available online at <http://www.septa.org/key/>.

This project will provide restoration of rail service from the existing Media/ Elwyn Regional Rail Line terminus at Elwyn, Delaware County, to a new terminus at Middletown/Route 1, Delaware County along the existing right-of-way referred to as the West Chester Branch. The scope of work for this project consists of track bed reconstruction including crossties, continuous welded rail and track interlockings; catenary system replacement; and the replacement and rehabilitation of bridges and culverts. The installation of a bi-directional signal system and communications system improvements including Positive Train Control (PTC) is being funded separately under a competitive PTC grant from the Federal Transit Administration.

The new terminus at Middletown/Route 1 will include a station building with a passenger waiting area and restroom facilities; a high-level island platform with canopy and windscreens; a pedestrian underpass with accessible ramps and stairways; a 600+ car parking deck; and connections to SEPTA bus service. The new facility will be fully ADA compliant. The project also includes the construction of a new traffic intersection and access road connecting U.S. Route 1 to the station. A railcar storage/maintenance yard and crew facility will be constructed on SEPTA property in Lenni, Delaware County.

The total project cost is \$197.21M. Funding is programmed as follows: Prior year funds in the amount of 184.50M and \$12.71M in FY 2023.

Multi-Level Regional Rail Cars - \$179.20M (Prior Years- FY 2025)  
 This project provides for the acquisition of new multi-level push-pull passenger railcars. In 2017, a contract was awarded to CRRC MA Corp. for 45 railcars with an option for an additional 10 push-pull railcars. The new cars will fully comply with Americans with Disabilities Act (ADA) requirements and federal and state regulations regarding safety features and systems. The cars will include passenger amenities, such as a state-of-the-art climate control system, bicycle storage area and WiFi. The new cars will have electronic exterior and interior destination signs, voice annunciation and corresponding display on video screens of train destination and upcoming station stops. In addition, the new railcars will be equipped with on-board video surveillance and automatic passenger counting systems.

These projects will replace existing equipment with modern indoor switchgear and state-of-the-art industry safety systems, communications and relay protection systems, and will provide additional power and reliability. Work includes replacing transformers, trolley breakers, feeder switches, substation switchgears and protective relaying. Power infrastructure must also be brought to a state of good repair. This includes replacing catenary systems and upgrading 80+ year old Regional Rail infrastructure. Additional power improvements will be undertaken as part of the Infrastructure Safety Renewal Program (ISRP) MPMS #90497.

Currently programmed substation and power projects include:

**Multimodal Substation Overhaul Program:**

- Supervisory Control and Data Acquisition (SCADA) System and Network Upgrade - \$18.50M (FY 2028 – FY 2034)
- Substation Design and Equipment Purchase - \$28.23M (Prior Years – FY 2024)

**Power Program:**

- 30th Street West Catenary Replacement - \$77.00M (Prior Years – FY 2027)

**Railroad Substation:**

- Railroad Substation 18th Street Switching Station - \$13M (FY 2023 – FY 2025)
- Railroad Substation Brill - \$12.8M (FY 2025 – FY 2028)
- Railroad Substation Chestnut Hill - \$22.54M (FY2022 – FY 2026)
- Railroad Substation Cresheim Valley - \$25.79M (FY 2022 – FY 2026)
- Railroad Substations Lansdale, Hatboro, & 12th/Portal - \$31.54M (FY 2019 – FY 2022)
- Wayne Junction Static Frequency Converters #1-4 - \$85.70 (Design - Prior Years - FY2021) (Construction - FY 2022 – FY 2027)
- Railroad Substation Woodbourne - \$23.79M (FY2023 - FY2026)

**Transit Substations Program:**

- Transit Substation Ellen - \$12.68M (FY 2025 – FY 2028)
- Transit Substation Market - \$12.50M (FY 2022- FY2024)
- Transit Substations Park, Broad, Loudon, Castor - \$19.95M (FY2022 - FY2024)
- Transit Substation Ranstead - \$12.68M (FY 2027– FY 2029)

Transit Substation Program - \$140M (FY 2028 - FY 2034)

Improvements to the Ardmore Transportation Center on the Paoli/Thorndale Regional Rail Line will be completed in two phases.

Phase 1 will make this station fully ADA accessible with enhancements that include a new inbound station building; outbound shelters; high and low-level platforms; canopies; passenger amenities; tunnel accessibility improvements; elevators and accessible pathways; improved lighting; new signage; landscaping and site improvements including stormwater management; and installing foundations for a future parking garage.

Phase 2 includes the construction of an accessible multi-level parking garage with approximately 500 spaces; landscaping; site improvements; bus berthing area inside the garage; and improved vehicle and pedestrian access to Lancaster Avenue. Due to reduced ridership resulting from the COVID-19 pandemic and in conjunction with the Reimagining Regional Rail initiative, SEPTA is re-evaluating its station parking project schedules. A schedule and funding plan for Phase 2 will be developed as ridership levels increase and necessity for additional parking becomes more clear.

The total project cost (Phases 1 & 2) is \$79.65M. The Phase 1 budget is \$53.60M Funding is programmed as follows: Prior year funds in the amount of \$50.6M. The Phase 2 budget is \$26.05M (Construction TBD).

This program provides for the construction, reconstruction or rehabilitation of transit and regional rail stations and terminals, bus/trolley loop facilities, transportation centers, bicycle facilities, and parking expansions and improvements. Program elements include the replacement or rehabilitation of station and loop facility components, such as station buildings, ticket offices, waiting rooms, passenger shelters, canopies, platforms, crosswalks and overpasses, escalators and elevators, lighting, signage, and accessible paths. All improvements fully comply with requirements of the Americans with Disabilities Act (ADA). SEPTA currently has 121 wheelchair accessible railroad/rail transit stations.

Currently programmed projects include:

#### Multi-Modal Improvements and ADA Accessibility Projects:

- ADA Bridge Plates - \$2.21M (FY 2020 – FY 2023)
- Bicycle Transit Access Program - \$2.26M (Ongoing)
- Center City Concourses Improvements - \$59.65M (Prior Years – FY 2029)
- Rail Transit Wayfinding & Signage - \$40M (FY 2021 – FY 2025)

#### Regional Rail Station ADA Accessibility and Improvement Program

- Bristol Station on Trenton line - \$30M (FY 2022- FY 2023 Design) (FY 2024 – FY 2026 Construction)
- Chestnut Hill East ADA Improvements - \$11.17M (FY 2021 – FY 2026)
- Conshohocken Station - \$15.00M (Prior Years – FY 2024)
- Cornwells Heights Station Improvements - \$13.1 M (Prior Years - FY2023)
- Jenkintown-Wyncote Station - \$50.28 (Prior Years – FY 2026)
- Malvern Station High Level Platforms - \$15.26M (FY 2022 – FY 2027)
- Marcus Hook Station - \$22.50M (FY 2022 – FY 2037)
- Noble Station on the West Trenton Line - \$28.20M – (Prior Year – FY 2023 Design) (FY 2027 – FY 2031 Construction)
- Regional Rail Roof Program - \$12M (Ongoing)
- Swarthmore Station - \$7.96M (FY 2022 – FY 2025)
- Willow Grove Station - \$39.44M (Prior Years - FY2023 Phase 1) (FY 2024 - FY 2033 Phase 2)

#### Broad Street Subway Stations

- Design for Broad Street Subway Station ADA Accessibility - \$12.48M (FY 2022 – FY 2024)
- Chinatown Station on the Broad-Ridge Spur - \$10M (FY 2025 – FY 2028)
- Ellsworth-Federal Station - \$19.82M (FY 2022 – FY 2031)
- Erie Station on the Broad Street Line - \$23.27M (Prior Years – FY 2025)
- Fairmount Station - \$35.05M (Prior Years – FY 2028)
- Hunting Park Station - \$24.76M (FY 2022 – FY 2030)
- Logan Station - \$24.76M (FY 2022 - FY2030)
- Lombard-South Station - \$19.82M (FY 2022 - FY2032)
- Snyder Station - \$30.36M (FY 2022 - FY2026)
- Susquehanna-Dauphin Station - \$23.87M (Prior Years - FY2026)
- Tasker-Morris Station - \$19.21M - (Prior Years - FY2023)
- Wyoming Station - \$24.76M (FY 2022 - FY2029)

#### Market Frankford Line Stations

- 11th Street Station - \$23.81M (Prior Years – FY 2025)
- 34th Street Station - \$31M (FY 2024 – FY 2028)
- Spring Garden Station - \$7.37M (FY 2024- FY 2026)

#### Norristown High Speed Line Stations

- Bridgeport Station - \$4M (FY 2022 - FY 2025)
- Villanova Station - \$4M (FY 2022 – FY 2025)

#### All Stations Accessibility Program (ASAP)

Accessibility improvements to the 11th Street Station on the Market-Frankford Line, and the Fairmount (upper & lower), Snyder, Chinatown, and Erie Stations on the Broad Street Subway - \$56.050M (FY 2023)

The annual Infrastructure Safety Renewal Program (ISRP) provides for the restoration by SEPTA forces of SEPTA's City and Suburban transit and railroad infrastructure to a state of good repair.

Projects to be advanced include:

-Track and Right-of-Way - Renewal or replacement of track, switches, and special work including yard and shop areas, track surfacing, culverts, bridges, retaining wall, and grade crossing improvements.

-Station Facilities - Rehabilitation of station buildings and associated facilities including roofs and canopies, ticket offices and waiting rooms, platforms, lighting, sanitary facilities, parking, and accessibility improvements.

-Communications and Signals Systems - Rehabilitation of signal systems and select communications equipment.

-Power Systems - Rehabilitation of electric traction and power systems and associated components including catenary and support structures, feeders and transmission lines, and localized and centralized control facilities.

-Maintenance/Support Facilities - Rehabilitation of shops, maintenance/storage yards, and associated maintenance and support facilities, including improvements or replacement of air compressors, sump pumps, tunnel lighting, duct banks, vehicle servicing equipment, and other support functions.

SEPTA's Bus Fleet Management Plan provides for the acquisition of different size buses based upon needs and route characteristics. The current bus fleet consists of a variety of buses. SEPTA is planning for a full transition to zero-emission buses (ZEBs) by the year 2040. The Zero Emission Bus (ZEB) Master Plan will lay the groundwork for the bus fleet of the future. SEPTA has completed the first phase of analysis that examines the feasibility of procuring battery electric buses (BEBs) and installing charging infrastructure to support the fleet. The next phase of the plan will evaluate fuel cell electric buses (FCEBs) and the necessary fueling infrastructure to support them. To ensure the safety and continuity of bus operations while the ZEB Master Plan and transition plan is finalized, the Authority contracted with New Flyer to purchase 220 hybrid buses with an option on the third year to allow flexibility to transition to a zero-emission bus procurement sooner if technology is available. This bus procurement will allow SEPTA to retire the last of the all-diesel fleet which is now more than 15 years old (purchased in 2005). Future bus purchases will be guided by the ZEB Master Plan.

Funding for this program is also provided from MPMS #65109, FHWA Transit Flex to SEPTA. State funds programmed in MPMS #90512 each year will be applied as a state match for the flex funds programmed in MPMS# 65109.

Phase 1 of this project, completed in 2020, consisted of the construction of high-level platforms with canopies and wind screens; stormwater management improvements; a new station building, new lighting, signage, security features, and passenger amenities. The station facilities are fully ADA accessible. The total cost of Phase 1 was \$28.23M.

Phase 2 initiate design and implement of Exton Station Multimodal Improvements project on the Paoli-Thorndale Regional Rail Line. This phase will design and implement multimodal improvements, including the construction of a bus loop with bus shelter. Derived from the recommendations of Bus Revolution, the planned bus circulator loop will promote intermodal access to the station. Phase 2 is estimated to cost \$6M (FY 2022 - FY 2024)

Phase 3 will provide for the development and construction of a fully accessible parking expansion. Due to reduced ridership resulting from the COVID-19 pandemic, SEPTA is re-evaluating its station parking project schedules. A schedule for this phase will be determined as ridership returns.

This program will replace or rehabilitate SEPTA's bridges. Rehabilitation/replacement of bridges on rail lines and SEPTA right-of-ways will include culverts, pedestrian bridges and associated bridge support structures. Currently programmed projects include:

- Chestnut Hill East Regional Rail Line, 5 Bridges (Philadelphia) - \$30.00M (FY 2022 - FY 2026)  
Mile Post 5.04 over Wayne Avenue; Mile Post 5.72 over Logan Street; Mile Post 7.63 over Chew Street; Mile Post 8.90 over Mt. Pleasant Avenue; Mile Post 9.59 over Chresheim Valley Drive
- Chestnut Hill West Regional Rail Line, 7 Bridges (Philadelphia) - \$35.00M (FY 2022 - FY 2028) Mile Post 0.06 over SEPTA Main Line; Mile Post 0.83 over 22nd Street; Mile Post 1.17 over Hunting Park Avenue; Mile Post 1.26 over CSX Tracks; Mile Post 2.98 over Rittenhouse Street; Mile Post 4.42 over Carpenter Lane; Mile Post 5.67 over Springfield Avenue
- Critical Bridge Program (System wide) - \$164.19M (Ongoing). Annual program to rehabilitate or replace bridges throughout the system to restore infrastructure to a state of good repair Bridges programmed for design and/or construction in FY 2023 include but are not limited to:
  - Fox Chase Line MP 7.03 (3rd St. Philadelphia), Built 1910
  - Lansdale/Doylestown Line MP 11.62 (Keswick Ave.), Built 1904
  - Lansdale/Doylestown Line MP 11.83 (Easton Road), Built 1928
  - Media/Elwyn Line MP 10.12 (Small Run), Built 1965
  - Media/Elwyn Line MP 13.81 (Park Ave.), Built 1917
  - Norristown Line MP 17.16 (Dekalb St.), Built 1931
  - Norristown Line MP 17.77 (Stoney Creek), Built 1900
  - West Trenton Line MP 31.63 (Delaware & Raritan Canal), Built 1902
- Mainline-Schuylkill Bridges (Philadelphia) - Total project of \$59M (Phase 1 Complete; Phase 2 \$10.95 (FY2021-2024; Phase 3 \$45.05M FY2022 - FY2028) Mile Post 0.49 over 21st Street; Mile Post 0.58 over 22nd Street; Mile Post 0.61, 0.64, & 0.68 over 22nd / 23rd Street; Mile Post 0.72 over CSX Tracks; Mile Post 0.76 over the Schuylkill River
- Stone Arch Bridges Phase 2 (Multiple Locations) - \$13.20M (Design Prior Years - FY2017- FY 2020) (Construction FY 2025-2028)  
Doylestown Line Mile Post 4.87 Built 1915; Lansdale Line Mile Post 18.91 Built 1903; Media/Elwyn Line Mile Post 12.68 Built 1854; West Trenton Line Mile Post 13.70 Built 1912; West Trenton Line Mile Post 15.95 Built 1876; West Trenton Line Mile Post 18.52 Built 1948; West Trenton Line Mile Post 22.65 Built 1876.
- Norristown High Speed Line Bridge Mile Post 0.15 (Over 69th Street Yard Tracks) - \$4.00M (Prior Years - FY 2023)
- Norristown High Speed Line Bridge Mile Post 12.81 (Bridgeport Viaduct) - \$35M (FY2022 - FY2025)
- Suburban Rail Transit Critical Bridge Program - \$29.85M (Ongoing). Bridges programmed for design and/or construction in FY 2023 include but are not limited to:
  - Sharon Hill Line MP 3.06 (Darby Creek), Built 1905
  - Media Line MP 3.70 (Darby Creek), Built 1912
  - Media Line MP 3.77 (Darby Creek), Built 1912

This program will provide for improvements to SEPTA's track and right-of-way. SEPTA operates rail service over 605 route miles of track (including track owned by SEPTA, Amtrak, the City of Philadelphia, and CSX). Projects will return rail infrastructure to a state of good repair and help preserve rail transit service for current and future customers. This program includes projects on both the Transit and Regional Rail systems that will renew street track and special work, replace continuous welded rail (CWR), and renew ties and timbers. This program also focuses on the stabilization of soil and rock slopes, stormwater and erosion control, track drainage, and the repair and prevention of sinkholes in the right-of-way. Additional track and right-of-way improvements will be undertaken as part of the Infrastructure Safety Renewal Program (ISRP).

Currently programmed projects include:

- Harrisburg Line Capacity Improvements – Track 2 - \$16.68M (Prior Year Funding – FY 2023)
- Market-Frankford Line Bridge Street Yard Program - \$3.00M (Prior Year Funding - FY2023)
- Norristown High Speed Line Tie Replacement and Continuous Welded Rail - \$33.60 (Prior Years - FY2023)
- Route 101/102 Yard Tracks Program - \$7.10M (Prior Year Funding – FY 2024)
- Track and Right of Way Improvements - \$18M (FY 2026 – FY 2034)
- Trolley Tunnel Track - \$42.80M (Ongoing)
- Norristown Station Regional Rail 3rd Track - \$34.50M (FY 2028 – FY 2034)
- MFL Haunches - \$1,000 (FY 2023)

This program will repair and improve the roofs of various SEPTA maintenance buildings, transportation facilities, and stations. Work to be performed includes replacing and upgrading roof structures, mechanical equipment, electrical connections, brick repairs, roof-mounted HVAC equipment, and the replacement of old roofing systems.

Currently programmed projects include:

- 5800 Bustleton Roof Replacement - \$1.75M (FY 2024 – FY 2025)
- 69th Street Terminal Shop Complex Roofs Replacement - \$14.10M (Prior Years - FY2023)

This program provides for improvements to SEPTA's bus and rail maintenance shops, administrative facilities, and office buildings. This program includes ongoing renewal and replacement of programs including but not limited to the wheel truing, bus and steel wheel lift, fire suppression, boilers and vehicle washer shop and yard upgrades, and paving improvements. In addition, this program includes new facilities and rehabilitation of existing facilities as well as a roof rehabilitation and replacement program. Remediation and clean up activities at select facilities as well as activities that will reduce SEPTA's carbon footprint and enhance SEPTA's commitment to sustainability are also included in this program.

Currently programmed projects include:

- Boiler Replacement Program - \$16.00M (FY 2027 - FY 2034)
- Bus Lift Program - \$8M (FY 2027 – FY 2034)
- Courtland Shop Improvements - \$22.50 (FY 2018 – FY 2022 Design) (FY 2023 – FY 2025 Construction)
- Environmental Cleanup - \$24.64M (Ongoing)
- Facilities Critical Infrastructure Program - \$43M (Ongoing)
- Frazer Rail Shop and Yard Upgrade\* - \$139.00M (Prior Years – FY 2026)
- Frazer Transportation Building - \$25M (FY 2021 – FY 2023 Design) (FY 2025 – FY 2030 Construction)
- Garage/Shop Overhead Doors - \$7.50M (FY 2029 – FY 2034)
- Maintenance Shop Equipment Program - \$61M (Ongoing)
- Powelton Yard Facility Improvements - \$5.53M (Prior Years - FY2023)
- Steel Wheel Lift Program - \$12.32M (FY 2023 – FY 2034)
- Vehicle Washer Program - \$14M (FY 2025 - FY2028)
- Wheel Truing Program - \$10.5M (FY 2024 – FY 2034)
- Wyoming Complex Storm Water Retrofits - \$8.36M (FY2020 – FY2021 Design) (FY 2022- FY20234 Construction)
- Victory Shop and Storage - \$18.75M (FY 2023 – FY 2024 Design) (FY 2024 – FY 2026 Construction)
- Maintenance Facilities Improvement Program - \$55M (FY 2028 – FY 2034)
- SEPTA Depot Zero-Emission Bus (ZEB) Power Resiliency Project - \$22.4M (FY 2023 - FY 2027)
- Midvale Depot Electric Bus Infrastructure Project - \$5.375 (FY 2023 - FY 2025)

\*Frazer Rail Shop & Yard Upgrade- Phased upgrade of the Frazer Maintenance Facility to accommodate the expansion of SEPTA's railcar and locomotive fleets including multi-level cars. Work includes extending existing storage tracks and adding new storage tracks; major upgrades to the repair shop and equipment, including the wheel truing machine and drop table; construction of a shop extension, new cleaning track, train washer building, storage building and yardmaster building; utility upgrades and stormwater improvements. In addition, the roof will be replaced, and mechanical equipment will be replaced. The budget for this project is \$139 million.

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:**

**CMP:** Not SOV Capacity Adding

This program provides for improvements to SEPTA's communications systems, signal systems, information technology infrastructure - including vehicle and facility video systems. As part of its capital program, SEPTA will replace its Computer Aided Radio Dispatch (CARD) System, install Positive Train Control on the Route 101/102 Trolley lines [Media-Sharon Hill Line (MSHL)], upgrade dispatching and scheduling systems, and implement a real-time vehicle arrival information display system. Rail signal modernization projects and interlocking improvements will enhance operational reliability and service quality. The annual Information Technology program provides replacement and upgrades of the Authority's computer hardware, software and network equipment, such as servers, digital signage, and Enterprise applications. This program also provides capital dollars to support SEPTA's transformative Efficiency and Accountability Initiative to improve how SEPTA functions as an organization on a day-to-day basis.

Currently programmed projects include:

- Harrisburg Line Capacity Improvements – Paoli to Overbrook - \$21.90M (FY 2022 – FY 2028)
- Positive Train Control - \$174.02M (Prior Year funding \$160.3M - FY 2021) (Continuing Intregation with Partner Railroads FY 2021 - FY 2023)
- Positive Train Control – Onboard Survey Mapping - \$3.3M (FY 2021 – FY 2023)
- Railroad Interlocking Improvement Program - \$183.96M (Ongoing)
- Southwest Connection (30th to Phil Catenary, Signals and ROW Improvements) - \$57.99M (Prior Years - FY 2022)
- Regional Railroad Signal Improvement Program - \$40M (FY 2028 – FY 2034)
- Broad Street Line Ridge Spur Signals - \$14.66M (Prior Years - FY2023)
- Broad Street Line Signals (Broad Street Subway) - \$65.00M (FY 2028 – FY 2034)
- Market Frankford Line Positive Train Control - \$82M (FY 2022 – FY 2028)
- Norristown High Speed Line Interlockings - \$12.27M (Prior Years - FY2024)
- Route 101/102 Positive Train Control and ROW Improvements - \$90.12M (Prior Years – FY 2023)
- Signal System Renewal on the Norristown High Speed Line - \$80M (FY 2022 – FY 2023 Design) (FY 2023 – FY 2030 Construction)
- Computer Aided Radio Dispatch (CARD) System Replacement - \$124.82M (Prior Years - FY2026)
- Control Center Wall Display - \$6.39M (FY2021- FY2023)
- Crash Hardened Video Recorders - \$7.73M (Prior Years - FY2022)
- Real Time Information / Audio Visual Public Address (AVPA) - \$34.73M (Prior Years - FY2024)
- Telecommunications System Replacement - \$13.71M (FY 2022 – FY 2025)
- Facilities Video System - \$1.86M (Prior Years – FY 2022)
- Fare Payment Technology Upgrade Design - \$5M (FY 2022 – FY 2024)
- Information Technology Program - \$134.32M (Ongoing)
- Operations Training Simulators - \$6.59M (Prior Years - FY2022)
- SEPTA Transformation – Efficiency and Accountability Capital Support - \$1.9M (FY 2022 – FY 2024)
- Transit Asset Management - \$6.77M (Prior Years – FY 2023)
- Video Systems Refreshment Program - \$42.37M (FY 2023 – FY 2034)

Safety is a core value at SEPTA. All projects advanced in the capital program have a safety-first focus throughout. Having a comprehensive safety plan and program is part of SEPTA's goal to promote safety and public health. This program includes life safety assessments and facility and vehicle safety and security measures. This program also includes projects funded with competitive U. S. Department of Homeland Security grant funds. The Authority is part of the Philadelphia Area Regional Transit Security Working Group (PARTSWG), which is working to advance safety and security improvements for all transit operations into and out of Philadelphia and the surrounding area.

Currently programmed projects include:

- Jenkintown Flood Mitigation - \$19.98M (FY 2022 – FY 2023)
- Railroad Signal Power Reinforcement - \$43.23 M (Prior Years – FY 2024 Construction)
- Sharon Hill Flood Mitigation - \$15.37M (Prior Years - FY2023)
- Escalator/Elevator Improvement Program - \$74.70M (Ongoing)
- Fern Rock Transportation Center Safety Improvements - \$20.52M (Prior Years - FY 2022 Design) (Prior Years – FY 2024 Construction)
- Grade Crossing Enhancement Program - \$22.17M (Ongoing)
- Safety & Security Infrastructure Hardening Program - \$50.44M (Ongoing)
- Safety & Security Shop, Yard, & Office Hardening Program - \$42.44M (Ongoing)
- Safety & Security Technology Upgrades - \$30M (Ongoing)
- Suburban Station Ventilation Improvements- \$12.82M (FY 2022 – FY 2024 Construction)
- Tank Replacement Program - \$24.5M (Ongoing)
- NRG Station Ventilation Improvements - \$10M (FY 2032 – FY 2034)
- On-Site Power for Major Facilities - \$6.00M (FY2028 - FY2034)

### SEPTA

MPMS# 115472 *Projects of Significance*

**LIMITS:**

No Let Date

**IMPROVEMENT** Transit Improvements

**NHPP:**

**MUNICIPALITIES:**

**FC:**

AQ Code:2035M

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:**

**CMP:** Not SOV Capacity Adding

SEPTA and its regional partners continue to advance key Projects of Significance to build towards a shared lifestyle transit network vision for Southeastern Pennsylvania. These projects are instrumental to ensuring SEPTA is able to achieve the goals set forth in our strategic plan, SEPTA Forward. SEPTA's Bus Revolution, Trolley Modernization, King of Prussia Rail and railcar replacement projects are all critical links to ensuring SEPTA achieves its goal for a more resilient, prosperous and equitable region for everyone, with transit at the core.

Bus Revolution includes the following projects:

- Bus Network Enhancements Project - \$105M (FY 2022 – FY 2034 Property Acquisition, Design and Construction)
- South Philadelphia Transportation Center - \$12.25M (FY 2022 – FY 2026 Property Acquisition, Design and Construction)
- Wissahickon Transportation Center - \$37.64M (Prior Years – FY 2025 Construction)

King of Prussia Rail- 30% Non-CIG Share Funding Commitment - \$390M (FY 2021 – FY 2029 Design and Construction).

SEPTA's King of Prussia Rail Project (KOP Rail) will extend the existing Norristown High Speed Line (NHSL) 4 miles into King of Prussia. The project includes five ADA accessible stations and will provide a "one-seat" ride from any station along the NHSL, including the 69th Street Transportation Center in Upper Darby and the Norristown Transportation Center in Norristown.

The KOP Rail Project is currently proceeding towards 30 percent design. In October 2021, the Federal Transit Administration (FTA) officially approved entry of the project into the Project Development stage of its Capital Investment Grant (CIG) program. Project Development activities will add more design and engineering detail to KOP Rail and the five stations and supporting documentation, including a draft financial plan and evaluation of project delivery methods. The total project is currently estimated at \$2.08 billion dollars.

The Market-Frankford Line Vehicle Replacement - \$720M (FY 2021 – FY 2022 MFL Vehicle Design) (FY 2023 – FY 2029 Rail Vehicle Replacement)

This project will purchase modern trainsets to replace the aging Market-Frankford Line M-4 Railcars. Included within the budget of this project is vehicle specification development as well as signal system and other infrastructure improvements needed to enhance operational efficiency of the new railcars.

Regional Rail Cars Silverliner IV Replacement - \$250M (FY 2028 – FY 2034)

This project is for pursuing future procurement of regional rail cars to replace the Authority's aging Silverliner IV railcar fleet. The Silverliner IV railcar fleet was built between 1974 and 1976. This initial investment in the replacement of the aging fleet will ensure that service on Regional Rail continues to be safe and reliable.

Trolley Modernization \$1.15B (FY 2021 – FY 2025 Design and Initial Enhancements) (FY 2022 – FY 2032 Trolley Acquisition) (FY 2023 – FY 2029 Construction).

These capital funds allow SEPTA to advance early action trolley infrastructure design and construction for the Trolley Modernization program. The new ADA accessible vehicles will require a complex and closely interrelated series of infrastructure upgrades in areas such as communications, signals, power, ADA stations, bridge improvements and maintenance facilities.

The goals of the Trolley Modernization program are:

- Accessible Trolleys that are fast and easy to use
- A system in full compliance with the Americans with Disabilities Act including vehicles and stations
- Providing quick, reliable and higher capacity service
- A safe and improved customer experience
- This program advances equity by improving trolley access and service that disproportionately serves people of color, low-income populations, and individuals with disabilities.

Specific activities to be addressed include the following:

- Property acquisition for the new accessible vehicle Facility/Facilities
- ADA Accessibility and State of Good Repair Improvements to 19th and 37th Street Trolley Stations
- Bridge enhancements to support the new vehicles
- Trolley Tunnel State of Good Repair Program, including the overhaul of the 40th Street Substation
- Develop modern station design standards and identify locations with public input and community engagement
- Study and advancement of end-of-line improvements
- Coordination with utilities and the City of Philadelphia
- Preliminary engineering and program management for overall project
- ADA Accessible vehicle acquisition.

# DVRPC FY2023-2026 TIP for PA

## Pennsylvania - Transit Program (Status: TIP)

### SEPTA

69th Street Transportation Center Comprehensive Plan Implementation - \$4M (FY 2022 - FY 2024 Design and Early Actions)  
 Development of a comprehensive master plan and undertake early actions to rehabilitate and improve service at the 69th Street Transportation Center. These infrastructure and intermodal connectivity improvements are critical to the success of Trolley Modernization, King of Prussia (KOP) Rail, and Bus Revolution.

Interstate Management Program for the  
Draft FY2023 STIP for the DVRPC  
Pennsylvania Subregion

---

This Page Intentionally Left Blank

## I-95 Reconstruction Project Roadmap

The I-95 Corridor is home to many regional destinations. These destinations include employment centers like Center City Philadelphia, major transportation/port facilities like the Philadelphia International Airport and several port terminals, and sports, recreational, and entertainment venues. The corridor also provides access to portions of New Jersey and Delaware via connections with other Interstates and state routes. This corridor is a limited access facility built in the 1960s, with major sections still under construction in the 1970s and the Girard Point Bridge not opening until the middle of the 1980s.

More than \$2.7 billion has been programmed for PennDOT's long-term, multiphase initiative to rebuild and improve approximately eight miles of I-95 between Interstate 676 and Cottman Avenue north of Center City Philadelphia in Pennsylvania, also known as Sector A. Over the next decade, PennDOT will continue to focus on reconstructing this eight-mile stretch of Interstate 95. The five sections that comprise what is known as "Sector A" (GIR, CPR, BSR, BRI, and AFC) are broken out into more than 40 individual subprojects with separate MPMS#,s, most of which appear in the IMP, and some of which appear in the Regional Highway Program of the DVRPC TIP. As of the publication of the FY2023 TIP, the following sections are currently under construction: the Cottman/Princeton Interchange (CPR), the Betsy Ross Bridge/Aramingo Avenue Interchange (BRI), the Bridge Street Interchange (BSR), from the Frankford Creek, south of the Betsy Ross Interchange, to Allegheny Avenue (AFC), and the Girard Avenue Interchange (GIR). Table 70: on the next page, shows a breakdown of the individual projects and programming amounts in the FY2023 STIP.

PennDOT has a number of projects that are smaller in scope, but significant nonetheless, presently in design or under construction on I-95 in Philadelphia, Bucks County, and Delaware County (Sectors B, C, and D), as well as some that are "off-line", e.g., not on the I-95 mainline, that provide benefit, or are required for I-95 roadway construction improvements in the corridor. There is more work still yet to be added to the region's TIP that will methodically rebuild the entire Interstate over time. As engineers and contractors redesign and rebuild I-95 and its interchanges, planners and community groups are exploring ideas for creative, green, and sustainable ground-level enhancements for those living and working in the neighborhoods along the corridor so that appropriate pedestrian, bicycle, and transit facilities along the corridor may also be expanded, depending on the particular construction section. For example, a major enhancement along the corridor will cap I-95 and Columbus Boulevard near Penn's Landing and will reconnect Center City with the Delaware River Waterfront.

The I-95 corridor in Pennsylvania is a complex network of bridge structures and roadway. Of the approximately 40.7 miles of I-95 in Pennsylvania, 29 percent is located on bridge structures, with the remaining being at-grade roadway. Both assets are quickly deteriorating and in need of major rehabilitation. Some segments are beyond the point of maintenance. Sector A projects pose particular design, construction, and traffic management challenges, given their location within densely populated Philadelphia neighborhoods and their proximity to port facilities, an active major north-south rail line, and the Delaware River waterfront.

Table 70: I-95 FY2023 STIP Funding

SECTOR A	Sections	Subsections	MPMS #	Limits (Project Title)	Amount of Funds Programmed in the FY2023 STIP for PA (\$000)

**PROJECT MANAGER:** EE/J.Arena

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4D, 8A

The SR 95, Section 322 project entails the reconfiguration of the interchange connecting two heavily traveled corridors, I-95 and US 322. The I-95 / US 322 interchange, constructed in the late 1960's, employs poor geometry that includes a left-lane on-ramp requiring a major weave across three high volume lanes of traffic. Limited sight distances, minimal acceleration and deceleration ramp lengths, and roadway segments without shoulders compound the fundamental design problems. Consequently, this area has been recognized as a Physical Highway Bottleneck under the FHWA's Significant Traffic Bottleneck Initiative. There are five existing bridges associated with the interchange: I-95 Southbound over US 322 and Ramp A; I-95 Northbound over Ramp A; Ramp N over US 322 and Ramp A; Highland Avenue over I-95 and Engle Street over I-95. The project will involve the replacement of these structures. Other structures in the project vicinity include culverts carrying waterways under I-95. The project limits along I-95 extend from just south of the US 322 interchange to the Commodore Barry Bridge Off Ramp. The US 322 bridge over CSXT, has been broken out to a separate MPMS#104343, and will be funded under the DVRPC TIP. The project limits along US 322 extend from the interchange with Bethel Road to the I-95 interchange. A point of access study will be prepared which will include an evaluation of providing two direct movements that currently are not provided at the interchange: I-95 NB to US 322 WB and US 322 EB to I-95 SB.

A point of access study will be prepared which will include an evaluation of providing two direct movements that currently are not provided at the interchange: I-95 NB to US 322 WB and US 322 EB to I-95 SB.

Alternatives for the interchange will include providing additional auxiliary lanes on I-95 between Highland Avenue and the Commodore Barry Bridge ramps at I-95. I-95 SB may include the existing three through lanes plus an additional fourth auxiliary lane between ramps. I-95 NB may include the existing three through lanes, the existing auxiliary lane and an additional auxiliary lane. Local roadway improvements are also anticipated for Township Line Road. This section of I-95 has ITS equipment and is a crucial link in PennDOT's Traffic and Incident Management System (TIMS) Program. This project will maintain and improvement upon existing ITS equipment along the I-95 corridor and approaching highways.

This project is integral to the Delaware Valley Freight Corridors Initiative.

**CMP:** Not SOV Capacity Adding

1-476 (Mid County Expressway) in Montgomery and Delaware County is a limited access highway in an urbanized setting. The project is located along I-476, between the I-95 (Delaware Expressway) and I-76 (Schuylkill Expressway), within Delaware and Montgomery Counties, in PennDOT District 6-0. It is an Urban Interstate/Freeway classified roadway located within the National Highway System. It is a divided highway, in the NB and SB directions, with two to three lanes in each direction and inside and outside shoulders of varying width. Portions of the highway are separated by concrete median barrier or grade-separated grassed median.

The project is needed because of the deterioration of the existing bituminous overlay which has reached its useful service life within the project limits. Also the current condition of roadside elements such as drainage inlets, guide rail and signs are in poor condition.

The project will include the following work: milling, concrete base repairs, shoulder repairs as needed, bituminous overlay, saw and seal the overlay, minor grade adjustments may be required for inlets, and selective inlets and drain cleaning. Also, all guide rail will be brought up to current standards and the following work will be completed: new pavement markings, the installation of Raised Pavement Markings (RPMs) delineators and rumble strips, and replacement of damaged or missing signs. One Auxiliary Lane will be lengthen as a part of the project but will remain within the existing footprint. It is anticipated that minor bridge work such as deck and barrier repair, will be necessary and determined as the design progresses.

This is an advance project on I-476 that will look to provide some traffic relief through the installation of systems and devices for variable speed limits and queue detection prior to the start of the companion project on I-476, MPMS# 104821.

This project will provide for the active management of transportation and demand by providing operational improvements on I-476 between the PA 3 and I-95 interchanges, and on I-95 between the I-476 and US 322 interchanges with a series of measures that will allow for the ability to dynamically manage recurrent congestion based on prevailing and predicted traffic conditions through the installation of systems and devices for variable speed limits and queue detection. Speeds will be dynamically changed based on road, traffic and weather conditions. Warning signs will be used to dynamically display alerts to drivers that congestion and queues are present.

### Montgomery

MPMS# 106662 I-76 Integrated Corridor Management

LIMITS: PA Turnpike to US 1

No Let Date

MUNICIPALITIES: Lower Merion Township; Upper Merion Township; West Conshohocken Borough

MRPID:132

IMPROVEMENT: Signal/ITS Improvements

FC:

AQ Code:2035M

PLAN CENTER: Metropolitan Subcenter

IPD: 21

PROJECT MANAGER: EE/M. Holva

CMP: Major SOV Capacity

Corridor(s): 1A, 2B, 3B, 3C, 8C, 9B

This project will provide for the active management of transportation and demand by providing operational improvements on I-76 and supporting arterials between the PA Turnpike and the US 1 interchanges with a series of measures that will allow for the ability to dynamically manage recurrent congestion based on prevailing and predicted traffic conditions through the following:

- Installation of systems and devices for variable speed limits and queue detection-- Speeds will be dynamically changed based on road, traffic and weather conditions. Warning signs will be used to dynamically display alerts to drivers that congestion and queues are present. The limits for this work are as follows: PA Turnpike to US 1.
- Dynamic lane assignments, shoulder, and junction control improvements-- The shoulders will be dynamically controlled along with travel lanes for opening/closing on a temporary basis in response to increasing congestion or incidents. This work includes reconstruction of shoulders up to current standard width and depth for part time shoulder use, and may necessitate increasing pavement or bridge deck width where insufficient, and lengthening of overhead bridge spans as required. Bridge and roadway drainage and storm water management will be improved as required. It is expected that part time shoulder use will be provided on I-76 in both eastbound and westbound directions from the PA Turnpike to I – 476, and on I-76 westbound from US 1 to Belmont Avenue as it relates to Junction controls for I-76 WB from City Avenue (US 1).
- Adaptive ramp metering will be used to dynamically adjust signals at the ramp entrances to proactively manage vehicle flow from access roads. The Limits are from the PA Turnpike to US 1.
- Installation of systems and devices for continuous monitoring of the transportation network, whether by video or other detectors, to aid in traffic incident management coordination and primary /secondary crash reduction, throughput increases, reducing speed differential in traffic flow and increasing trip reliability. The Limits are PA Turnpike to US 1 and it includes US 202, US 422 and US 1 and access roads.
- Installation of a responsive traffic signal system to be coordinated real time with the Regional Transportation Management Center. This should include the traffic signal system network in the proximity of I-76. Arterial signals will be coordinated with ramp metering. Transit signal priority included where applicable. Installation of communications network as required. The limits include Ridge Pike and PA 23 (Conshohocken to US1) .
- Enhanced coordination of operations with SEPTA on bus or regional rail that is parallel to the I-76 corridor including dynamic messaging on DMS to motorists of available parking / travel times of alternate mode and travel availability .

## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 17821** **I-95: Shackamaxon Street to Ann Street (GIR) - Design SR:0095**

**LIMITS:** Shackamaxon Street to Ann Street

No Let Date

**MUNICIPALITIES:** Philadelphia City

MRPID:65

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:** 11; 14; 16

AQ Code:2035M

**PLAN CENTER:** Metropolitan Center

IPD: 21

**PROJECT MANAGER:** EE/E. Elbich

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project provides for the design of I-95 construction sections GR0 (MPMS# 80094 which has been Let), GR1 (MPMS# 79686 which has been let), GR2 (MPMS# 83640 which has been let), GR3 (MPMS# 79826), GR4 (MPMS# 79827), and GR5 (MPMS# 79828). The construction projects will provide widening and reconstruction of I-95 to eliminate the lane drop (from 3 to 4) in both directions at the Girard Avenue Interchange by providing 4 continuous thru lanes in each direction (Construction Sections GR0 thru GR4). In addition, an auxiliary lane will be provided in each direction to connect the ramps between adjacent interchanges at Vine St and Allegheny Ave. The existing substandard shoulders will be replaced with full width shoulders along most of the project length. Specifically, 22 mainline bridges will be replaced, 4 Girard Ave Interchange ramp bridges will be replaced, 2 arterial road bridges will be replaced or rehabilitated and 4 Conrail bridges over relocated Richmond St will be constructed. The Girard Avenue Interchange will be reconfigured to improve access, operation and safety. Specifically, direct access will also be provided from I-95 SB to Delaware Ave. Additional direct access is being provided from Girard and Delaware Avenues to I-95 SB and from Aramingo Avenue to I-95 NB. No existing interchange movements will be eliminated. Pedestrian, bicycle and transit facilities are present along Delaware Avenue, Richmond Street, Aramingo Avenue and Girard Avenue. The pedestrian and bicycle facilities will be expanded under this project to include wider sidewalks, a shared-use trail and other pathways. Appropriate pedestrian access will be provided via signalized crossings, refuge medians, signing, hand/man signals and visible pavement markings.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental strategies for details related to this project.

This project is integral to the Delaware Valley Freight Corridors Initiative.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design: BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

CMP Subcorridor(s): 4A, 4B

This project will provide assistance to the PennDOT project manager and design review services for the I-95 Reconstruction Projects in the City of Philadelphia. These projects include, but are not limited to, the following sections: Section RVS, GIR, AFC, BRI, BSR, and CPR. The limits of the contract cover the City of Philadelphia. The selected firm will be required to provide engineering management assistance and design review services during the preliminary and final design phases. They will be required to provide sufficient staff to assist the Department in adequately maintaining project coordination and schedule for design through bidding of the construction contracts. Other tasks required include, but are not limited to: review of design submissions, hydraulic reports, type size and location submissions, final bridge plans and computations, geotechnical reports, preliminary and final right of way plans, design plans, special provisions, specification and estimates prepared by other consulting engineering firms. Conduct design review meetings and plan checks; review environmental items of work; coordinate required permit applications; standardize design details, coordinate design and right of way acquisition activities, coordinate all traffic control plans to provide optimum traffic flow, coordinate with the various agencies, public officials, interested groups, communities, and utilities by means of periodic meetings; prepare master timetables to coordinate all phases of the projects; monitor schedule to assure compliance with master schedule; evaluate all value engineering submissions and make recommendations to the District. Tasks also include public involvement, development of project newsletters, environmental permit review and tracking of mitigation strategies, preparation of materials for the project website, assist in preparing applicable inter-agency agreements, and responding to public inquiries both through written and e-mail.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. **FC:** 11

AQ Code:2035M

**PLAN CENTER:**

IPD: 21

**PROJECT MANAGER:** AECOM/P. Shultes

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is the design parent for I-95 Reconstruction SR 0095 Section BSR, also known as the Bridge Street Ramps section.

The overall section improvements of BSR consist of eliminating the lane drop at the James St. ramp in the southbound direction and eliminating the add lane (i.e. providing four lanes northbound from the BRI section up to Bridge Street) at the Bridge St. on-ramp in the northbound direction. The proposed SR 0095 will have four lanes in each direction from Margaret St. to Levick St. with exclusive acceleration/deceleration lanes. The project includes the replacement of six mainline structures. All retaining walls supporting SR 0095 will be totally reconstructed to support the new widened roadway and ramps. In addition, the project consists of 1.7 miles of reconstruction and realignment along SR 0095, as well as 0.7 miles of reconstruction along Tacony Street from Aramingo Ave. to the Delaware Ave. Extension to the east. Approximately 1.4 miles of reconstruction along Aramingo Ave. is anticipated from Wheatshaeaf La. to the south to the Amtrak bridge to the north. A portion of Aramingo Ave. will also be widened from Orthodox St. to Tacony St. along the SR 0095 side of Aramingo Ave. The Aramingo Avenue/Betsy Ross Interchange will be reconfigured to construct a portion of the Adams Ave. Connector to intersect Aramingo Ave. adjacent to the Frankford Creek Bridge. Additional ramps will be constructed between the Betsy Ross Bridge and the SR 0095/Aramingo Ave. Interchange to accommodate all traffic movements from the Betsy Ross Bridge and from SR 0095 (MPMS 79903 - SR0095, Sec BR0). These new ramps will serve to accommodate the increased traffic volumes from the removal of two ramps at the Bridge St. Interchange. One of the ramps to be removed is an off-ramp from SR 0095 NB to Aramingo Ave. NB. The other ramp to be removed is an on-ramp from Aramingo Ave. SB to SR 0095 SB.

As part of this project, Delaware Ave. will be extended approximately 1.3 miles from Buckius Street to Tacony St. This will include a new bridge over Old Frankford Creek. The project also consists of removing the SR 0095 SB off-ramp at the Bridge St. Interchange (at James Street), and the removal of the Bridge St. on-ramp to SR 0095 NB. These ramps are being moved further north to the intersection of Tacony St. and the Delaware Ave. Extension. A SR 0095 SB off-ramp will provide direct access to Tacony St. and the Delaware Ave. Extension. A new on-ramp from Tacony St. and the Delaware Ave. Extension will provide access to SR 0095 NB.

The BSR section also includes the construction of the Frankford Creek Greenway along Aramingo Ave. from Wheatshaeaf La. To the Adams Ave. Connector, and then along the Adams Ave. Connector to the adjoining MPMS #17782 project. A multi-use trail will extend further along Aramingo Ave. from the Adams Ave. Connector to the existing bicycle lanes on Orthodox St. and Margaret St. The East Coast Greenway will also be constructed along the North Delaware Ave. Extension to connect with the K&T Trail. The project will incorporate new traffic signals at 12 intersections and modifications to traffic signals at 5 intersections.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. Related sections of I-95 Reconstruction: MPMS #'s 47811, 79908, 79910, 87784, 103562, 103563 and 103564.

## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 47812** I-95: Betsy Ross Interchange (BRI) - Design (IMP) SR:0095

**LIMITS:** Wheatshaeaf Lane to Orthodox Street

No Let Date

**MUNICIPALITIES:** Philadelphia City

MRPID:65

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:** 11

AQ Code:2035M

**PLAN CENTER:**

IPD: 20

**PROJECT MANAGER:** AECOM/P. Shultes

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is the design parent of I-95 Reconstruction SR 0095 Section BRI, also known as the Betsy Ross Interchange.

The overall section consists of reconstructing 1.1 miles of the SR 0095 mainline roadway starting from the north side of the Wheatshaeaf Lane crossing, adjoining Section AFC, and ending at Orthodox Street, adjoining Section BSR. The lane drops (from 4 to 3) on SR 0095 northbound and southbound will be eliminated from the Betsy Ross Interchange. Within Section BRI, the multi-lane NB and SB collector-distributor roads, the Ramp X SB on ramp and Ramp Y NB off ramp will be demolished and removed. The proposed SR 0095 mainline will have four lanes in each direction from Wheatshaeaf Lane to the Orthodox Street/Pearce Street crossing. On the SR 0095 mainline, the project includes reconstruction of three dual structures (the dual structures over Frankford Creek; the dual viaduct structures over the Earth Fill area from the Betsy Ross Interchange to south of Orthodox Street crossing; and the dual structures over Orthodox and Pearce Streets). Section BRI includes the rehabilitation or replacement of the Conrail Shared Assets railroad bridges crossing SR 0095 and Ramps A and C.

In addition, the Aramingo Avenue/Betsy Ross Interchange will be reconfigured to realign the planned Adams Avenue Connector to intersect Aramingo Avenue adjacent to the Frankford Creek Bridge and to accommodate increased traffic volumes from the removal of the Bridge Street Interchange. In the Betsy Ross Interchange area, Section BRI also includes reconstruction of nine connecting bridge structure ramps (Ramp A from SR 0095 NB to Betsy Ross Bridge; Ramp B from Betsy Ross Bridge to SR 0095 SB; Ramp C from SR 0095 NB to Aramingo Avenue; Ramp D from Adams Avenue Connector to SR 0095 SB; Ramp EE from SR 0095 SB to Betsy Ross Bridge; Ramp F from SR 0095 SB to Aramingo Avenue; Ramp G from Aramingo Avenue to NB; Ramp H from Betsy Ross Bridge to NB; Ramp GH from Aramingo Avenue and Betsy Ross Bridge to NB; . Also, the missing connection from the Betsy Ross Bridge to Aramingo Avenue/Adams Avenue Connector will be built (Ramp I), and the missing connection from Aramingo Avenue/Adams Avenue Connector to the Betsy Ross Bridge will be built (Ramp JJ).

This project is funded by a portion of a \$51,254,972 TEA-21 Earmark (PA ID# 228/FED ID# 1847)

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). ## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 47813** **I-95: Ann Street to Wearsheaf Lane (AFC) SR:0095**

**LIMITS:** Ann St. to Wearsheaf Lane

No Let Date

**MUNICIPALITIES:** Philadelphia City

MRPID:65

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:** 11

AQ Code:2035M

**PLAN CENTER:**

IPD: 20

**PROJECT MANAGER:** CH2MHill/P. Conti

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is the AFC Design Parent.

This project is the design parent of I-95 Reconstruction SR 0095 Section AFC, also known as the Ann to Frankford Creek section. The overall section improvements consist of replacing 12 bridges and 0.8 miles of roadway. The limits of this project extend along I-95 from the bridge over Ann Street. to the bridge over Wearsheaf Lane for a length of approximately 1.3 miles. I-95, Section AFC will involve consolidating existing disjointed interchanges at Allegheny Avenue, Westmoreland Street, and Castor Avenue which will be reconfigured into two half interchanges: half-diamond interchange at Allegheny Avenue for Southbound I-95 and a partial clover interchange at Castor Avenue for Northbound I-95.

The existing off-ramp at Westmoreland Street will be removed, leaving a half-diamond interchange at Allegheny Avenue for I-95 Southbound. A new northbound on-ramp will be added Castor Avenue to create a partial-clover interchange at Castor Avenue for I-95 Northbound. The existing loop-ramp will be split to provide both access to I-95 Northbound and the Betsy Ross Bridge which will provide direct access to the Betsy Ross Bridge from NB I-95

Existing I-95 has 4 lanes northbound and 4 lanes southbound. The proposed I-95 will have an auxiliary lane Southbound, between the Betsy Ross on-ramp and the off-ramp at Allegheny Avenue, and an auxiliary lane Northbound between the Girard Interchange and the off-ramp to the Betsy Ross bridge.

Complete reconstruction and widening of the existing pavement. Reconstruction or replacement of all existing bridges. Extend viaduct over playground from Westmoreland Street to Allegheny Avenue. Rehabilitate existing structure from Westmoreland Street to Tioga Street.

The four existing ramps (two at Allegheny, one at Westmoreland, and one at Castor) are all single lane ramps. The two ramps at Allegheny, and the two ramps at Castor will be single lane ramps, except at the termini of the off-ramps where they will be widened to two lanes at signalized intersections.

PennDOT will utilize four construction contracts to rebuild and improve the 1.3 miles this portion of I-95: AF1(79911), AF2(79912), AF3(103557) and AF4(103558).

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance. Related sections of I-95 Reconstruction: MPMS #'s 47813, 79911, and 79912.

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:** 11; 14

AQ Code:2025M

**PLAN CENTER:**

IPD: 21

**PROJECT MANAGER:** CONSTR

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP). This construction contract will include reconstruction and widening of I-95 southbound to include 4 thru lanes plus a fifth auxiliary lane (12'-0" lane widths) from Columbia Avenue to north of Ann Street in multiple stages. The existing standard shoulder widths (varies up to 10'-0") will be replaced with full width shoulders (varies up to 12'-0"). This contract will include reconstruction of the southbound Girard Avenue Interchange ramps (Ramps B, B Spur and D). This phase will include demolition and replacement of numerous bridge structures, including I-95 SB over Girard Avenue to Ann Street; I-95 SB over Aramingo Avenue to south of Girard Avenue; I-95 SB over Berks Street; I-95 SB over Montgomery Avenue; I-95 SB over Palmer Street; I-95 SB off-ramp (Ramp B); I-95 SB off-ramp to Aramingo Avenue SB and Delaware Avenue (Ramp B Spur); I-95 SB on-ramp (Ramp D); and Aramingo Avenue SB over Ramp B, Girard Avenue and Spur A. Also included will be completion of the surface street tie-ins with the southbound ramp terminals and the construction of associated retaining walls and sound barrier walls. Aramingo Ave. will be reconstructed between Delaware Ave. and Cumberland St. Additionally, a shared-use path will be constructed under the viaduct between Girard Avenue Interchange and Lehigh Avenue with connections to bike lanes on Richmond Street, Aramingo Avenue, and Lehigh Avenue. A shared-use path will be constructed along Aramingo Avenue from Delaware Avenue to York Street. A majority of the utility impacts will be limited to areas of work along the surface street crossing under I-95. This project is being coordinated with the I-95 Section CPR and Section AFC projects from a construction letting and geographical location standpoint.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. **PROJECT MANAGER:** EE/E. Elbich

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section GIR (MPMS #17821). This project provides for the reconstruction, rehabilitation, and widening of I-95 northbound between Race Street and Shackamaxon Street, and the reconstruction of the northern Vine Street interchange ramp connection with I-95. This project includes rehabilitation, deck replacement, demolition, and replacement of eight bridges.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridor Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. A final alternative for bridge rehabilitation or replacement is determined upon federal national Environmental Policy Act (NEPA) or state Categorical Exclusion clearance. Related sections of I-95 Reconstruction: MPMS #'s 17821, 80094, 79685, 83640, 79826, 79828, 102305.

## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 79904**      **I-95: Betsy Ross Section Ramps A&B (BR2)**

**LIMITS:** Wheatshaf Lane to Orthodox St. Crossing

No Let Date

**MUNICIPALITIES:** Philadelphia City

MRPID:65

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:** 11

AQ Code:R1

**PLAN CENTER:**

IPD: 20

**PROJECT MANAGER:** Harold Windisch ADE CONSTR

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section BRI (MPMS #47812).

The BR2 section is a part of the I-95 Reconstruction, I-95 Section BRI, also known as the Betsy Ross Interchange. Section BR2 project includes construction for the replacements of both Ramp A and Ramp B structures in the Betsy Ross Interchange including approach roadway work in the City of Philadelphia. See MPMS #47812 for an overall description of the SR 95 Section BRI section.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. Related sections of I-95 Reconstruction: MPMS #'s 47812, 79903, 79904, 79905, 103559, 103560 and 103561.

## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 79905** **I-95: Betsy Ross Mainline Northbound (BR3)**

**LIMITS:** Wheatshaeaf Lane to I-95 north of Margaret St.

No Let Date

**MUNICIPALITIES:** Philadelphia City

MRPID:65

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:** 11

AQ Code:2035M

**PLAN CENTER:**

IPD: 20

**PROJECT MANAGER:** AECOM/P. Shultes

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section BRI (MPMS #47812).

Project includes the northbound mainline construction from Wheatshaeaf Lane to SR 0095 north of Margaret St. This contract will also remove the northbound collector/distributor and ramp which connects I-95 northbound and the Betsy Ross Bridge to the local street system (Aramingo Avenue, Harbison Avenue, Tacony Street and Bridge Street). This traffic will be redirected to the ramps completed in the I-95 BR0 (MPMS #79903) project. This includes the demolition and/or replacement of numerous structures including new bridges for I-95 northbound over Frankford Creek, Orthodox Street and Margaret Street. Pearce Street will be relocated out from underneath I-95. As a result of the collector/distributor ramp removal, a new ramp will be constructed to connect the Betsy Ross Bridge to I-95 NB (Ramp GH). Ramp G and Ramp H structures will also be replaced. A significant portion of the northbound mainline that currently is supported on structure will be removed and replaced with a geotechnically supported pavement using compensating fill and/or column supported embankment. This will eliminate approximately 176,500 SF of SD bridge deck. The existing noise wall in this section will be replaced. Local street landscaping and lighting will be incorporated in consultation with the Bridesburg community. PWD facility upgrades are anticipated to carry a portion of the mainline drainage to the Frankford Creek Outfall near Bridge Street. See MPMS #47812 for an overall description of the SR 95 Section BRI section.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section BSR (MPMS #47811).

The BS1 section is a part of the I-95 Reconstruction, SR 0095 Section BSR, also known as the Bridge Street Ramps section. This phase of SR 95 Section BSR covers the I-95 reconstruction from Carver Street to Levick Street, including work to:

- Reconstruct northbound and southbound I-95 (four lanes in each direction) from Carver Street to Levick Street;
- Replace the bridges that carry I-95 over Comly Street, and Van Kirk Street; and
- Modify the traffic signals at Tacony Street and Van Kirk Street, Tacony Street and Comly Street, and Tacony Street and Newman Co. driveway.

-This project will add interconnection to the traffic signals on Tacony Street from Fraley Street to Barnett Street and on New State Street from Elbridge Street to Milnor Street.

For an overall description of the SR 95 Section BSR section, see MPMS #47811.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. **IMPROVEMENT:** Intersection/Interchange Improvements

**FC:** 11

AQ Code:2035M

**PLAN CENTER:**

IPD: 21

**PROJECT MANAGER:** AECOM/P. Shultes

**CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout from Section BSR (MPMS #47811).

This phase of I-95 Section BSR covers the I-95 reconstruction from just north of Margaret Street to Carver Street, and the removal of the northbound I-95 on-ramp at Bridge Street and the removal of the southbound I-95 off-ramp at James Street which will be relocated to the new intersection of Tacony Street and Delaware Avenue in the City of Philadelphia. This project includes work to: (1) reconstruct northbound and southbound I-95 (four lanes in each direction) from just north of Margaret Street to Carver Street. The viaduct that carries I-95 over Tacony Street and Bridge Street will be replaced; (2) removal of the Bridge Street northbound on-ramp and the James Street southbound off-ramp; (3) reconstruct Tacony Street from Aramingo Avenue to Levick Street; (4) modify the traffic signals at Bridge and Tacony Streets, Bridge and James Streets, Tacony and Fraley Streets, and construct a new traffic signal at Tacony Street and Delaware Avenue; reconstruct Bridge Street to reduce the street width and add pedestrian and bicyclist safety features, and construct stormwater outfall(s) to Old Frankford Creek. For an overall description of SR 95 Section BSR section see MPMS #47811.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. **CMP:** Major SOV Capacity

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of AFC (MPMS #47813).

Project includes the local road improvements in support of I-95 AF3 and AF4 (main line I-95). The project will optimize signal timings on the local roadway network including Aramingo Avenue, Allegheny Avenue, and Castor Avenue; pavement rehabilitation and reconstruction on Delaware Avenue between Castor Avenue and Allegheny Avenue; the additional of auxiliary lanes at the intersections of Aramingo and Ontario and Aramingo and Venango; new traffic signals at the intersections of Allegheny/Bath, Castor Avenue/I-95 ramp. New signals are not interconnected. The project will also include improvements to the Philadelphia Water Department Outfalls from I-95 to the Delaware River to accommodate stormwater management for the reconstruction of I-95. New signing, pavement markings, and lighting will be constructed on Allegheny Avenue, Delaware Avenue, and Castor Avenue which will serve as the connection between the split interchanges (NB interchange at Castor Avenue, SB interchange at Allegheny). Sidewalks, where appropriate, will be included on Allegheny, Delaware and Castor Avenue. A multi-use path is proposed on the north side of Castor Avenue that will extend from Richmond Street to Delaware Avenue is proposed as a connection to the east Coast Greenway trail that currently exists along Delaware and Allegheny Avenues.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design: BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project.

## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 80014** **I-95: Cottman On-Ramp (C)**

**LIMITS:** Cottman-Princeton Utility, Philadelphia

No Let Date

**MUNICIPALITIES:** Philadelphia City

MRPID:65

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:**

AQ Code:S10

**PLAN CENTER:**

IPD: 21

**PROJECT MANAGER:** Harold Windisch ADE CONSTR

**CMP:** Not SOV Capacity Adding

**CMP Subcorridor(s):** 4B, 5G, 5H

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section CPR (MPMS #47394). This project will construct Ramp F, the southbound I-95 on-ramp from Cottman Avenue.

Utility relocation consists of relocating Philadelphia Water Dept sewer (114"-) main in Wissinoming Street (between Princeton and Bleigh Avenues). Associated roadway work includes pavement reconstruction on: Wissinoming Street, Milnor Street (between New State Rd and Bleigh Avenue) and Bleigh Avenue (between Milnor Street and State Rd). Left turn lanes will be added to SR 73 (New State Road) at Magee Avenue. Additional traffic, bicycle and pedestrian operational improvements will be made on surface streets that are part of the Cottman/Princeton interchange. Additional construction includes 1 retaining wall and traffic signal construction and/or timing modifications at up to 4 locations.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. Related sections of I-95 Reconstruction: MPMS #'s 47394, 79683 and 79685.

**MUNICIPALITIES:** Philadelphia City

**IMPROVEMENT:** Intersection/Interchange Improvements

**FC:**

AQ Code:NRS

**PLAN CENTER:**

IPD: 26

**PROJECT MANAGER:** EE/E. Elbich

**CMP:** Not SOV Capacity Adding

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and will provide for Congestion Management Activities related to the reconstruction of I-95 through Bucks, Delaware, and Philadelphia counties. This is to further the ongoing congestion mitigation as the construction activity increases on the corridor. Ongoing mainline work in section BS1 will be followed by upcoming work in sections BS2, GR6, BR3, and AF3, all expected to start in the next five years. Traffic impacts to the mainline are expected throughout the duration of each of those projects. Prior to the COVID-19 pandemic, investment focused on enhancing the capacity of the SEPTA regional rail lines parallel and closest to the I-95 corridor. Improvements included purchase of additional rolling stock and improvements to provide additional parking at regional rail stations. With the decline in regional rail ridership that resulted from the pandemic and public health measures to control it, enhancements to modernize and offer improved customer experience at regional rail stations are vital to entice commuters back to transit services. Continued investments in transit facilities support the broader congestion mitigation strategy for the corridor, including efforts to provide real-time transit and vehicular travel time information on I-95.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section GIR (MPMS #17821). The project provides for the reconstruction, rehabilitation and widening of I-95 southbound between Race Street and Shackamaxon Street and the reconstruction of a portion of the Vine Street interchange ramp connection with I-95. Included in the project are structure rehabilitation, deck replacement, demolition and replacement of nine bridges.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridor Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. A final alternative for bridge rehabilitation or replacement is determined upon federal national Environmental Policy Act (NEPA) or state Categorical Exclusion clearance. Traffic signal interconnection and implementation of ITS devices along the US-1/Roosevelt Boulevard from 9th Street to Woodhaven Road in Philadelphia. ITS devices are used to control the flow of traffic and may include but are not limited to tag readers, CCTV cameras, dynamic/variable message signs (DMS/VMS), and variable speed limit system, which will be installed along the US-1/Roosevelt Boulevard and the roadway section that leads to the I-95 Corridor. Gaps in fiber connectivity will be addressed as necessary.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. CMP Subcorridor(s): 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of AFC (MPMS #47813).

Project will reconstruct I-95 from Clearfield Street to W heatsheaf Lane, including reconstruction of the NB off-ramp to the Betsy Ross Bridge over Castor Avenue, reconstruction of the NB on-ramp from Castor Avenue, removal of the NB off-ramp at Westmoreland Street, and construction of a new NB off-ramp at Castor Avenue. I-95 traffic will be maintained on 3 lanes NB and 3 lanes SB during peak hours.

This project includes work on the following bridge structures:

\*Westmoreland Viaduct (I-95 NB from Allegheny Avenue to Tioga Street) - Extend viaduct over playground from Westmoreland Street to Allegheny Avenue. Widen and Reconstruct existing NB Structure from Westmoreland Street to Tioga Street.

\*I-95 NB over Venango Street - Total Replacement

\*I-95 NB over Castor Avenue - Total Replacement

\*I-95 NB over Richmond Street - Total Replacement

\*I-95 NB over W heatsheaf Lane - Total Replacement

\*Betsy Ross Ramp A Viaduct (NB) - Total Replacement

Also included is construction of associated retaining walls, sound barrier walls, and roadway on fill sections. The proposed I-95 will have 5 lanes northbound (4 through lanes and a collector-distributor lane) and 5 lanes southbound (4 through lanes and a collector-distributor lane). New ramp movements are not being created, but are being relocated. The existing disjointed interchange will be reconfigured into split interchanges (a NB interchange at Castor Avenue, and a SB interchange at Allegheny Avenue).

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative.

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of AFC (MPMS #47813).

Project will reconstruct I-95 from Clearfield Street to W heatsheaf Lane, including reconstruction of the SB on-ramp and SB off-ramp at Allegheny Avenue. I-95 traffic will be maintained on 3 lanes NB and 3 lanes SB during peak hours.

This project includes work on the following bridge structures:

\*Westmoreland Viaduct (I-95 SB from Allegheny Avenue to Tioga Street) - Extend viaduct over playground from Westmoreland Street to Allegheny Avenue. Replace the existing SB Structure from Westmoreland Street to Tioga Street.

\*I-95 SB over Venango Street - Total Replacement

\*I-95 SB over Castor Avenue - Total Replacement

\*I-95 SB over Richmond Street - Total Replacement

\*I-95 SB over W heatsheaf Lane - Total Replacement

\*Ramp E over playground - New Bridge

Also included is construction of associated retaining walls, sound barrier walls, and roadway on fill sections. The proposed I-95 will have 5 lanes northbound (4 through lanes and a collector-distributor lane) and 5 lanes southbound (4 through lanes and a collector-distributor lane). New ramp movements are not being created, but are being relocated. The existing disjointed interchange will be reconfigured into split interchanges (a NB interchange at Castor Avenue, and a SB interchange at Allegheny Avenue).

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. ### Philadelphia

**MPMS# 103559** *I-95: Betsy Ross Mainline Southbound (BR4)*

**LIMITS:** No Let Date  
**MUNICIPALITIES:** Philadelphia City MRPID:65  
**IMPROVEMENT:** Intersection/Interchange Improvements **FC:** AQ Code:2035M  
**PLAN CENTER:** IPD: 21  
**PROJECT MANAGER:** AECOM/P. Shultes **CMP:** Major SOV Capacity **CMP Subcorridor(s):** 4B

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section BRI (MPMS #47812).

Project includes the southbound mainline construction from Wheatsheaf Lane to SR 0095 north of Margaret St. This contract will also remove the southbound collector/distributor and ramp which connects Aramingo Avenue, Harbison Avenue, Tacony Street and Bridge Street to I-95 southbound and the Betsy Ross Bridge. This traffic will be redirected to the ramps completed in the I-95 BR0 (MPMS #79903) project. This includes the demolition and/or replacement of numerous structures including new bridges for I-95 southbound over Frankford Creek, Orthodox Street and Margaret Street. A significant portion of the southbound mainline that currently is supported on structure will be removed and replaced with a geotechnically supported pavement using compensating fill and/or column supported embankment. This will eliminate approximately 176,500 SF of SD bridge deck. The existing Conrail rail siding that services the AdvanSix Chemical plant will be relocated. Local street landscaping and lighting will be incorporated in consultation with the Bridesburg community. PWD facility upgrades are anticipated to carry a portion of the mainline drainage to the Frankford Creek Outfall near Bridge Street. See MPMS #47812 for an overall description of the SR 95 Section BRI section.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project. A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance. This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of Section BRI (MPMS #47812).

The BR5 section is a part of the I-95 Reconstruction, SR 0095 Section BRI, also known as the Betsy Ross Interchange. The Section BR5 project includes construction for the replacement, removal, or rehabilitation of the Conrail bridges over I-95, Thompson Street, and Ramps A & C, as well as associated track, signal and communication work required.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. ## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 107709** *I-95 Bridge Repairs (95/MB4)*

**LIMITS:** I-95 Corridor

No Let Date

**MUNICIPALITIES:** Philadelphia City

**IMPROVEMENT:** Bridge Repair/Replacement

**FC:**

AQ Code:S19

**PLAN CENTER:**

IPD: 23

**PROJECT MANAGER:** HNTB/N.Velaga

**CMP:** Not SOV Capacity Adding

The I-95 Section MB4 project includes the repair of 12 structures along the I-95 corridor including 2 structures in Bucks County, 2 in Delaware County and 8 in Philadelphia. Typical repairs include replacement/repair of leaking deck joints, rehabilitation of bearings, repair of structure drainage features, replace under bridge lighting, substructure concrete repair, beam end repairs and deck overlay to extend the life of these structures by a minimum of 15 years. Additionally, this project includes repair or replacement of high mast lighting poles on I-95 located near the Philadelphia Airport. 10 of the 12 structures will require additional repairs such as substructure concrete and beam repairs, replacements of leaking deck expansion joints and frozen sliding plate bearing.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

## Pennsylvania - Interstate Management Program

### Philadelphia

MPMS# 114876 *Studies Line Item*

LIMITS: City of Philadelphia

No Let Date

MUNICIPALITIES: Philadelphia City

IMPROVEMENT: Other

FC:

AQ Code:X1

PLAN CENTER:

IPD:

PROJECT MANAGER: Chuck Davies ADE Design

CMP: Not Yet Determined

This Line Item sets aside funding to address the following studies that will be addressed:

**113762 Broad Street Interchange**

This work is the planning and project development activities for the given limits on the I-95 mainline at the Interchange (SR 8001) with Broad Street (SR 0611) from the northern approach to the Girard Point Bridge to Lawrence Street in the City of Philadelphia that will have been identified as integral to the reconstruction of the I-95 mainline in the (MPMS 104243) I-95 Conceptual Study. That study has established limits of design and construction sections, determined a sequence of delivery based on site and asset conditions as well as related issues on a corridor level. This project will be more specific and detailed analysis and project development of a preferred alternative of what will ultimately lead to preliminary engineering and environmental clearance.

**113763 Walt Whitman Bridge Interchange**

This work is the planning and project development activities for the given limits on the I-95 mainline from Lawrence Street to Snyder Avenue at the Walt Whitman Interchange (SR 8003) with I-76 in the City of Philadelphia that will have been identified as integral to the reconstruction of the I-95 mainline in the (MPMS 104243) I-95 Conceptual Study. That study has established limits of design and construction sections, determined a sequence of delivery based on site and asset conditions as well as related issues on a corridor level. This project will be more specific and detailed analysis and project development of a preferred alternative of what will ultimately lead to preliminary engineering and environmental clearance.

**113764 Penn's Landing Interchange**

This work is the planning and project development activities for the given limits on the I-95 mainline from Snyder Avenue to Spring Garden Street at the Penn's Landing Interchange (SR 8007) with Christopher Columbus Boulevard (SR 2001) in the City of Philadelphia that will have been identified as integral to the reconstruction of the I-95 mainline in the (MPMS 104243) I-95 Conceptual Study. That study has established limits of design and construction sections, determined a sequence of delivery based on site and asset conditions as well as related issues on a corridor level. This project will be more specific and detailed analysis and project development of a preferred alternative of what will ultimately lead to preliminary engineering and environmental clearance.

**113765 Christopher Columbus Boulevard Offline**

This work is the planning and project development activities for the given limits on Christopher Columbus Boulevard (SR 2001) from Spring Garden Street to Oregon Avenue and selected local connecting streets in the City of Philadelphia that will have been identified as integral to the reconstruction of the I-95 mainline in the (MPMS 104243) I-95 Conceptual Study. That study has established limits of design and construction sections, determined a sequence of delivery based on site and asset conditions as well as related issues on a corridor level. This project will be more specific and detailed analysis and project development of a preferred alternative of what will ultimately lead to preliminary engineering and environmental clearance.

## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 115687** *I-95: Allegheny & Castor Ave Int.*

**LIMITS:** Philadelphia County

No Let Date

**MUNICIPALITIES:** Philadelphia City

**IMPROVEMENT:** Other

**FC:**

AQ Code:2025M

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** CH2MHill/P. Conti

**CMP:** Major SOV Capacity

This project is for the ROW acquisition and separation out from the parent project (MPMS #79912) of four (4) commercial parcels. The separation of the commercial properties was done so that the ROW clearance for MPMS #79912 could be given and the project could be advertised. The project was then on hold until the commercial parcels are fully acquired before issuing ROW clearance for MPMS #115687.

This project is a component of the Statewide Interstate Management Program (IMP) and is a construction breakout of AFC (MPMS #47813).

The project includes the local road improvements in support of I-95 AF3 and AF4 (main line I-95). The project will optimize signal timings on the local roadway network including Aramingo Avenue, Allegheny Avenue, and Castor Avenue; pavement rehabilitation and reconstruction on Delaware Avenue between Castor Avenue and Allegheny Avenue; the additional of auxiliary lanes at the intersections of Aramingo and Ontario and Aramingo and Venango; new traffic signals at the intersections of Allegheny/Bath, Castor Avenue/I-95 ramp. New signals are not interconnected. The project will also include improvements to the Philadelphia Water Department Outfalls from I-95 to the Delaware River to accommodate stormwater management for the reconstruction of I-95. New signing, pavement markings, and lighting will be constructed on Allegheny Avenue, Delaware Avenue, and Castor Avenue which will serve as the connection between the split interchanges (NB interchange at Castor Avenue, SB interchange at Allegheny). Sidewalks will be included on Allegheny, Delaware and Castor and Bicycle Facilities will be improved along Castor Avenue.

An investment of more than \$2.7 billion will provide for the repair, reconstruction and restoration of I-95, a major facility built in the 1960's which runs through Bucks, Philadelphia, and Delaware Counties in the DVRPC region. Current construction efforts in Philadelphia, are addressing critical repairs on aging bridges and interchanges, and improve traffic flow, along the approximately eight miles of I-95 between I-676/Vine Street and Cottman Avenue (Sector A), by adding new ramps and creating a more consistent four-lane highway in both directions by eliminating lane-drops and providing continuous lanes connecting the on-off ramps. Appropriate pedestrian, bicycle, and transit facilities may also be expanded depending on the context of the construction section. The reconstruction of I-95 has been broken out to over 20 separate MPMS #'s, some of which appear in the Interstate Management Program, which is strictly for reconstruction components, and some of which appear in the DVRPC Regional TIP. MPMS #'s include: 17821 (Section GIR design: GR0, GR1, GR2, GR3, GR4, GR5, GR6, GR7), 47394 (Section CPR design: CP1, CP2), 47811 (Section BSR design: BS1, BS2, BS3), 47812 (Section BRI design:BR0, BR2, BR3), 47813 (Section AFC design: AF1, AF2), 79683 (Section CP1 construction), 79685 (Section CP2 construction), 79686 (Section GR1 construction), 79826 (Section GR3 construction), 79827 (Section GR4 construction), 79828 (Section GR5 construction), 79903 (Section BR0 construction), 79904 (Section BR2 construction), 79905 (Section BR3 construction), 79908 (Section BS1 construction), 79910 (Section BS2 construction), 79911 (Section AF1 construction), 79912 (Section AF2 construction), 80094 (Section GR0 construction), 83640 (Section GR2 construction), 87784 (Section BS3 construction), 98207 (I95 Congestion Management), 103553 (Section GR6 Construction), 103554 (Section GR7 construction), 103555 (Section GR8 construction), 102309 (I95 Corridor Drainage). Please refer to the DVRPC I-95 Reconstruction Project in Philadelphia Roadmap in the TIP for additional information about the various sections and corresponding MPMS#'s as well as notations on future and previous projects which may not currently be active and do not appear in the IMP or TIP.

This project is integral to the Delaware Valley Freight Corridors Initiative. Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2010 annual memoranda on supplemental CMP strategies for details related to this project.

## Pennsylvania - Interstate Management Program

### Philadelphia

**MPMS# 115805** *I-95 Brdg Rehab: Island Ave-Phila Navy Yard*

**LIMITS:** I-95 between Island Avenue and Phila. Navy Yard

No Let Date

**MUNICIPALITIES:** Philadelphia City

**IMPROVEMENT:** Bridge Repair/Replacement

**FC:**

AQ Code:S19

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** HNTB/N. Velaga

**CMP:** Not SOV Capacity Adding

The purpose of this project is to perform comprehensive bridge rehabilitation activities on twenty bridges carrying Interstate 95 between Island Avenue and the Philadelphia Navy Yard in Philadelphia, PA. This is roughly a 5 mile stretch which includes the Girard Point Bridge (Interstate 95 over the Schuylkill River) and the approach structures to the bridge including mainline Interstate 95 bridges and on and off ramps. The rehabilitation will increase the remaining service life of the structures and will provide an overall NBIS bridge condition rating of "good". The bridge rehabilitation will include the following: latex modified concrete deck overlays, painting of structural steel, steel repairs, jacking and bearing repairs and replacements, substructure repairs (including the installation of a fender system on Pier 8 of the Girard Point Bridge, presently there is none provided) and joint replacement and repairs.

**IMPROVEMENT:** Bridge Repair/Replacement

**FC:**

AQ Code:S19

**PLAN CENTER:**

IPD:

**PROJECT MANAGER:** HNTB/N. Velaga

**CMP:** Not SOV Capacity Adding

The 95-MB5 Bridge Rehabilitation project will consist of repairs to structures on I-95 mainline and ramps in the City of Philadelphia between Penn's Landing and Broad Street. Typical construction activities will include deck repairs, replacement and/or elimination of expansion deck joints with link slabs, replacement and/or repair of bearings and bearing pedestals, substructure concrete repairs, beam end repairs, and painting of structural steel. The proposed improvements will keep the bridges in "Fair" condition extending their service life. In addition, select overhead sign structures will be replaced and select integral steel box girder pier caps will be rehabilitated on interstates within District 6.
