

# Diverse Downtowns

75 of the region's downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1–100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer:  
This is an analysis of visits to and trade areas of the region's downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.

# Characteristics that **reduced** the pandemic's impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

## Development

Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.

## Diversity

Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.

## People

Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.

## Trails

Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.

## Walkability

Historic downtowns with more pedestrian-friendly built environments had greater resiliency.

# Characteristics that **exacerbated** the pandemic's impact:

Downtowns that lacked the characteristics found to reduce the pandemic's impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

## Cars

Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.

## Colleges

Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.

## Goods & Services

As the share of Neighborhood Goods & Services (NGS) retailers increased in a downtown, so did the pandemic's impact.

## Transit

The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.

## Vacancy

The pandemic had a greater impact as downtown vacancy rates increased.

# Diverse Downtowns | Haddonfield, NJ

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Haddonfield's downtown has a historic and walkable built environment, and it benefits from its residential population. The downtown also has a significant number of civic, cultural, and office uses, and it has a healthy mix of retail types as well. These characteristics make Haddonfield one of the most diverse downtowns, which earned it a Diversity Score of 34.

The downtown's diverse economy and its built environment most likely helped mitigate the pandemic's impact, making it one of the 10 least impacted downtowns with a Pandemic Impact Score of 35.

34

## Diversity Score

*Built environment, mix of uses, population, transportation, and types of downtowns*

35

## Pandemic Impact Score

*Visits and trade area pre-pandemic, and during the shut-down and reopening periods*

# Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: *Brewery* (45), *Circuit* (48), *Classic* (46), *College* (50), *Core* (43), *Expanding* (42), *Historic* (47), *Opportunity* (45), and *Transit-Oriented* (50).

In general, more typologies equated to a lower Pandemic Impact Score. Haddonfield is considered to be four typologies: *Brewery*, *Expanding* (because of the potential for infill development at the PATCO station), *Historic*, and *Transit-Oriented*. Downtowns considered to be four typologies had an average Pandemic Impact Score of 44.

It is important to note that potentially *Expanding* downtowns had an average score of 46, compared to 42 for those that had actually expanded through realized development in recent years.

# Downtown Population

A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, Haddonfield’s downtown population was estimated to be 95, compared to an average of 165 for all downtowns and 326 for the least impacted downtowns.

Residential

2%  
Vacancy

## Mix of Uses

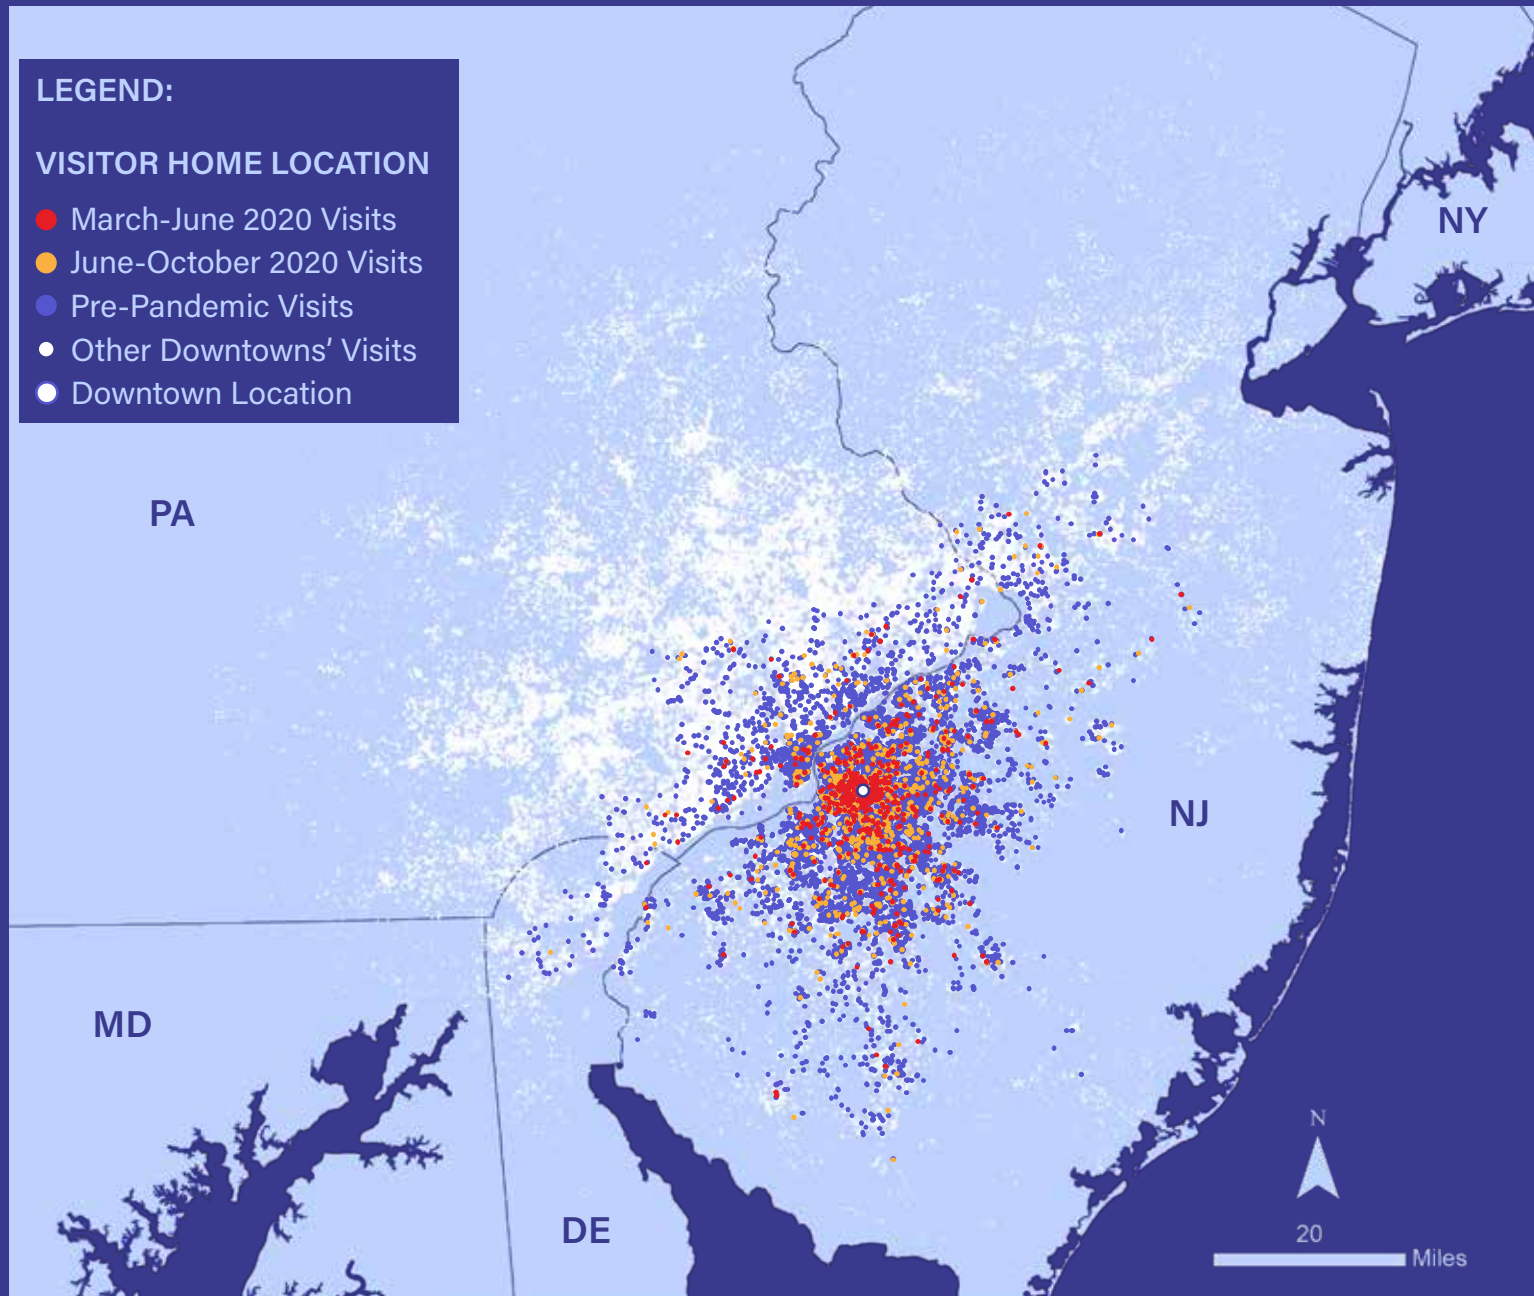

Retail accounts for 54% of the uses in downtown Haddonfield, which is low compared to other downtowns. The average was 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, *Food & Beverage* (FB) makes up a larger share of retail uses at 30%, while *General Merchandise, Apparel, Furnishings & Other* (GAFO) makes up a slightly smaller share at 38%. On average as the share of each of these increased, the Pandemic Impact Score decreased.

Conversely, as the share of *Neighborhood Goods & Services* (NGS) retailers increased so did the Pandemic Impact Score. In the least impacted downtowns, NGS retailers made up 30% of all retail, which is a slightly smaller share than in Haddonfield.

Additionally, as the vacancy rate increased, so did the Pandemic Impact Score.

## Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic's impact on visits to the region's downtowns and their trade areas. Visits to Haddonfield were as follows:

### ● Pre-Pandemic

Delaware: 0.5%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 9.9%
New Jersey: 89.6%	

### ● Shutdown | March 13 - June 15, 2020

Delaware: 0.2%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 7.0%
New Jersey: 92.8%	

### ● Reopening | June 16 - October 31, 2020

Delaware: 0.0%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 8.0%
New Jersey: 92.0%

## Visits to Downtown

Pre-pandemic, visitors to Haddonfield primarily came from southern New Jersey, as well as Delaware and Philadelphia Counties. However, during the pandemic, most visits came from Camden and Gloucester Counties, and somewhat from Center City Philadelphia.

Between August 2018 and March 2020, 15,240 people visited the downtown, which is significantly more than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 666 visits, and during the reopening period (June 16 - October 31) there were 1,237 visits to Haddonfield's downtown.

# Shutdown Impact

March 13 - June 15, 2020

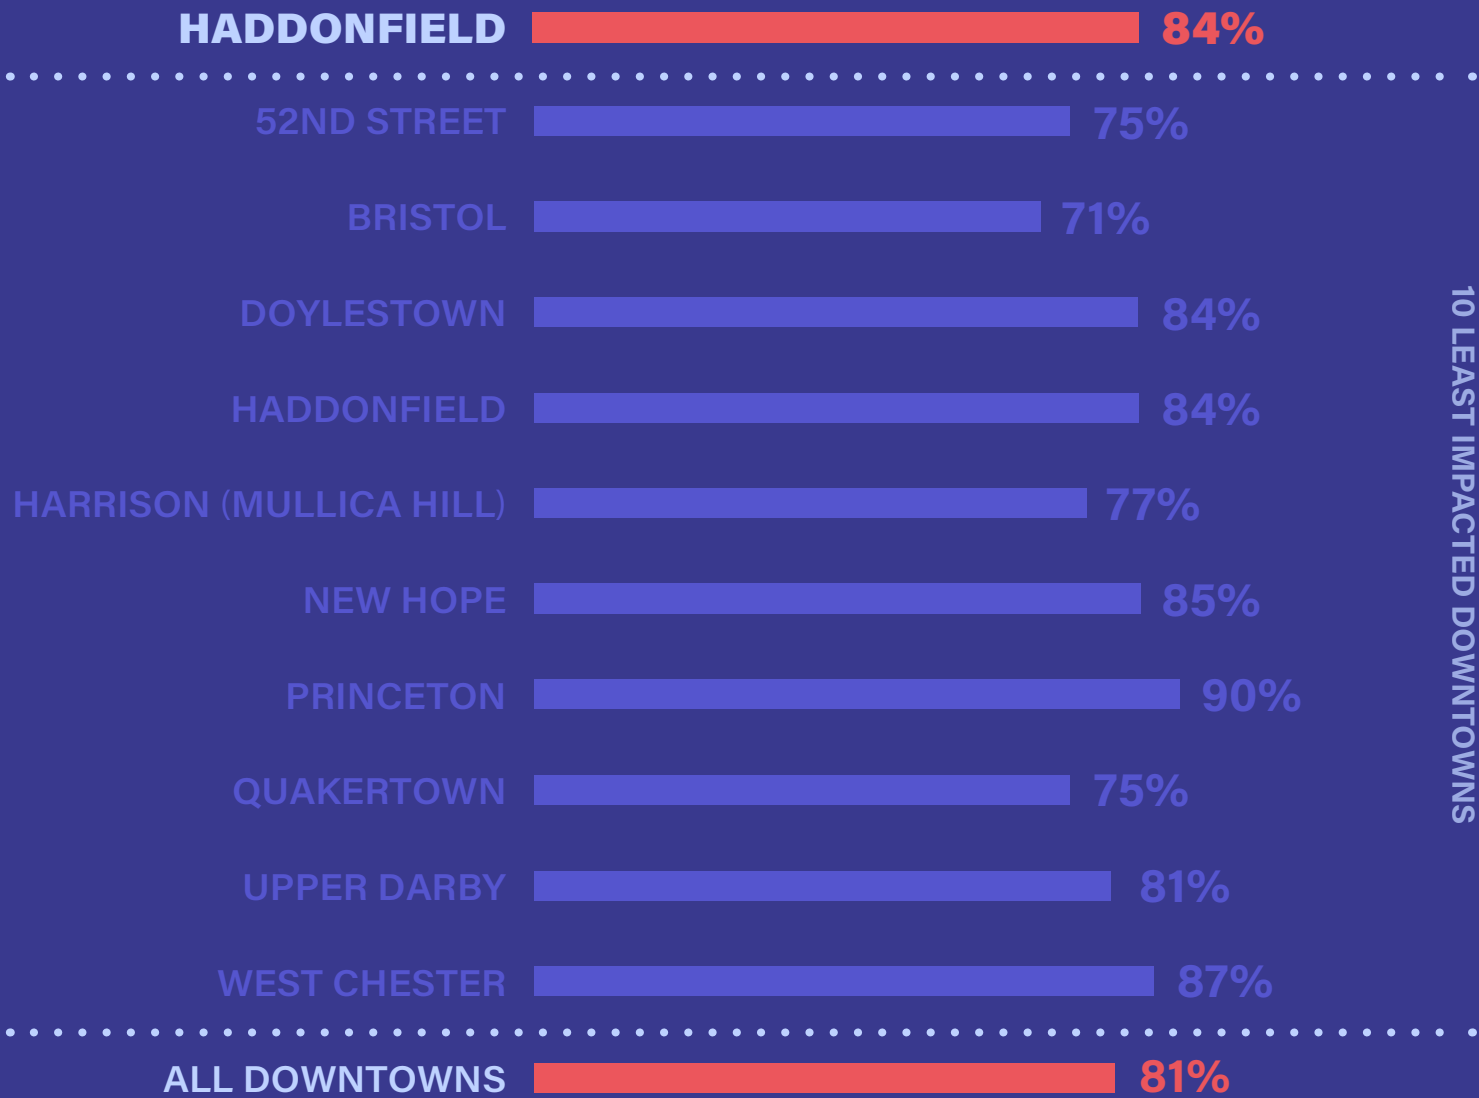

During the economic shutdown, there were 666 visits to Haddonfield compared to 4,262 visits during the same period in 2019. This equated to an 84% reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City's downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

SOURCE: BUXTON CO.

# Reopening Rebound

June 16 - October 31, 2020

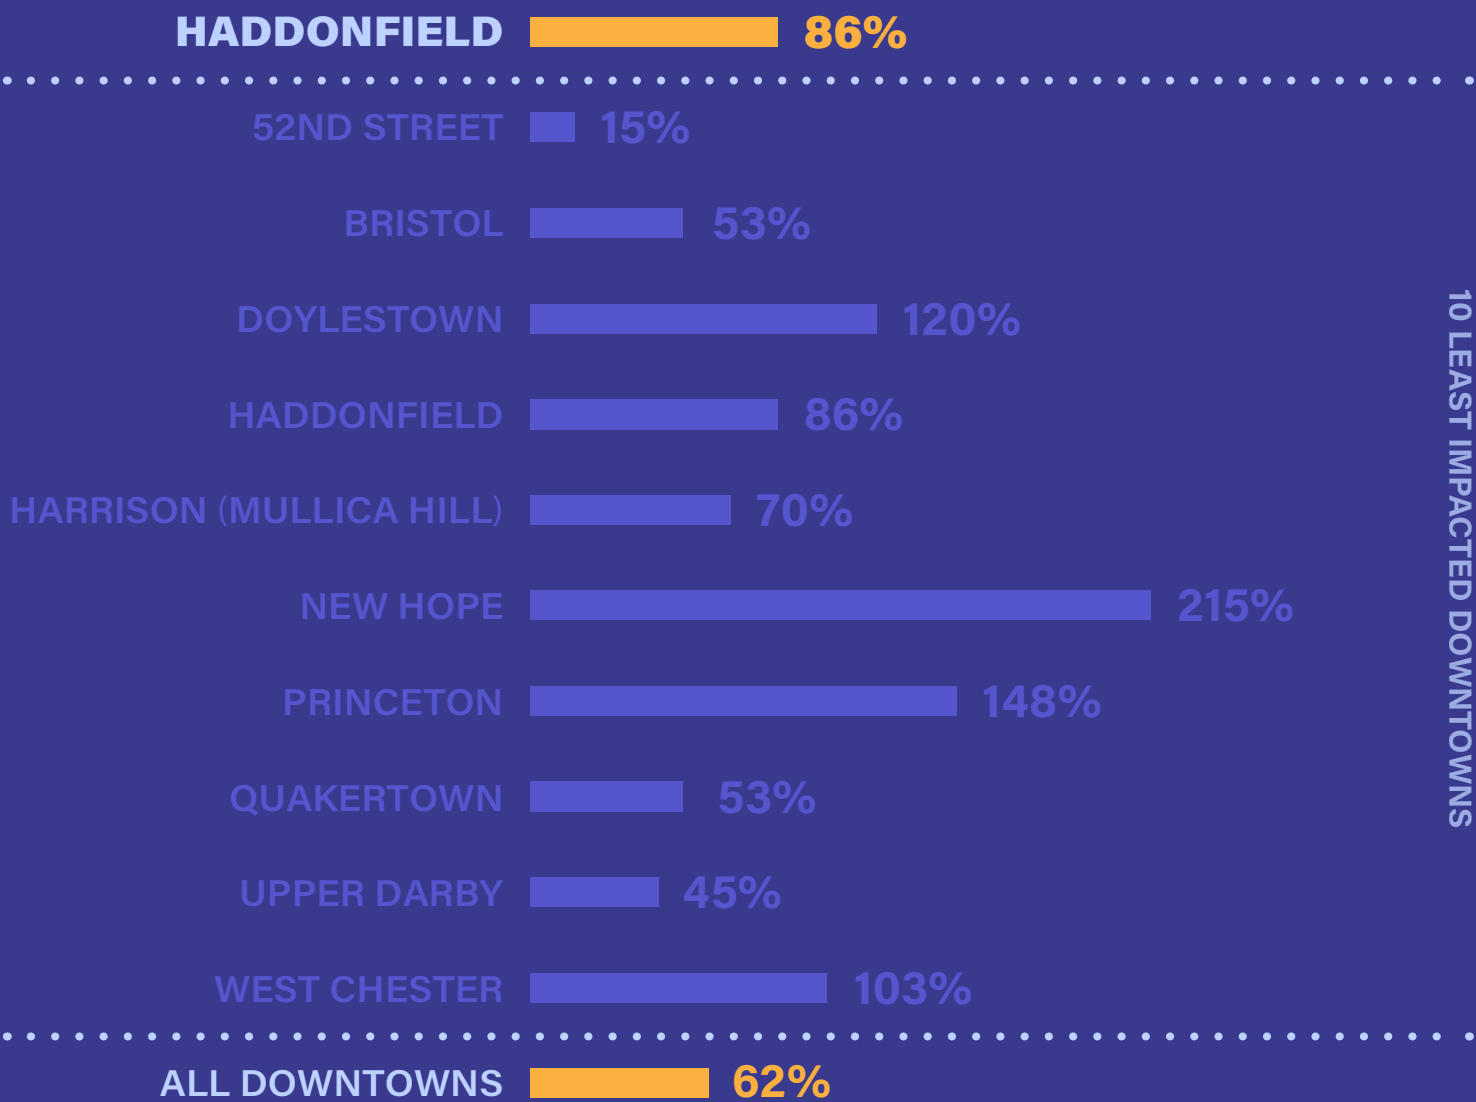

Visits to Haddonfield increased by 86% during the reopening period to a total of 1,237 visits. This was 77% fewer than the 5,442 visits that occurred during the same period in 2019.

On average, visits increased by 62% for downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

# Trade Area Recovery

(Drive Time in Minutes)

Haddonfield's pre-pandemic trade area was a 31 minute drive time, which shrank by 16% during the shutdown to 26 minutes. The trade area recovered by 10% during the reopening period to 29 minutes.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour, and that was larger during reopening (72 minutes).
